

Red flags hoisted at Turtle Cove Beach and Hap Mun Bay Beach

Attention TV/radio announcers:

Please broadcast the following as soon as possible:

Here is an item of interest to swimmers.

The Leisure and Cultural Services Department announced today (August 29) that due to big waves, red flags have been hoisted at Turtle Cove Beach in Southern District, Hong Kong Island and Hap Mun Bay Beach in Sai Kung District. Beach-goers are advised not to swim at these beaches.

Red flags hoisted at several beaches

Attention TV/radio announcers:

Please broadcast the following as soon as possible:

Here is an item of interest to swimmers.

The Leisure and Cultural Services Department announced today (August 29) that due to big waves, red flags have been hoisted at Shek O Beach and Big Wave Bay Beach in Southern District, Hong Kong Island; Hung Shing Yeh Beach, Lo So Shing Beach, Pui O Beach, Upper Cheung Sha Beach, Lower Cheung Sha Beach and Tong Fuk Beach in Islands District. Beach-goers are advised not to swim at these beaches.

Territory-wide flag day today

Tung Wah Group of Hospitals has been issued a Public Subscription Permit to hold a territory-wide flag sale from 7am to 12.30pm today (August 29), a spokesman for the Social Welfare Department (SWD) said.

For enquiries, please call the SWD's hotline at 2343 2255, or the Charitable Fund-raising Control Team at 2832 4311 during office hours. Information on the flag days of the month is available at the SWD's website (www.swd.gov.hk/en/index/site_whatsnew). Permits for flag days containing

contact information of the flag-selling organisations and information on the approved flag-selling activities have also been uploaded to the SWD's website (www.swd.gov.hk/en/index/site_pubsvc/page_controlofc/sub_recentlyap). For enquiries about the detailed flag-selling arrangements, please contact the individual flag-selling organisations.

Details of the charitable fund-raising activities covered by the Public Subscription Permit issued by the SWD have also been uploaded to the GovHK website (www.gov.hk/fundraising).

In the case of suspected fraudulent flag day activities, people should not make any donation and should immediately report the matter to the Police, the spokesman added.

Murder in Western Division

Police today (August 28) arrested a 53-year-old man in suspected connection with a murder case happened in Western Division, in which his 53-year-old wife died.

Police received a report on August 20 from the man that his wife was missing after she was last seen in the small hours on August 17.

Upon investigation, Police found a dead body inside a wooden box in an office on Pok Fu Lam Road in Western Division this afternoon. The neck of the deceased was tied by an electric wire. The deceased was suspected to be the missing woman. The 53-year-old man is arrested for murder and is being detained for further enquiries.

Post-mortem examinations will be conducted later to ascertain the cause of death of the deceased.

Active investigation by the Regional Crime Unit of Hong Kong Island is underway.

CHP investigates one additional local case of dengue fever

The Centre for Health Protection (CHP) of the Department of Health is investigating today (August 28) one additional local case of dengue fever (DF) and again urged the public to maintain strict environmental hygiene,

mosquito control and personal protective measures both locally and during travel.

The case involves a 47-year-old female patient with underlying illnesses, who developed fever, headache, myalgia and arthralgia since August 10 and skin rash since August 15. She was admitted to Kwong Wah Hospital on August 19 and was discharged on August 23. She has all along been in a stable condition.

Her blood sample collected on August 19 tested positive for immunoglobulin M (IgM) antibodies to dengue virus but was negative by antigen and genetic testing. Thus, a second blood sample was taken and there was a four-fold increase in the antibody titre against DF virus when compared with the first specimen. The case is classified as a confirmed local case today.

Initial enquiries revealed that the patient lives in Tsui Chuk Garden in Wong Tai Sin. The patient had no travel history during the incubation period. She had visited Lion Rock Park during the incubation period but could not recall history of mosquito bite there. The patient recalled mosquito bite near the car park in Tsui Chuk Garden.

