

Director of HKO presides over 16th session of Commission for Aeronautical Meteorology of World Meteorological Organization (with photos)

The Director of the Hong Kong Observatory (HKO), Mr Shun Chi-ming, in his capacity as the President of the Commission for Aeronautical Meteorology (CAeM) of the World Meteorological Organization (WMO), presided over the 16th session of the CAeM held from July 24 to 27 (Exeter time), and the Technical Conference held on July 23, in Exeter, the United Kingdom.

Speaking at the opening of the session, Mr Shun said, "Aviation is one of the most weather-sensitive economic sectors. Science and technology are rapidly advancing, and so are user requirements. We need to ensure that in close collaboration with the user and research communities, the weather community will be able to further develop services that are fit-for-purpose and credible, both now and in the future."

A total of 159 participants from 54 WMO members and eight international organisations attended the session meeting, which discussed the future development plan of the CAeM with five priority themes identified including aeronautical meteorological hazards prediction, aeronautical meteorological information service and governance, and impacts of climate change and variability on aviation. The meeting also discussed the operational structure of the CAeM to take forward future work, strengthening collaboration with the International Civil Aviation Organization (ICAO), and WMO constituent body reform and its implication on the CAeM.

The closing of the session marked the end of Mr Shun's second four-year term as the President of the CAeM. He was elected President in the 14th session held in Hong Kong in February 2010, and was re-elected in the 15th session held in Montreal, Canada, in July 2014. Mr Shun is the first Chinese person to serve as the president of a technical commission of the WMO since its establishment in 1951.

During Mr Shun's presidency, the CAeM has taken forward numerous projects, including the widespread implementation of a quality management system for aeronautical meteorological services, the launch of the Aviation Research and Development Project championed by the HKO, and the development of the Southeast Asia SIGMET (Significant Weather Information) co-ordination project. He also led various national and local development projects including the establishment of the Asian Aviation Meteorological Centre in co-operation with Mainland counterparts, and the launch of the electronic flight bag mobile application "MyFlightWx" developed by the HKO.

Considering the sustained contribution of Hong Kong, China to the work

of the CAeM, the Assistant Director of the HKO, Ms Sharon Lau, was selected as a member of the new management group of the CAeM at the meeting. Ms Lau will assist the newly elected President, Mr Ian Lisk of the United Kingdom, to further develop aeronautical meteorological services and lead the work on aeronautical meteorological hazards prediction – one of the five priority themes of the CAeM – over the coming four years.

The CAeM is one of the WMO's eight technical commissions looking after the application of meteorology to aviation. Its primary mission is to develop international standards and practices in co-ordination with the expert bodies of the ICAO, and co-ordinate technical support and capacity development for WMO members to meet the requirements of aviation for safe, economical and efficient air navigation.

[CHP investigates two suspected food poisoning clusters](#)

The Centre for Health Protection (CHP) of the Department of Health is today (July 27) investigating two suspected food poisoning clusters affecting seven persons, and reminded the public to maintain personal, food and environmental hygiene to prevent food-borne diseases.

The first cluster involved three women, aged 38 to 48, who developed fever, abdominal pain, diarrhoea and vomiting about 13 to 26 hours after consuming food bought from a food premises in Causeway Bay on July 20.

The second cluster involved two men and two women, aged 25 to 34, who developed fever, abdominal pain and diarrhoea about nine to 30 hours after consuming food bought from the same food premises on the same day.

Five of the affected persons have sought medical advice and no hospitalisation is required. All patients are in a stable condition.

"We have alerted the Food and Environmental Hygiene Department to the incident and investigations are ongoing," a spokesman for the CHP said.

To prevent food-borne diseases, members of the public are reminded to maintain personal, food and environmental hygiene at all times. When dining out:

- Patronise only reliable and licensed restaurants;
- Avoid eating raw seafood;
- Be a discerning consumer in choosing cold dishes, including sashimi, sushi and raw oysters, at a buffet;
- Ensure food is thoroughly cooked before eating during a hot pot or barbecue meal;
- Handle raw and cooked foods carefully and separate them completely during the cooking process;
- Use two sets of chopsticks and eating utensils to handle raw and cooked food;
- Do not patronise illegal food hawkers;
- Drink boiled water;
- Do not try to use salt, vinegar, wine and wasabi to kill bacteria as they are not effective; and
- Always wash hands before eating and after going to the toilet.

[Green turtles returned to sea \(with photos\)](#)

The Agriculture, Fisheries and Conservation Department (AFCD) released three green turtles in the southern waters of Hong Kong today (July 27).

One of the green turtles was seized by the AFCD in an earlier enforcement operation, while the other two were rescued in the waters near Sha Tau Kok and Siu Sai Wan respectively. The three green turtles were then accommodated temporarily at Ocean Park Hong Kong (OPHK). They were assessed by veterinarians of OPHK and were under constant monitoring and veterinary care.

An AFCD spokesman said, "The three green turtles released today weighed 10 kg, 11 kg and 93kg respectively, and their carapace length measured about

43 cm, 45 cm and 92 cm. All of them were assessed by veterinarians of OPHK as being in good condition and ready to be returned to the sea. The department is thankful to the veterinarians and staff of OPHK for taking care of them."

