

Press release: MOD confirms the death of Corporal Jonathan Bayliss, Royal Air Force Aerobatic Team (The Red Arrows)

Corporal Bayliss was killed when the Hawk T1 aircraft he was flying in crashed at RAF Valley at approximately 1330hrs on Tuesday 20 March 2018.

A Police investigation and a full Service Inquiry into the crash has been initiated. It would be inappropriate to speculate on the causes of the incident at this time.

Sergeant Will Allen, a close colleague of Corporal Jon Bayliss and the leader of the Red Arrows' group of travelling support engineers, known as the Circus, for 2018 said:

Jon had the ability to motivate and inspire a team and those around him – no matter the rank, role or person. He was so proud to have been chosen to join the Circus team for 2018 and, in being one of the small group of engineers whose job it was to fly in a Red Arrows jet, had fulfilled a schoolboy dream.

Jon had a big a presence on the Squadron and with his wide beaming smile, and dry humour, could lighten up any dull moment or lift spirits when needed. Both inside and outside of work, he was a generous, kind and caring man who could also always be relied upon.

Having worked with Jon both at the Red Arrows and elsewhere in the Royal Air Force, I know how tirelessly he approached each task and was, what many would describe, a genuine grafter.

Squadron Leader Richard Bland, Senior Engineering Officer of the Royal Air Force Aerobatic Team, the Red Arrows, said:

Everyone on the team has a great story about Jon and, without exception, he was known as a top bloke with an infectious smile, cheeky grin and possessing a dry sense of humour that had the ability to fill a room with laughter. At the same time, Jon was the ultimate professional and embodiment of excellence. As the leader of a team responsible for replenishing the jet's dye systems last year, he led exceptionally well, looking after his team mates selflessly and was a true inspiration.

We have been touched by the messages of condolence received from the wider Air Force, from people who knew Jon across ranks and

trades and it is clear people loved him. As a skilled leader, ambassador for the Royal Air Force and knowledgeable technician, Jon had all of the attributes and qualities that define the Red Arrows.

Wing Commander Andrew Keith, Officer Commanding, Royal Air Force Aerobatic Team, the Red Arrows said:

The thoughts of each and every member of the Red Arrows team are with Corporal Jonathan Bayliss' family and friends. He was a dedicated, skilled and experienced Royal Air Force engineer who we will miss deeply. As a highly-trained technician, Corporal Bayliss made a huge contribution to ensuring the Red Arrows' aircraft were able to carry out displays and flypasts to millions of people across the globe and I know how proud he was to be part of that team effort.

Corporal Bayliss was a popular colleague and someone whom others looked up to, being able to draw inspiration from his knowledge and strength of character. The Red Arrows family is a close one – the Squadron is a small team who live and work side-by-side and the overwhelming number of condolence messages, received from around the world, have been enormously comforting to us all and we are very grateful for that.

Air Vice-Marshal Warren James CBE, Air Officer Commanding (AOC) 22 Group – of which the Royal Air Force Aerobatic Team is part of – said:

Our heartfelt condolences go to Corporal Jonathan Bayliss' partner and family at what is a terrible, tragic time. His death has understandably come as a great shock to his colleagues and fellow team mates at the Red Arrows. The incident is a reminder of the risk present with all types of flying but also of the hard work and commitment shared by both air and ground crews alike.

All of our thoughts are now with Corporal Bayliss' family, friends and his colleagues as they try to come to terms with his loss and investigations take place into establishing what happened.

Defence Secretary Gavin Williamson said:

It is with deep sadness that I heard of the death of Corporal Jonathan Bayliss whilst flying with the Red Arrows on Anglesey. It's clear from his colleagues that he was an incredibly skilled engineer and held in the highest regard as a teammate, a friend, and a shining example of what the British Armed Forces stand for. Our thoughts and prayers are with his family and loved ones at this

terrible time.

Corporal Jonathan Bayliss, 41, was an Aircraft Technician (Mechanic) with the Royal Air Force Aerobatic Team.

He was born in Dartford, Kent and grew up in Hartley. He attended Axton Chase School in Longfield and studied at West Kent College before going on to complete a HND in engineering management at the University of Greenwich.

Before joining the Royal Air Force in 2001, he worked at Brands Hatch motor racing circuit.

