

Red flag hoisted at Clear Water Bay Second Beach

Attention TV/radio announcers:

Please broadcast the following as soon as possible:

Here is an item of interest to swimmers.

The Leisure and Cultural Services Department announced today (December 30) that due to big waves, red flag has been hoisted at Clear Water Bay Second Beach in Sai Kung District. Beach-goers are advised not to swim at the beach.

CHP reminds public on precautions against cold weather

The Centre for Health Protection (CHP) of the Department of Health (DH) today (December 30) reminded the public, particularly the elderly and people with chronic illnesses, to adopt appropriate measures to protect their health in view of the cold weather.

A spokesman for the CHP said that cold weather can easily trigger or exacerbate diseases, especially among the elderly and persons suffering from heart disease, respiratory illness or other chronic illnesses.

"Elderly people have less insulating fat beneath their skin to keep them warm and their body temperature control mechanism may be weaker. Their body may not be able to appropriately respond to the cold weather," the spokesman said.

Some senior persons may have decreased mobility, which can in turn slow down their ability to generate and conserve body heat. Chronic illnesses, such as hypertension, diabetes and endocrine disorders, may undermine the health of elderly people and lower their metabolic rate, subsequently causing their body to generate less heat.

The CHP reminded the public, in particular the elderly and persons with chronic illnesses, to adopt the following preventive measures:

- Take note of the weather forecast. Wear warm clothing, including hats, scarves, gloves and socks accordingly;

- Consume sufficient food to ensure adequate calorie intake;
- Perform regular exercise to facilitate blood circulation and heat production;
- Stay in a warm environment and avoid prolonged outdoor exposure;
- Use heaters with care and maintain adequate indoor ventilation; and
- Seek medical advice if feeling unwell.

In addition, the public should avoid alcoholic beverages.

"Drinking alcohol cannot keep you warm. Alcohol accelerates the loss of body heat through dilated blood vessels, resulting in chilling instead," the spokesman said.

"Parents should ensure that babies are sufficiently warm, but it is also important to keep babies lightly clothed to avoid overheating them," the spokesman added.

Parents should observe the following safety measures when putting their children to bed:

- Keep the room well ventilated and with a comfortable temperature;
- Always place babies on their back to sleep. Babies usually sleep well without a pillow;
- Place babies on a firm and well-fitted mattress to sleep. Avoid soft objects and loose bedding;
- Leave their head, face and arms uncovered during sleep; and
- Let babies sleep in a cot placed in the parents' room and near their bed.

Members of the public are advised to take heed of the following advice to reduce the risk of getting influenza and respiratory tract infections:

- Maintain adequate rest, a balanced diet and regular physical activity, and avoid stress and do not smoke;
- Maintain good personal and environmental hygiene;
- Maintain good hand hygiene via proper handwashing or use of alcohol-based handrub;
- Ensure good ventilation;
- Wear a face mask in the event of influenza-like symptoms, while taking care of patients and when visiting hospitals or clinics;
- Cover the nose and mouth while sneezing or coughing. Dispose of soiled tissue paper in a lidded rubbish bin and wash hands immediately afterwards;
- Seek medical advice when feeling unwell, and stay at home; and
- Receive seasonal influenza vaccination, which is suitable for all persons aged 6 months or above except those with known contraindications.

Food-borne diseases, particularly those linked to hot pot cuisine, are

also common in cold weather. The following preventive measures should be taken:

- Wash hands before handling and consuming food;
- Do not patronise unlicensed vendors or those with poor hygienic standards while selecting food;
- Wash and cook all food thoroughly;
- Vegetables should be washed thoroughly in clean running water before cooking and consumption. When appropriate, scrub vegetables with hard surfaces with a clean brush to remove dirt and substances, including pesticide residues and contaminants, from the surface and crevices;
- Shrimps should be fully cooked by cooking them until the shells turn red and the flesh turns white and opaque;
- For shellfish like scallops and geoduck, scrub the shells thoroughly and remove internal organs;
- Most hot pot ingredients should be stored in a refrigerator at 4 degrees Celsius or below, while frozen food should be stored in a freezer at -18 degrees C or below;
- Never use raw eggs as a dipping sauce for hot pot; and
- Use different sets of chopsticks to handle raw and cooked food to avoid cross-contamination.

In addition, the public should not use charcoal as cooking fuel in poorly ventilated areas, especially indoors, to avoid harmful exposure to carbon monoxide (CO) and prevent CO poisoning. While using other kinds of fuel, the public should also ensure adequate ventilation.

For more health information, the public may call the DH's Health Education Hotline (2833 0111) or visit the [CHP's website](#) and [Facebook Fanpage](#).

The public may also call Dial-a-Weather (1878 200) or visit the website of the [Hong Kong Observatory](#) for the latest weather information and forecast, or its page on [Weather Information for Senior Citizens](#).

Employers and employees should take precautions during cold weather

Attention duty announcers, radio and TV stations:

Please broadcast the following special announcement immediately, and repeat it at frequent intervals when the Cold Weather Warning is in force:

The Labour Department reminds employers that as the Cold Weather Warning is in force, they should take appropriate precautions such as reminding

employees who have to work outdoors or in remote areas to wear appropriately warm clothing, and make arrangements for employees to rotate from outdoor to indoor or sheltered work sites as far as possible. Employees should take note of the weather report, wear appropriately warm clothing and be mindful of their health conditions. They should notify their supervisors and seek medical help immediately if feeling unwell, such as having cold limbs and body shivering.

Yellow fire danger warning

Attention duty announcers, radio and TV stations:

Yellow fire danger warning

The fire danger situation today (December 30) is yellow and the risk of fire is high. People are urged to prevent fires breaking out and hikers should also be vigilant.

Hong Kong Customs seizes suspected ketamine (with photo)

Hong Kong Customs yesterday (December 28) seized about 3 kilograms of suspected ketamine with an estimated market value of about \$1.8 million at Hong Kong International Airport.

Two male passengers arrived in Hong Kong from Thailand yesterday. Upon examination of their luggage, Customs officers found suspected ketamine wrapped as snacks. A small amount of suspected ketamine was also found on one of the men's possession. The two men were then arrested.

The arrested men, aged 27 and 29, have each been charged with one count of trafficking in a dangerous drug. The 29-year-old man was additionally charged with one count of possession of dangerous drugs. They will appear at West Kowloon Magistrates' Courts on December 31.

Under the Dangerous Drugs Ordinance, trafficking in a dangerous drug is a serious offence. The maximum penalty upon conviction is a fine of \$5 million and life imprisonment.

Members of the public may report any suspected drug trafficking

activities to the Customs 24-hour hotline 2545 6182 or its dedicated crime-reporting email account (crimereport@customs.gov.hk).
