

## **Business support in Dundee – an update**

The Boxing Day shift from tier three to four, along with the move to lockdown last week, has changed the business situation and the need for support has never been greater. In particular, non-essential retail businesses and business premises delivering close contact services may now be eligible for support at level four.

A one-stop information guide for business with advice from Dundee City Council, support organisations, Scottish Government and other agencies can be found [here](#).

If you are already in receipt of grants from these funds you do not need to re-apply. The City Council will automatically alter grant payments to reflect the change of level. But if you have not previously applied, or applied but did not meet the criteria for level three support, and are now eligible under level four, you should make an application as soon as possible, so do please go to the link above.