Prior to becoming a member of the Red Arrows team in January 2016, Corporal Bayliss' Royal Air Force career involved working on squadrons at RAF Coltishall and RAF Coningsby as well as on overseas deployments.

As a mechanical engineer with the Red Arrows, he had supported successful tours to the Far East, including China, as well as the Middle East and mainland Europe.

In 2017 he was a leader of the Red Arrows' dye team, helping to replenish the jets' famous smoke systems wherever they landed.

For 2018, he had been selected to be one of the Circus team – the small group of highly-trained engineers who travel with the aircraft and provide technical support to the Red Arrows when the aircraft operate away from their home base.

Corporal Jonathan Bayliss

[News story: UK Hydrographic Office welcomes publication of UK Government 'Future of the Sea' Report](#)

Bathymetric data captured of Anguilla as part of the Overseas Territories Seabed Mapping Programme

The UK Hydrographic Office (UKHO) has welcomed the publication of the UK Government's Foresight 'Future of the Sea' report, which outlines a number of recommendations to help the UK utilise its current expertise and technological strengths to foster trade links, build marine capacity across the world and collaborate to tackle climate change.

Among these strengths, the report recognises the UK as a global leader in

hydrography and highlights the UKHO's expertise in collecting and processing hydrographic and marine geospatial data. Employing over 120 software engineers, solutions architects and data scientists, they manage a wide range of data sets for a variety of maritime applications, specialising in bathymetry, cartography, marine data science, law of the sea and more. All support the vision that science and innovation – and, in particular, marine geospatial data – can help the UK strengthen its position as a leading maritime nation in the 21st Century.

The report also recognises that the sea plays a particularly significant role in the lives of UK Overseas Territories, including their dependence on fisheries for food security and economic growth and their exposure to marine climate change. Alongside its partners, the UKHO is working to build marine capacity in many of these countries through its Overseas Territories Seabed Mapping Programme, to help them to better manage their marine resources. By completing seabed mapping in the waters of Anguilla, the British Virgin Islands, the Cayman Islands and Montserrat, this work will also support safer navigation to enable trade and cruise tourism, which in turn will bring significant economic benefits.

Samuel Gillchrest, UKHO Government Relations Lead, commented:

“The GO-Science report on the Future of the Seas sets out an exciting agenda that identifies the opportunities that are available through the responsible exploration, protection and sustainable development of our oceans. We certainly welcome the recommendations of the report and we share its ambitions.

“It is also an important moment for the UKHO. The report recognises the UKHO's world leading expertise and highlights the importance of seabed mapping. This recognition by GO-Science will help us to raise the profile of our work and support us in our aim of becoming a world-leading marine geospatial information agency and hydrographic office.”

[Corporate report: Socio-economic spend report 2016 to 2017](#)

The Nuclear Decommissioning Authority's decommissioning agenda offers both challenges and opportunities for the communities in which we operate.

Our nuclear sites are in remote areas, so they're usually the major local employer. They offer high wages and job security and the community relies on them quite heavily.

But as our decommissioning moves forward, the impacts are likely to become significant.

The government recognised this and gave the NDA a socio-economic role in the Energy Act 2004.

That role is a responsibility to:

- consider the socio-economic impact of our work
- support local economic development agencies in minimising those impacts

The NDA's role in socio-economics is a supporting one, we support local economic development agencies in minimising the impact of our decommissioning work. That means we can maintain positive relations with the local communities while progressing with decommissioning work.

[Press release: Labour market statistics for Scotland](#)

Commenting on today's labour market statistics for Scotland, Scottish Secretary David Mundell said:

It is encouraging that Scotland's unemployment rate has fallen over the year. However, the most recent quarterly snapshot shows an increase of people in Scotland out of work and I urge the Scottish Government to use its considerable powers to strengthen the economy and help create the right conditions for sustained long term employment.

Further information:

- Employment in Scotland decreased by 8,000 over the previous quarter (August-October 2017) and increased by 35,000 over the year to stand at 2,644,000.
- The Scottish employment rate decreased by 0.2 percentage points over the quarter to stand at 74.8%. The rate is below the UK average of 75.3%.
- Unemployment in Scotland increased by 5,000 over the quarter and is down 9,000 over the year. The level now stands at 118,000.
- At 4.3%, the Scots unemployment rate is now in line with that for the UK as a whole (also at 4.3%).
- Economic Activity levels marginally decreased by 4,000 over the quarter and now stands at 2,763,000. The Economic Activity rate is stable over the quarter (0.0 p.p. change) to stand at 78.1%.

