

## [Press release: Foreign Secretary welcomes new UN Special Envoy for Yemen](#)

I welcome the appointment of Martin Griffiths to the role of UN Special Envoy for Yemen. Mr Griffiths brings a wealth of experience from several high profile UN positions in the region, and is a leading expert on international mediation and conflict resolution.

I would like to thank Ismail Ould Cheikh Ahmed for his dedication in the role of UN Special Envoy since April 2015, working to facilitate a credible peace process in Yemen.

The UK is at the forefront of international efforts to help bring to Yemen the peace, stability and security that all Yemenis deserve. This can only be reached through an inclusive political settlement. Mr Griffiths and his team will be central to achieving progress and I call upon all parties to engage with the UN process in good faith.

The UK strongly supports the work of the UN in Yemen. We support the efforts to reboot a UN peace process as a matter of urgency. By the end of the financial year 2017/18, we will have provided £1.68 million to the UN Special Envoy's office to bolster the UN's capacity to facilitate the peace process.

## [News story: Radioactive Waste Management establishes Advisory Council](#)

The Advisory Council will provide expertise, balanced perspective and strategic direction to support RWM as it moves into a significant phase of its programme to deliver a Geological Disposal Facility (GDF), a nationally significant infrastructure project.

Its members include experienced leaders in business, engineering, infrastructure and society who will collectively provide vital input to one of the most complex and important long-term projects ever undertaken in the UK.

Bruce McKirdy, RWM's Managing Director, commented:

I'm delighted that we can draw upon such a wealth of talent and experience to help us to establish a safe and long-term solution to dispose of our radioactive waste. I'm looking forward to working with the Advisory Council and harnessing their insights as we deliver geological disposal for the UK.

Lorraine Baldry OBE, Advisory Council Chair commented:

I am very pleased at the opportunity to bring together the outstanding skills and experience of the Council in order to help deliver what might be one of the most important environmental and societal projects ever undertaken in the UK.

### **Panel members' short biographies:**

Lorraine Baldry OBE (Chair) has experience in a wide range of industries including technology, broadcasting, distribution, healthcare, water, real estate and financial services. She has held a number of Board-level positions and is currently Chairman of London and Continental Railways, Schroder Real Estate Investment Trust, Inventa Partners, and Hydroxyl Technologies.

Norman Harrison (Deputy Chair) has held a number of senior roles in the UK nuclear industry including CEO of the UK Atomic Energy Authority (UKAEA) and when with British Energy, Station Director at Heysham and Sizewell B nuclear power stations. He currently has a portfolio of non-executive and advisory appointments including the UKAEA (Fusion programme) and is Deputy Chair of the Board of Governors at Manchester Metropolitan University.

Sonia Davidson-Grant is an experienced Director, Non-Executive Director and Board Member of private and public sector organisations, an international researcher and a strategic advisor to governments in the UK and the Middle East.

Dai Hudd has spent his career as a trade union official. He is currently Deputy General Secretary of the Prospect trade union and also holds lead policy responsibility for the energy services industry.

John Markham OBE had a distinguished career in the chemical industry, holding a range of executive management positions, before moving into regeneration where he has held a number of senior roles in the public and private sectors.

Dr Mike Naylor has had a long career in the oil and gas industry, rising through Shell to become Vice President Technical, Global Exploration. He has wide-ranging experience in developing technical standards, processes and execution of major capital projects and brings a deep expertise and understanding of sub-surface evaluation and risk assessment.

Michael Prescott is an experienced communications professional with a proven track record of building and motivating teams to award-winning standard, and managing in high-pressure environments. His previous employment includes

roles as Director of Corporate Affairs at British Telecom, Managing Director Corporate Comms and Public Affairs at Weber Shandwick, and Political Editor at The Sunday Times. Michael is a Trustee of Bloodwise and a former member of the Government Communications Board.

Howard Shiplee CBE is a recognised construction industry professional with extensive experience in the delivery of high value infrastructure projects, including as Project Director Hong Kong International Airport Terminal and as Director of Construction for the Olympic Delivery Authority.

Morag Stuart has held various senior roles working in the defence and aerospace industries and is currently Director of Commercial Improvement at Defence Equipment and Support, part of the Ministry of Defence. Morag also sits on a Procurement Advisory panel for HS2 Ltd.

Eugenie Turton CB is a former senior government servant who now works as a Non-Executive Director in the private and charitable sectors. Previously Eugenie was Director General for Housing and Planning, responsible for the government's public service improvement programme, and creation of London's new mayoral government.

