

Service scope of Healthy Teeth Collaboration to expand

The Department of Health (DH) today (July 11) announced that starting from July 16, the free dental service provided under the Healthy Teeth Collaboration (the Programme) will extend from eligible adult persons aged 18 or above with an intellectual disability to those with an autism spectrum disorder.

The current service term for the Programme will be completed on July 15, 2024, and the new service period will be commenced on July 16, 2024, until March 31, 2027. Eight non-governmental organisation (NGO) dental clinics participating in the Programme listed below will provide free dental care services including oral check-ups, dental treatments and oral health education to eligible persons.

*Christian Family Service Centre Tokwawan Dental Clinic
Tel: 3590 9449

* Community Elderly and Special Care Dental
Tel: 2321 8299
WhatsApp: 6616 3554

* Hello Smile Hong Kong Limited
Tel: 3853 9672
WhatsApp: 5931 3940

* The Hong Kong Tuberculosis Association Rusy M Shroff Oral Health Services Limited
Tel: 3553 3535

*Loving Smiles Special Care Dental Centre
Tel: 2370 2669
WhatsApp: 5406 3928

* Stewards Peace Dental Clinic Limited
Tel: 2345 5251

*Tak Shun Dental Clinic
Tel: 2573 7533

* TWGHs Ho Yuk Ching Community Dental Clinic
Tel: 2581 0221

In addition, the service of the operating theatres of Gleneagles Hospital Hong Kong will be engaged if and when required by the dental clinics above.

Applicants under the Programme must be aged 18 or above with an intellectual disability and/or an autism spectrum disorder who hold one of the following documents certifying the disability category as "intellectual disability", "mental handicap" or "autism spectrum disability":

1. a valid Registration Card for People with Disabilities issued by the Labour and Welfare Bureau; or
2. a medical certificate issued by a doctor registered in Hong Kong; or
3. a certificate issued by the person-in-charge of a rehabilitation service unit under the designated types of rehabilitation services.

The Programme details, application form, as well as contact details and address of the NGO dental clinics are available at the DH's website (www.dh.gov.hk/english/main/main_ds/main_ds_dcp.html).

Applicants may select one of the participating NGO dental clinics and submit an application to the selected clinic. For enquiries, please call the NGO dental clinics listed above.

[Secretary for Health chairs ninth meeting of High Level Steering Committee on Antimicrobial Resistance \(with photos\)](#)

The Secretary for Health, Professor Lo Chung-mau, convened the ninth meeting of the High Level Steering Committee on Antimicrobial Resistance (AMR) today (July 11) to review the implementation of the Hong Kong Strategy and Action Plan on Antimicrobial Resistance (2023-2027) and discuss the response strategies with relevant government departments and organisations.

Professor Lo said, "AMR is considered as one of the greatest threats to global health and economies. In this connection, the Government has long been attaching great importance to the necessity of tackling the issue of AMR. As inter-sectoral collaboration and communication across the community are crucial to mitigating such a threat, the Government has been rallying cross-sectoral co-ordination and co-operation of relevant government departments as well as organisations under the 'One Health' framework to implement various aspects of the Action Plan over the past few years."

Based on the initiatives laid down in the Action Plan, a series of actions against AMR have been taken. These include considering legislative amendments to mandate the recording of antimicrobial prescriptions and

dispensing through electronic means, making use of information technology to strengthen antibiotic stewardship in public hospitals, enhancing surveillance and dissemination of AMR data in ready-to-eat food, implementing the "veterinary prescription-only medication supply" policy in local food animal farms, organising publicity campaigns to raise public awareness of the threat of AMR, and strengthening collaboration and partnerships among different stakeholders.

At today's meeting, the Steering Committee reviewed the progress of the actions taken according to the Action Plan and evaluated the latest local situation of AMR by analysing the relevant surveillance data from various sectors, namely human, animal and food. The data thereof showed that the wholesale supply of antimicrobials to community pharmacies continually dropped from 18.5 per cent in 2016 to 4.1 per cent last year. Moreover, out of the total antimicrobial supply in Hong Kong, the proportion of the antimicrobials under the "Access" classification of the World Health Organization (WHO) (i.e. those less likely to result in resistance) reached 60.2 per cent last year, thus achieving the target as advocated by the WHO.

The Hospital Authority (HA) has been promoting the prudent use of antimicrobials through its Antibiotic Stewardship Programme (ASP), playing a crucial role in the fight against AMR. The HA introduced an electronic platform known as "Smart ASP" this year to leverage data analytics to assess the appropriateness of antibiotic prescriptions. The platform also prompts clinicians to review prescriptions if necessary. Furthermore, the HA closely monitors antibiotic consumption trends and AMR patterns. Among all, Methicillin-resistant *Staphylococcus aureus* (MRSA) and Carbapenem-resistant *Acinetobacter* (CRA) showed a notable reduction by 3.0 and 8.9 percentage points respectively in 2023 compared with 2022. The HA remains committed to enhancing infection control measures and conducting routine audits to safeguard patient safety and combat AMR.

In terms of food safety, the Centre for Food Safety (CFS) of the Food and Environmental Hygiene Department reminds the food trade and the public that raw or undercooked food is high-risk as it may carry bacteria with AMR. High-risk individuals, such as pregnant women, young children, the elderly, and persons with weakened immune systems (e.g. patients with chronic diseases), should avoid consuming raw or undercooked food whenever possible. The CFS highlights that the most effective way to reduce bacteria with AMR in food is to observe the Five Keys to Food Safety in daily life, namely choose safe raw materials, keep hands and utensils clean, separate raw and cooked food, cook thoroughly, and keep food at safe temperatures.

