

Additional Scottish Water Works – Fyffe Street/Eassons Angle #dundeewestend

From the Corporate Affairs Officer at Scottish Water :

I have been made aware from our contractors CWA who are carrying out our water mains upgrade works in Dundee of an additional piece of work to take place within your ward.

This work was originally planned previously however due to issues with the proposed backfeed (to reduce amount of customers affected) the work was unable to be completed.

I have been informed that the work will now take place from Monday 20th November for approximately 2 weeks. The work involves the lining of existing water mains in Fyffe Street (near junction with Benvie Road).

There may also be some work required in Easson's Angle however at this stage nothing has been confirmed. I will keep you updated when I have confirmation.

The work in Fyffe Street will not involve any road closures and access will be maintained at all times.
