

# Press release: New UK support to boost long-term stability in Somalia

The international community must do more to help the African Union lead the fight against al-Shabaab as Somalia takes on greater responsibility for its own security, Theresa May will say today.

The UK has a strong track record both in supporting the African Union and helping Somalia rebuild its police and military forces after decades of insecurity.

On a visit to a UK-backed Counter-IED training centre in Nairobi the Prime Minister will see British troops helping prepare soldiers from Kenya and the region to deploy as part of the African Union Mission to Somalia (AMISOM).

British instructors and their Kenyan counterparts are training troops in the tactics and techniques needed to identify and destroy the home-made bombs which are increasingly the weapon of choice for terrorists in the region.

Announcing over £7 million of new UK funding to support the AU's peacekeeping mission in Somalia, she will call on international donors to contribute more, setting out that an unstable Somalia has a knock-on effect on stability across the region and further afield.

Prime Minister Theresa May said:

Somalia is at a critical juncture and sustainable, predictable funding and support for the troops who are building stability in the region is vital to support a transition to Somali-led security, when the conditions for a handover are right.

Last year the UK contributed £385 million towards international efforts to help the Somali people build an increasingly secure, stable and prosperous country.

The Prime Minister hosted the London Somalia Conference in 2017 which agreed the international community's new partnership with the Federal Government of Somalia.

While in Kenya, she will announce further funding to support Somalia in a range of areas, including:

- more than £60 million to help over a million people cope with and recover from the impact of conflict and drought. Lifesaving food, clean water and medicine, along with support to find stable jobs, will help Somalis to look after themselves and their families in the long-term, reducing their dependence on humanitarian aid
- more than £25 million to support Somalia as it works to establish a stable and democratic political system. This will include advice to help develop rules on resource and power-sharing, and to prepare for landmark elections, including through support for voter and political party registration

## [News story: LOGNET 18-2: Accelerating Support Innovation 9 October 2018](#)

### **Overview**

LOGNET is the Ministry of Defence's support engagement and future development event for the defence support network. It is designed to improve the understanding of UK defence's support requirements, pursue knowledge of developments in academic and commercial capability, whilst reinforcing partnerships through continued engagement. Its outcome is to assist defence in arguing the case for the UK to maintain a credible, highly capable and value for money support capability.

## **Aim of LOGNET 18-2**

This event will focus members of the defence support network on 'Accelerating Support Innovation' to help defence face emerging threats. The event will enable this by detailing the current innovation focus, exploring new technologies and areas of research, introduce departments from both industry and defence who can assist and help to assist rapid procurement.

## **Event content**

LOGNET 18-2 will be split into 5 themed sessions over 1 day:

- defence's innovation agenda
- the potential of autonomy & robotics
- accelerating logistic innovation
- routes to market
- modernising defence support

## **Capability awareness demonstrations and stands**

During LOGNET there will be the opportunity for companies to demonstrate capabilities through both stands and presentations. Stands will provide small areas to be available during breaks whilst the presentations will allocate time to companies to present to a small military audience in a separate room. These are free and selection will be through considered bids using the following criteria:

- the relevance to logistics within defence
- the relevance to defence logistics CUBE sponsored technologies
- the technology readiness level of the capability
- the genuine level of innovation which the technology displays for the betterment of defence logistics

If you would like to bid for a stand or presentation, please email [DefLog-Strat-CFDMultiuser@mod.gov.uk](mailto:DefLog-Strat-CFDMultiuser@mod.gov.uk) to receive an application proforma.

Applications must be submitted by 10 September 2018 and those selected will be informed by no later than 17 September 2018.

## **Confirmed speakers**

The event will be opened by the Minister for Defence Procurement, Stuart Andrew MP and closed by the Vice Chief of the Defence Staff, General Sir Gordon Messenger KCB, DSO & Bar, OBE, ADC.

## **Benefits of attending LOGNET**

- understand defence's support requirements to propose superior solutions
- opportunity to influence defence support policy, direction and development

- engage with the future vision of defence support capability and industry integration
- opportunity to conduct business with defence partners
- maintain the equitable relationship between defence and the logistics and engineering enterprise
- opportunity for attendees to forward questions, points and comments directly via an interactive conference software app

## Administration

Lunch and refreshments will be provided and parking at the hotel is free. Accommodation can be booked [here](#) at a discounted rate for LOGNET delegates. Other hotels can be found through price comparison websites.

## Attendance

If your organisation is connected to the logistics and engineering support sector and you would like to engage with the defence logistics community, please feel welcome to sign up and attend [LOGNET 18-2](#).

## [Speech: Prime Minister's press statement in Nairobi: 30 August 2018](#)

*Updated:* Added image for context.

