- Please view the attached document for additional example images and configurations

# Company news

While we, as a country, work together to fight our way through the pandemic, we, as an organisation, strive to continue to provide our products and services whilst battling the many logistical issues it sets in our path.

The ongoing production of all full body and cremated remains interment facilities has been

essential throughout the last year and we are proud to continue to work with our clients to provide the services they need whilst following the ever-changing guidelines and procedures.

All our products and systems can be installed together, in any configuration or layout, designed to best suit the needs of our customers, to create the welters® Cemetery Village® concept. Previously unusable land can be transformed into attractive cemeteries and cemetery extensions, creating interment positions where none were possible in the existing land prior to our involvement.

Please visit our website for further information on our products and services.
