

10 big wins from just leaving the EU on 31 October

<https://johnredwoodsdiary.com/>

We can

Spend all the money we save on our priorities

Cut tariffs on imports especially where we cannot grow or make them for ourselves

Remove VAT from items as we wish – as with green items like insulation and boiler controls and feminine hygiene products

Rebuild our fishing grounds and land more of our own fish for home consumption

Work with our farmers to cut food miles and enjoy more home grown produce

Regain our seat and vote in international bodies

Sign Free trade deals that suit us with other countries – all the time we were members they never managed an FTA with the USA and many Commonwealth countries

Decide our own laws

Cut the costs of government by getting rid of a whole unnecessary EU level

Avoid all the financial and foreign policy risks of the Euro and common EU foreign policy