Speech: Democracy Launch Event speech

Welcome

Thank you Minister Atkins for those inspiring words. As you have said so clearly, this year is a tremendous opportunity to reflect on how far our democracy has come and the people who made that happen.

Lessons of the Equal Suffrage campaign

Looking back I am struck by the energy and determination of the women and their allies who fought for equal suffrage. They pressed on with their campaign, often in the face of fierce opposition and ridicule, because theirs was a struggle for justice. Their commitment re-shaped our democracy.

Democratic Progress

Since 1918 we have seen our democracy transformed. By 1928 women had finally achieved equal suffrage and the franchise was broadened, with property owning restrictions stripped away.

Fast forward a century and the General Election in 2017 saw the largest ever electoral register, standing at 46.9 million.

The modernisation of our electoral system, including the introduction of individual electoral registration and the launch of the online digital service, has made it easier than ever to make an application to register to vote. 75% of applications are now made online, but for young people this is closer to 100%.

Future Challenges

As Minister for the Constitution I am aware of how much has been achieved but also of the distance still to travel. I want to open up, protect and improve our democracy.

National Democracy Week

So, in this Suffrage Centenary year, our inaugural National Democracy Week will kick off on Monday 2 July through to 8 July 2018, the 90th anniversary of the 1928 Equal Franchise Act which gave women the same voting rights as men.

National Democracy Week is being delivered in collaboration with NDW Council members, Cabinet Office and our combined extended networks. National Democracy Week is an opportunity to use all of our experience, insight and

passion to increase democratic participation. We believe that regardless of who we are or where we are from, we must work together to ensure that every member of society has an equal chance to participate in our democracy and to have their say.

Together we will deliver a range of democratic engagement activities in the lead up to and during the week.

Our aim will be to get results. To increase understanding of how to take part in decision making, and also to grow those who say they are more likely to participate. I want to do this across the whole UK.

I would like to thank the National Democracy Week Council for their time and commitment so far. They have been working with Cabinet Office to produce our new branding, which you can see around the room today and features real people our Council works with every day.

Parliamentarian Pack Launch

Parliamentarians are at the forefront of our democracy, the embodiment of the principle of representation and a vital connection between people and parliament. In recognition of this unique role, I am delighted to launch this new toolkit to support the crucial work that you do to promote our democracy amongst young people.

Many of you will have been inspired at an early age to explore how you make your voice heard on issues that are important to you. For many, their first awareness of politics and how decisions are made comes from contact with their local representative, in schools, youth clubs and other extracurricular activities.

It is a prime opportunity for engagement which can have a lasting effect on our young citizens' understanding of our electoral system and how it works for them. I ask you to join me in making use of this new resource throughout the year designed to make your interactions with young people effective and powerful.

Awards – Nominations Open

The National Democracy Week Council have also helped determine the categories for the National Democracy Week awards, which I am very excited to announce today.

We know that individuals and organisations across the UK are working tirelessly to engage people in our democracy. Their work, particularly with under represented groups, has the potential to help people understand their democratic rights and make their voices heard. This service is not always recognised, but as part of this summer's festival of democracy, I want to acknowledge the great contributions that so many have made.

The categories, as determined by the National Democracy Week Council, are:

- Young Advocate of the Year Award
- Diversity Champion of the Year Award
- Changemaker of the Year Award and
- Collaboration of the Year Award

So please, if you know of a young person who champions democracy, someone who is committed to ensuring diversity, if you have been blown away by the change that an individual, project or organisation has driven, or there is a partnership you feel breaks new ground, make sure you nominate them through our new National Democracy Week website www.gov.uk/nationaldemocracyweek. Nominations will close 5pm Sunday 27 May and we will hold an Award ceremony during National Democracy Week.

Our democracy should be as inclusive as possible – let's celebrate those who are rising to this challenge. Let us also each commit to do our bit to engage others, during National Democracy Week and beyond. I am delighted to introduce my colleague, Andrea Leadsom MP, Leader of the House of Commons, who will talk further about the Parliamentary Pack and how it can help with that task.