Robert Upton CBE has held positions as Director of Planning in Hong Kong, Chief Executive of Rushmoor Borough Council, Secretary General of the Royal Town Planning Institute, Deputy Chair of the Infrastructure Planning Commission and subsequently Senior Examining Inspector for major infrastructure at the Planning Inspectorate.

## [Transparency data: Ilfracombe Harbour Revision Order](#)

*Updated:* Supporting text and documentation added

On 24 May 2018, the North Devon District Council made a formal application to the Marine Management Organisation (MMO) under section 14 of the Harbours Act 1964 for a Harbour Revision Order to construct and maintain a new harbour wall in Larkstone Cove and a slipway from the new watersports centre in The Strand which will extend into the bed and foreshore of Ilfracombe Harbour.

The application is undergoing a 42 day public consultation, starting on 30 May 2018. The deadline for submitting comments is 11 July 2018. For further information on the consultation process, please review the public notice.

If you would like to make a representation please do so in writing via the [harbourorders@marinemanagement.org.uk](mailto:harbourorders@marinemanagement.org.uk) inbox. Representations should quote reference DC10164.

The applicant previously notified the Marine Management Organisation in accordance with paragraph 3 of Schedule 3 of the Harbours Act 1964 of their

intention to submit a HRO. The proposed order would authorise the construction or alteration of a project which falls within Annex II to Council Directive 85/337/EEC on the assessment of the effects of certain public and private projects on the environment (as amended by Council Directive 97/11/EC) but is not considered a relevant project. Accordingly, the Directive does not apply to the proposals and no environmental statement has been supplied.

## [News story: First female chief appointed to Royal Mint in its one thousand year history](#)

The Royal Mint today appointed Anne Jessopp as its new chief executive and Deputy Master of the Mint. She will lead work to provide Britain with its cutting-edge secure currency and will also develop the commemorative coin and bullion arm of the business.

On a visit to the Royal Mint, the Exchequer Secretary officially confirmed Anne Jessopp's appointment – the first female to take up the role in the Royal Mint's 1,100 year history.

Speaking of her new appointment, the Deputy Master of the Mint, Anne Jessopp said:

I am delighted to be appointed to lead this unique and important British organisation. The Royal Mint has an impressive history of over 1,100 years and its longevity is due to its ability to adapt as society changes. This was never truer than today, as we reinterpret The Royal Mint for the 21st century, building on the values that have been at the heart of the organisation throughout our history – authenticity, security, precious metals, craftsmanship and design.

I have had the privilege to work for The Royal Mint for almost 10 years and it is testament to the great colleagues and opportunities I have had, that I have been able to develop the skills that enable me to take on this role.

The Exchequer to the Secretary to the Treasury, Robert Jenrick welcomed the appointment and said:

Anne Jessopp brings a wealth of expertise to this role. With her decade of experience at the Royal Mint, I am confident she will ensure the UK continues to have the most secure currency in the world, and our coins are loved and collected the world over.

It may have taken over 1,000 years but the Mint is now finally led by a woman, and I am certain Anne will do a great job.

## **What does the Deputy Master of the Mint do?**

As chief executive of the Royal Mint, Anne will be tasked with running the Great British institution which produces up to 90 million coins every week. At the top of her in-tray will be overseeing the introduction of the new 50 pence coin, announced last week, to mark the centenary celebrations of women's suffrage.

Her official position as Deputy Master of the Mint is one that is steeped in history. Her first ceremonial role will be to lead the annual Trial of the Pyx.

First held in 1282, the Trial of the Pyx tests the integrity of the nation's coins, ensuring that they are the proper weight and size, and contain the right amount of precious metals. Every February, coins of each denomination struck by the Royal Mint are selected at random and locked away in the Pyx chests.

In a ceremony, which has not changed since before Henry VIII's reign, the Deputy Master of the Mint brings these chests to London's Goldsmiths' Hall, where the coins are checked by an independent jury. The Jury consists of leaders from the financial world and six assayers from the Worshipful Company of Goldsmiths who, wearing traditional red robes, put the coins to the test.

After two months of rigorous testing, the trial reconvenes and the Queen's Remembrancer asks the Jury for its verdict. In May, this verdict will be given in the presence of the Deputy Master of The Royal Mint and the Chancellor of the Exchequer (or a representative).

Remarkably, the history books reveal that if the coins fail the test, the Chancellor of the Exchequer, who is the ceremonial Master of the Mint, risks losing a hand as punishment.

It should be made clear that in the trial's long history, 94 Minters have had their right hands cut off by order of the King. However, this has not happened for hundreds of years.

### **Notes to editors:**

- One of the most famous Masters of the Mint, before it was made a political position was Sir Isaac Newton, who had previously held the position between 1700-27.