Thank you, Mr President, for hosting me today, and for your very warm welcome to Nairobi.

I'm delighted to be paying my first visit to Kenya – and indeed the first by a British Prime Minister for 30 years.

Like the many thousands of British tourists who come here every year, I will take away unforgettable memories of this country's vibrancy and its beauty.

Kenya holds a special place in the hearts of the British people and our countries share, as you have said, a long history that has left us deeply connected to one another.

Indeed, it was here that our monarch learned she would become Queen.

But the relationship we hold is about much more than those deep historical ties.

And today we have looked to the future and to a renewed partnership that will unlock the incredible potential of the next generation to benefit both our countries.

And we have agreed to build on the strong foundations of our relationship as we step up our cooperation to secure the prosperity and security that our people need and deserve.

We discussed today how the UK can work with you as you take forward your Big 4 agenda to transform Kenya – aligning our expertise, our investment and our aid behind that vision.

The UK is already the largest foreign investor in Kenya and I have set out this week our ambition to be the G7's number one investor in Africa by 2022.

So as Britain prepares to leave the European Union we are committed to a smooth transition that ensures continuity in our trading relationship with Kenya, ensuring Kenya retains its duty-free, quota-free access to the UK market. And to building on our strong trade and investment ties to create even more opportunities for our businesses and for our consumers.

Mr President, yours is a country of huge opportunity, in a continent of dynamic young people who have the potential to play a transformative role in driving Africa's growth in the years ahead.

Together we will make sure the next generation of energetic, ambitious Kenyans can get good, well-paid jobs so they can contribute to Kenya's long-term prosperity. That's not just good for Kenya, it's good for the UK too.

And we'll work with you and with governments across Africa to make sure your young people have the skills that businesses on the continent need to drive economic growth.

This is a partnership for opportunity but it's also a partnership for our shared security and stability.

And today we discussed the work we're doing together to make both our countries – and the world – more secure. Already, British terrorists and child abusers are in UK jails because of our cooperation.

This afternoon we have signed a new compact that will see us expand our joint work on security even further.

The UK is no longer just training our own military in Kenya, but training with Kenyans to promote stability in East Africa and beyond and to build the continent's capacity to overcome its own challenges and deliver its own security.

Later today I will see our militaries training together in the techniques to identify and destroy improvised explosive devices.

The UK continues to support the commitment of the brave Kenyan soldiers fighting in Somalia against Al Shabaab. And I will announce a new package of funding to support the African Union mission in Somalia.

Mr President, I was glad to hear you call for a transition from peacekeepers to stronger Somali security forces. This is what the UK wants too, and as we work towards this we are leading international efforts to ensure AMISOM has the funding it needs to support its vital battle against terror.

We also spoke about the pernicious effects of corruption in Kenya. And I welcome the commitment you have made to drive this vice from your country, and we stand with you in this fight.

And today, as you've said, we signed an agreement to ensure that any proceeds of corruption in Kenya that end up in the UK will be given back to the Kenyan people and spent for their benefit.

I also welcome, Mr President, your commitment to political reconciliation in this country. The UK stands ready to support an inclusive Building Bridges process as you work to further strengthen your democracy and your institutions.

Mr President, as I conclude my visit this week to some of the UK's most important African partners I have reflected on the role my country can play in partnership with this vibrant continent in the future.

As I have said this week, I want to ensure that the UK's relationship with Kenya and with Africa is more and more about private investment, about doing business and making the most of commercial opportunities together.

Here, as elsewhere in the continent, we are using our aid and our investment partnerships to lift countries out of poverty, spread stability, and create jobs and prosperity for the future.

The UK and Kenya are two strong, diverse countries. We are partners in the Commonwealth, and global hubs – open to the world.

We thrive because of the entrepreneurship and innovation of our people, the strength of our democracies and our shared values.

Our cooperation today makes our people safer, more prosperous and more secure – here in Kenya, and in the UK.

Mr President, I will leave Nairobi excited by the huge opportunities of Kenya and of this continent. And I look forward to working with you in the years ahead for the benefit of both our countries.

---

# [Open consultation: Contracts for Difference \(CfD\): proposed amendments to the contract](#)

The government [consulted on proposed changes to the Contracts for Difference \(CfD\) scheme](#) in December 2017, and has published its response.

We're now seeking further views on how decisions on matters covered in that consultation will be implemented into the CfD scheme. We invite comments on the revised drafts of the CfD Standard Terms and Conditions and the CfD generic Agreement published alongside this document: the proposed amendments are shown as tracked changes in these documents.

