

Hong Kong Customs seizes suspected dangerous drugs worth about \$28 million (with photo)

Hong Kong Customs yesterday (June 22) seized a total of about 36 kilograms of assorted drugs with a total estimated market value of \$28 million. Two women and one man, aged between 23 and 25, were arrested.

During an anti-narcotics operation conducted in the vicinity of Sheung Shui yesterday, Customs officers suspected a residential unit was being used for drug trafficking activities. Customs officers therefore raided the unit and seized a total of about 36 kg of assorted drugs, including about 17 kg of suspected cocaine, about 8 kg of suspected crack cocaine, about 6 kg of suspected cannabis buds and about 5 kg of suspected 3,4-methylenedioxymethamphetamine (MDMA). The estimated market value of the drugs seized amounted to about \$28 million. A batch of suspected chemicals and suspected drug paraphernalia were also seized at the scene.

Two women and one man, aged between 23 and 25, were arrested by Customs officers at the scene.

The three arrested persons have been jointly charged with one count of trafficking in a dangerous drug. They will appear at the Fanling Magistrates' Courts tomorrow (June 24).

The department will continue to strengthen intelligence exchange and co-operation with Mainland and overseas law enforcement agents to combat drug trafficking activities on all fronts.

Under the Dangerous Drugs Ordinance, trafficking in a dangerous drug is a serious offence. The maximum penalty upon conviction is a fine of \$5 million and life imprisonment.

Members of the public may report any suspected drug trafficking activities to Customs' 24-hour hotline 2545 6182 or its dedicated crime-reporting email account (crimereport@customs.gov.hk) or online form (eform.cefs.gov.hk/form/ced002/).

LD reminds employers and employees to take heat stroke preventive measures in times of Heat Stress at Work Warning

As the Heat Stress at Work Warning is now in effect, the Labour Department (LD) reminds employers and employees to take appropriate measures during the effective period of the warning to prevent heat stroke when working in hot weather or hot environments.

Employees who work outdoors or in non-air-conditioned indoor environments face high levels of heat stress and are at a relatively higher risk of heat stroke. Employers should assess the risk factors of heat stress for employees at work and, based on the identified risk factors, take necessary preventive and control measures, including rescheduling work periods, setting up shading covers, providing ventilation and heat dissipation equipment, and reminding employees to replenish water and rest in a timely manner.

The Heat Stress at Work Warning is formulated by the LD based on the Hong Kong Heat Index. There are three levels of the warning: Amber, Red and Black, which help employers and employees better understand the level of heat stress while working outdoors or indoors without air-conditioning systems.

A spokesman for the LD said that when the department issues the Heat Stress at Work Warning, employers must refer to the criteria and recommendations provided in the "[Guidance Notes on Prevention of Heat Stroke at Work](#)" to conduct risk assessments, according to the workloads and other relevant heat stress risk factors, for employees who work outdoors or in non-air-conditioned indoor workplaces. Appropriate rest breaks should be arranged

every hour, as far as reasonably practicable, based on various levels of the Heat Stress at Work Warning, to reduce employees' risk of heat stroke.

Employees must also follow instructions to rest on time. Whenever there are any symptoms of heat-related illnesses, such as headache, dizziness, thirst, and nausea, they should rest in a cool and shady place, drink water, and inform employers/supervisors to take appropriate action immediately.

The LD issued the "Guidance Notes on Prevention of Heat Stroke at Work", detailing the various risk factors that should be considered when conducting heat stress risk assessments and recommending corresponding control measures for identified risk factors for employers' and employees' reference. For the Heat Stress at Work Warning and related guidelines, please refer to the department's thematic webpage:

[Liquor Licensing Board to meet on Tuesday](#)

The following is issued on behalf of the Liquor Licensing Board:

The Liquor Licensing Board will meet on Tuesday (June 25) to consider an application for transfer of liquor licence.

The application is:

Kowloon:

Kichi Japanese Restaurant in Tsim Sha Tsui

The board will also consider revocation of the liquor licence of Maruju Aburi Farm in Mong Kok.

The meeting will be held at 9.45am in the conference room, Room 102, 1/F, 258 Queen's Road East, Wan Chai. Members of the public are welcome to attend.

Performing arts for all

â€‹The Community Cultural Ambassador Scheme sponsors local artists to bring performing arts to the community. In 2024, the scheme is prioritising the selection of youth arts groups.

News.gov.hk spoke to a representative of the Leisure and Cultural Services Department to learn more about the aim of the scheme, while one of the Community Cultural Ambassadors shared their experience.

The story is available at www.news.gov.hk/eng/feature today (June 23) in text and video format.

CHP reminds public on precautions against heat stroke during very hot weather

The Centre for Health Protection (CHP) of the Department of Health (DH) today (June 23) reminded members of the public, particularly those undertaking outdoor activities, to take heed of necessary measures against heat stroke and sunburn in very hot weather.

"The public should carry and drink plenty of water to prevent dehydration while engaging in outdoor activities," a spokesman for the CHP said.

"Those engaged in strenuous outdoor activities should avoid beverages containing caffeine, such as coffee and tea, as well as alcohol, as they speed up water loss through the urinary system," the spokesman explained.

"Infants and children, the elderly, pregnant women, those with chronic illnesses such as heart disease or high blood pressure, outdoor/manual workers, and individuals who are overweight are more vulnerable to heat stroke. They should pay special attention," the spokesman added.

The public should adopt the following precautions:

- Wear loose and light-coloured clothing to reduce heat absorption and facilitate sweat evaporation and heat dissipation;
- Avoid vigorous exercise and prolonged activities like hiking or trekking as heat, sweating and exhaustion can place additional demands on the physique;

- Perform outdoor activities in the morning or the late afternoon, if possible;
- For indoor activities, open all windows, use a fan or use air-conditioning to maintain good ventilation;
- Do not stay inside a parked vehicle; and
- Reschedule work to cooler times of the day if feasible. If working in a hot environment is inevitable, introduce shade in the workplace where practicable. Start work slowly and pick up the pace gradually. Move to a cool area for rest at regular intervals to allow the body to recuperate.

â€‹The public should also note the latest and the forecast Ultraviolet (UV) Index released by the Hong Kong Observatory (HKO). When the UV Index is high (6 or above):

- Minimise direct exposure of the skin and the eyes to sunlight;
- Wear long-sleeved and loose-fitting clothes;
- Wear a wide-brimmed hat or use an umbrella;
- Seek a shaded area or put on UV-blocking sunglasses;
- Apply a broad-spectrum sunscreen lotion with a minimum sun protection factor (SPF) of 15, preferably higher. Reapply every two hours if you stay out in the sun, and after swimming, sweating or towelling off; and
- While using DEET-containing insect repellents for personal protection against mosquito-borne diseases, apply sunscreen first, then insect repellent.

â€‹If symptoms develop, such as dizziness, headache, nausea, shortness of breath or confusion, rest and seek help immediately, and seek medical advice as soon as possible.

â€‹The public may obtain more information from the DH's Health Education Infoline (2833 0111), [heat stroke](#) page and [UV radiation](#) page; the HKO's Dial-a-Weather (1878 200), latest [weather report and forecast](#), [UV Index](#) and weather information for [hiking and mountaineering](#); and [press releases](#) of the Labour Department on precautions against heat stroke for outdoor workers and their employers when the Very Hot Weather Warning is in force.