The Government calls on different sectors to continue working closely together to cope with the challenges brought about by AMR. Healthcare professionals should follow the guidelines on the prudent use of antimicrobials, while patients should strictly adhere to doctors' instructions when taking antimicrobials and should not buy antimicrobials on their own at community pharmacies without a prescription.

For details on information about AMR, members of the public may visit the [thematic website](#) of the Centre for Health Protection of the Department of

Health.

Chaired by the Secretary for Health, the Steering Committee was set up in May 2016 to encourage collaboration, synergy and cross-fertilisation among all professional sectors to jointly cope with the problems of AMR under the "One Health" framework. The Steering Committee comprises representatives from relevant government departments, public and private hospitals, healthcare organisations, academia and relevant professional bodies.

[Hong Kong Customs further arrests two persons under unfair trade practice case involving rehabilitation institution](#)

Hong Kong Customs conducted an enforcement action today (July 11) again and arrested two male directors of a rehabilitation institution. A staff member of the institution is suspected of having applied a false trade description to the service supplied, and of engaging in unfair trade practices involving a misleading omission, in contravention of the Trade Descriptions Ordinance (TDO). As of today, three male directors and a male staff member of the rehabilitation institution have been arrested.

Customs earlier received information alleging that a staff member of a rehabilitation institution falsely claimed to a customer that the prepaid book fees for a two-year training course could be refunded. However, the institution did not refund the fees to the customer in the end.

In addition, the staff member had claimed that the accommodation deposit paid by the customer would be refunded after his children completed the course. However, it was only after the institution had ceased to provide the training course that the staff member informed the customer of a material information, i.e. the deposit would not be refunded even if the course was

discontinued.

After investigations, Customs officers today arrested two male directors, aged 44 and 64, of the rehabilitation institution. The two arrested persons have been released on bail pending further investigation.

An investigation is ongoing, and the possibility of other persons involved in the case being arrested is not ruled out.

Under the TD0, any trader who applies a false trade description to a service supplied or offered to be supplied to a consumer commits an offence. Any trader who engages in a commercial practice that omits or hides material information or provides material information in a manner that is unclear, unintelligible, ambiguous or untimely, and as a result causes, or is likely to cause, an average consumer to make a transactional decision, commits an offence. The maximum penalty upon conviction is a fine of \$500,000 and imprisonment for five years.

Members of the public may report any suspected violations of the TD0 to Customs' 24-hour hotline 2545 6182 or its dedicated crime-reporting email account (crimereport@customs.gov.hk) or online form (eform.cefs.gov.hk/form/ced002/).

[HKMC appoints new Chief Executive Officer \(with photo\)](#)

The following is issued on behalf of the Hong Kong Monetary Authority:

The Hong Kong Mortgage Corporation Limited (HKMC) announced today (July 11) that the Board of the HKMC has approved the appointment of Mr Colin Pou as the Chief Executive Officer (CEO) of the HKMC with effect from December 26, 2024. Mr Pou will succeed Mr Raymond Li who will be retiring from the HKMC.

"The Board would like to thank Mr Li for his dedication and invaluable contribution to the Corporation in the past 11 years, in particular the successful launch of various new measures during his tenure, benefitting the society and the business community," said the Chairman of the HKMC, Mr Paul Chan. "I look forward to Mr Pou continuing to lead the healthy development of the Corporation after he takes up office, so as to serve the society and business community of Hong Kong," said Mr Chan.

Mr Pou is the Executive Director of the Financial Infrastructure Department at the Hong Kong Monetary Authority (HKMA). He will be seconded from the HKMA to take up the CEO position of the HKMC. Mr Pou joined the HKMA in 1994 as an Assistant Manager and has worked in various departments at the

HKMA covering areas of banking supervision, policy and development, monetary operations and payment systems. From November 2015 to October 2018, he was seconded to the HKMC as Senior Vice President (Operations) and CEO of the HKMC Insurance Limited, an HKMC's subsidiary. Mr Pou was promoted in October 2018 as Executive Director (Financial Infrastructure) of the HKMA, responsible for developing the financial market infrastructure and for enhancing the fintech ecosystem of Hong Kong.

Senior staff movements in Hong Kong Monetary Authority

The following is issued on behalf of the Hong Kong Monetary Authority:

The Hong Kong Monetary Authority (HKMA) announced today (July 11) that the Senior Executive Director, Mr Raymond Li, who is currently on secondment to the Hong Kong Mortgage Corporation Limited (HKMC) as Chief Executive Officer (CEO), will be retiring with effect from December 26, 2024. The Executive Director (Financial Infrastructure), Mr Colin Pou, will be seconded to the HKMC to take over Mr Li's position on the same day.

The Chief Executive of the HKMA, Mr Eddie Yue, said, "Raymond has worked in the HKMA for over 30 years and served in many different roles. In his current role as the CEO of the HKMC, which he took up in 2013, Raymond has been dedicated to continued enhancement of the full range of services of the HKMC, particularly regarding retirement protection for the general public. Under his leadership, the HKMC has also provided strong support to the HKSAR Government in administering various loan guarantee schemes and helped many small and medium-sized enterprises and individuals tide over the difficult

time during the pandemic. I would like to thank Raymond for his long and eminent service to the HKMA, and wish him a happy retirement in the many years to come."

The HKMA will arrange open recruitment for the post of Executive Director (Financial Infrastructure), and a separate announcement will be made after the completion of the selection process.
