welters® can supply full body interment mausolea in a multitude of configurations.

These mausolea combine front and side charging units with attractive columns and stone cladding to provide full body interment for community installations.

A popular mausolea style is that of **welters**[®] Decorative Stone units. These utilise front charging interment units and stone fronts, cladding and buttresses.

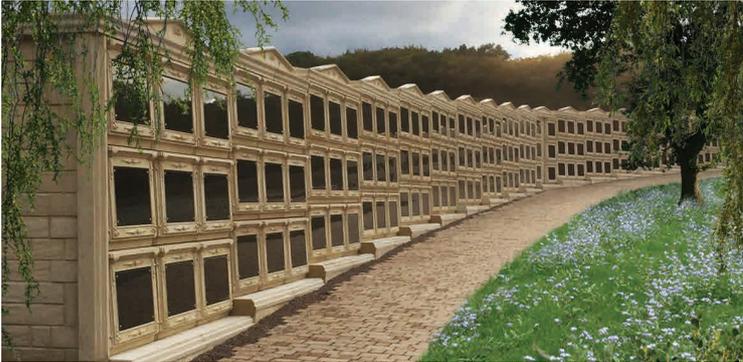

The Decorative Stone mausolea shown can be installed as communal for those interred within. Seating and planters are available to augment

community or family units. The front tablets can be inscribed in memorial
to mark the installation area and provide an area to rest for families.

The modular design of **welters**[®] mausolea units allow for the creation of structures that can be constructed into embankments, utilising land that was previously unusable.

on of large scale installations. These can be free standing or
usable for interment.

These images show smaller family mausolea. In most cases, the family members. The family name can be inscribed on the units w