We also welcome views on a small number of new proposals addressing associated issues that emerged during the original consultation, and on proposed minor and technical contract changes to ensure that the contract terms remain effective. These include:

- the way in which reference price forecasts are used during the allocation process
- the treatment of those technologies which are eligible to participate in the CfD scheme regardless of whether they deploy with Combined Heat and Power (CHP) (i.e. the 'optional CHP' technologies, currently advanced conversion technologies, anaerobic digestion and geothermal)
- Issue 7 of the CHP Quality Assurance (CHPQA) Standard and Guidance Note 44 giving effect to new increased efficiency requirements for CHP projects. New versions of both these documents are available on this page, with changes marked
- Brexit-related changes to ensure that the CfD contract functions effectively after the UK has left the European Union
- a series of proposed minor and technical changes to ensure that the contract terms remain effective

---

## [News story: Minister hails world-class Wales' role in defence industry](#)

Defence invests £945 million in Welsh industry, supporting more than 6,000 jobs. The Minister visited leading firms benefiting from defence work such as Defence Electronics and Components Agency (DECA), Kent Periscopes, Qioptiq and Raytheon, which are all supporting essential equipment to the UK's Armed Forces.

The crucial relationship between the MOD and Welsh industry was clearly laid out in the recent publication of an [independent review published by former Defence Minister Philip Dunne](#), and has now been showcased to the former Wales Office Minister on his return to the nation in his new role.

Defence Minister Stuart Andrew said:

Wales is crucial to our world-leading defence industry, our Armed Forces and their future capabilities. The hundreds of millions of pounds we are investing in Welsh firms means the nation can continue making a massive contribution to our safety in the face of intensifying threats across the globe.

The 6,000 workers in Wales' defence sector can be extremely proud that their entrepreneurship, innovation and skills are ensuring our brave servicemen and women are equipped with the latest equipment and systems so they can protect us at home and around the world.

The Minister's tour of Welsh firms began at DECA Sealand, which will be at the forefront of maintaining the UK's new supersonic F-35 Lightning Force fighter jets.

The Sealand site will become a global repair hub for the aircraft, providing maintenance, repair, overhaul and upgrade services for F-35 avionics, electronic and electrical components, fuel, mechanical and hydraulic systems. The fighter jet work will sustain thousands of jobs and pump hundreds of millions of pounds into the local economy.

Whilst at the site, the Minister announced that the F-35B Lightning has carried out its first trials armed with UK-built weapons out in the US.

The minister also visited Raytheon, where he had the chance to see the cutting-edge capabilities for the British aerospace and defence sectors. The company's technology is used in some of the most advanced aircraft surveillance and intelligence systems in existence.

This includes the Sentinel, which is one of the UK's most advanced manned surveillance aircraft, and the closely guarded Shadow special mission aircraft. The Defence Minister's visit coincided with the company celebrating 10 years of Sentinel and more than 30,000 operational hours.

Minister for Defence Procurement Stuart Andrew

Defence Minister Stuart Andrew added:

The Sentinel has proved its enormous worth time and time again, from tracking terrorists in Syria and Iraq, to helping provide overseas aid and even mapping flooding here in the UK.

The fact it has now been on operations for over 30,000 hours not

only demonstrates how the RAF are working around the clock to put it to use on behalf of the country, but is a testament to its home here in North Wales.

The workers here in Broughton should be extremely proud of the fantastic work they are doing to ensure this 'eye-in-the-sky' continues to collect the crucial intelligence our Armed Forces need to keep us safe.

The Sentinel programme has supported more than 200 suppliers across the country, while Raytheon has supported 450 jobs through the supply chain.

On the second day of his tour, the Minister was also given an insight into the important work being done by Kent Periscopes. The company provides the British Army with crucial periscopes for armoured personnel carriers, infantry fighting vehicles and tanks.

The minister's final stop involved a visit to Qioptiq, a company that specialises in optics and photonics and provides crucial night vision equipment to UK Armed Forces. Qioptiq's cutting-edge work supports more than 500 jobs in north Wales.

**ENDS**

Notes to Editors

- The Ministry of Defence spent £945 million with Welsh businesses in 2016/17, equivalent to £300 per person per year. This supports over 6,000 industry jobs Wales provides over 3,000 regulars and reserves to the Armed Forces
- Wales is renowned for its vast training areas for the Army and RAF
- Since the 2015 SDSR we have announced new contracts with industry in Wales supporting operations at RAF Valley, maintaining F35 components at the Defence Electronics and Components Agency, developing a new battlefield communication system in Oakdale, building AJAX vehicles in Merthyr Tydfil and more. Alongside the many SMEs in Wales that equip and support our Armed Forces, these are a testament to the skills of the workforce in Wales.