Her home contacts have remained asymptomatic and have been put under medical surveillance.

"We are working closely with the Food and Environmental Hygiene Department (FEHD) to assess and prevent possible spread of infection. The FEHD's vector investigations, surveillance and control are ongoing. Epidemiological investigations are ongoing," a spokesman for the CHP said.

"The CHP has provided [information](#) and [locations of the residences and local movements](#) of the local DF cases on the CHP's designated webpage for DF to facilitate handy access to information for the public," the spokesman said.

The CHP appeals to members of the public not to visit Lion Rock Park during the closure period in order to prevent contracting DF. Scientific studies have shown that infected persons can transmit the virus to mosquitoes through mosquito bites even if they remain asymptomatic or before their onset of symptoms, leading to further spread of the disease. Hence, people who have visited Lion Rock Park are advised to apply insect repellent for 14 days after their last visit, and those with DF symptoms should seek medical advice as early as possible. Meanwhile, people who reside in or visit Cheung Chau should also be advised to apply insect repellent during their stay and continue applying for 14 days after their last day of stay to prevent infection and secondary spread.

Persons who have been to the vicinity of Wong Tai Sin (particularly Lion Rock Park), Kwai Shing West Estate, Clear Water Bay Second Beach, Cheung Chau (Hillside Road, Tsan Tuen Road, Fa Peng Road, San Hing Street, Cheung Chau Sai Tai Road, Lung Tsai Tsuen, Xavier House and Sai Wan Road) and Charming Garden with DF symptoms should call the CHP's hotline (2125 1122) for laboratory investigation or referral as appropriate. The hotline operates

from 9am to 5.45pm daily.

"We have informed the Guangdong and Macao health authorities to alert them to the latest situation," the spokesman added.

This is the 27th local case recorded this year. Excluding the local cases, as of noon today (August 28), 61 imported cases had been recorded in 2018. The cases were mainly imported from Thailand (26), the Philippines (12) and Cambodia (7).

In the rainy season, the public should take heed of the following advice on mosquito control:

- Thoroughly check all gully traps, roof gutters, surface channels and drains to prevent blockage;
- Scrub and clean drains and surface channels with an alkaline detergent compound at least once a week to remove any deposited mosquito eggs;
- Properly dispose of refuse, such as soft drink cans, empty bottles and boxes, in covered litter containers;
- Completely change the water of flowers and plants at least once a week. The use of saucers should be avoided if possible;
- Level irregular ground surfaces before the rainy season;
- Avoid staying in shrubby areas; and
- Take personal protective measures such as wearing light-coloured long-sleeved clothes and trousers and apply insect repellent containing DEET to clothing or uncovered areas of the body when doing outdoor activities.

To reduce the risk of infections spread by mosquitoes, apart from [general measures](#), travellers returning from affected areas should apply insect repellent for 14 days (DF) or at least 21 days (Zika Virus Infection) upon arrival in Hong Kong. If feeling unwell, seek medical advice promptly and provide travel details to the doctor. DEET-containing insect repellents are effective and the public should take heed of the tips below:

- Read the label instructions carefully first;
- Apply right before entering an area with risk of mosquito bites;
- Apply on exposed skin and clothing;
- Use DEET of up to 30 per cent for pregnant women and up to 10 per cent for children*;
- Apply sunscreen first, then insect repellent; and
- Re-apply only when needed and follow the instructions.

* For children who travel to countries or areas where mosquito-borne diseases are endemic or epidemic and where exposure is likely, those aged 2 months or above can use DEET-containing insect repellents with a DEET concentration of up to 30 per cent.

The public should call 1823 in case of mosquito problems and may visit the DF pages of the [CHP](#) and its [Travel Health Service](#), the latest [Travel](#)

[Health News](#), [tips for using insect repellents](#), the CHP [Facebook Page](#) and [YouTube Channel](#), and the FEHD's [Guidebook on Control and Prevention of Mosquito Breeding](#) for more information.
