# <u>Answers to my Written Parliamentary</u> <u>Questions — electricity prices</u>

Department for Energy Security and Net Zero provided the following answer to your written parliamentary question (198579):

### Question:

To ask the Secretary of State for Energy Security and Net Zero, whether she has made a comparative assessment of UK electricity prices compared to those charged in the United States. (198579)

Tabled on: 11 September 2023

#### Answer:

#### **Graham Stuart:**

Domestic and industrial electricity prices for countries that are members of the International Energy Agency (IEA) are published in Quarterly Energy Prices tables 5.5.1 and 5.3.1 respectively.

#### Table 5.5.1:

https://www.gov.uk/government/statistical-data-sets/international-domestic-en
ergy-prices and Table 5.3.1:

https://www.gov.uk/government/statistical-data-sets/international-industrialenergy-prices

Average electricity prices in the United States are among the lowest in the IEA, below those in the UK, and they have been one of the 5 countries with the lowest prices across the IEA since the mid-2000s. Electricity prices vary by locality in the United States based on the availability of power plants and fuels, local fuel costs, and pricing regulations.

## JR Comment

This reveals that UK suffers a major competitive disadvantage by going for expensive electricity, along with high energy and carbon taxes. To have a stronger industrial base we need cheaper energy.