Before the green turtles were released to the sea, the AFCD had tagged each of them with a microchip and Inconel tags for future identification. Satellite transmitters were also attached to the carapaces of the turtles. By tracking the movement and feeding grounds of green turtles in the sea, the AFCD can collect data for formulating appropriate conservation measures and will share its findings with other conservation authorities for the better conservation of green turtles through concerted efforts.

The green turtle is a globally endangered species and is to date the only sea turtle species known to nest locally. In Hong Kong, all wild turtles (including sea turtles) are protected by the Wild Animals Protection Ordinance (Cap. 170). No person shall, except in accordance with a special permit, hunt or wilfully disturb, sell or export, possess or control sea turtles (including nests and eggs). Otherwise, they will be liable to a maximum fine of \$100,000 and imprisonment for one year. The specimens will also be forfeited upon conviction.

In addition, all sea turtle species are listed in Appendix I to the Convention on International Trade in Endangered Species of Wild Fauna and Flora and regulated under the Protection of Endangered Species of Animals and Plants Ordinance (Cap. 586) in Hong Kong. The import, export, re-export or possession of specimens of endangered species not in accordance with the Protection of Endangered Species of Animals and Plants Ordinance is an offence. The maximum penalty is a fine of \$10 million and imprisonment for 10 years, and the specimens will also be forfeited upon conviction.

Members of the public are urged to report any sighting of sea turtles or suspected irregularities involving sea turtles to the AFCD via 1823.

[SCED visits Sai Kung District](#)

The Secretary for Commerce and Economic Development, Mr Edward Yau, visited Sai Kung District today (July 27) to get a better grasp of the district's latest developments. He toured the waterfront in Sai Kung town centre, paid a visit to Kau Sai Chau, and met with members of the Sai Kung District Council (SKDC).

Mr Yau first travelled to Sai Kung town centre and took the opportunity to observe ferry services for travellers at the Sai Kung Public Pier. He also visited the Sai Kung Public Transport Interchange to learn about the ancillary transport facilities for citizens and visitors to Sai Kung, which is branded as the "Back Garden of Hong Kong". He then proceeded to Area 4 of Sai Kung, where the Government has planned projects including a sports centre and Town Plaza for provision of various leisure and sports facilities to residents of Sai Kung District.

Mr Yau then made a visit to Kau Sai Chau by ferry and observed Sharp Island during the ride. Sharp Island, covered by unique rocky outcrops, is part of the Hong Kong UNESCO Global Geopark and one of the popular tourist attractions in Sai Kung District. He said he was pleased to learn that the reconstruction of Sharp Island Pier is expected to complete within the first quarter next year. The new pier will be able to accommodate larger vessels and allow more members of the public and visitors to explore the unique landforms of the Geopark.

Mr Yau said that the Government released the Development Blueprint for Hong Kong's Tourism Industry in October 2017. One of the strategies is to nurture and develop tourism products and initiatives with local and international characteristics, which in turn includes promoting green tourism by enhancing supporting facilities at popular hiking trails and those with good tourism potential. The Government will continue to maintain close

collaboration with the Hong Kong Tourism Board and the trade to enhance the infrastructure and services of Hong Kong's tourism industry so as to reinforce Hong Kong's position as the most preferred destination in Asia.

Kau Sai Chau is located in the Sai Kung Volcanic Rock Region of the Geopark. Mr Yau inspected the facilities and improvement works of Kau Sai Village Pier and also visited other ancillary facilities in Kau Sai Village. He noted that the Kau Sai Chau Village Office will be converted into a story room, which will illustrate the history and culture of Kau Sai Village and serve as a visitor centre to promote the Geopark.

Before concluding the district visit, Mr Yau met with SKDC members to exchange views on district matters relating to transport, tourism, broadband services and local economic development.

SLW visits North District

The Secretary for Labour and Welfare, Dr Law Chi-kwong, visited North District today (July 27), where he toured elderly facilities promoting active ageing and met with District Council members.

Accompanied by the Chairman of the North District Council (NDC), Mr So Sai-chi, and the District Officer (North), Mr Chong Wing-wun, Dr Law went to Ellen Li District Elderly Community Centre (DECC) of the Hong Kong Young Women's Christian Association (HKYWCA) in Fanling to learn about a primary care programme provided by non-governmental organisations (NGOs) for the elderly. Jointly organised by the DECC with Cheer Lutheran Centre and Fung Ying Seen Koon Cheung Wah Neighbourhood Elderly Centre, the programme arranges for volunteers to conduct free health checks of elderly persons for early identification of risks of disease and follow-up treatment. The programme's outreach teams also visit elderly persons in rural areas and conduct body checks for them. The programme is funded by the Jockey Club Age-friendly City Project.

Dr Law said that the programme tied in with the Government's policy objectives to strengthen community care and promote "ageing in place". He pointed out that the NGOs concerned have been providing holistic care and support services for the elderly over the years, building a neighbourhood mutual help network which is important social capital in the community.

He then visited the HKYWCA Farm of Healthy Ageing in Fanling. Operated by retired elderly volunteers, the farm grows crops and organises farming activities from time to time for elderly persons to unleash their potential. Dr Law noted that the farming work was all shared among elderly persons, exemplifying their sense of self-worth and promoting active ageing.

Prior to visiting the above facilities, Dr Law met with NDC members to

discuss labour and welfare matters.
