

Article – Orange the World: Parliament stands against rape

“We know the alarming numbers: one in three women experience physical or sexual violence in their lives. Every second murder of a woman is committed by someone close – friends or family,” said Austrian S&D member Evelyn Regner, chair of Parliament’s [women’s rights and gender equality committee](#). “The perpetrators are often husbands, brothers or partners. So the most dangerous place for women is their own home. Violence against women concerns us all.”
