

Press release: Oxford flood scheme moves a step closer

The £120m Oxford flood alleviation scheme, which will reduce flood risk to homes, businesses, and transport in Oxford and the surrounding area, has moved a step closer.

The Oxford flood alleviation scheme partnership has just announced that it has secured the funding for the scheme, which will include at least 5 hectares of new habitat creation, 7 new bridges and 2.6 kilometres of new flood defences.

More than £65m in funding has already been committed by Government. A record amount of partnership funding totalling over £55m has now been given by a wide range of partners. Investment has been secured from Oxfordshire Local Enterprise Partnership, Thames Regional Flood and Coastal Committee, Oxfordshire County Council, Oxford City Council, Thames Water Utilities and the University of Oxford.

Joanna Larmour, Project Director at the Environment Agency, said:

This is a huge scheme – one of the biggest the Environment Agency is working on – and when complete it will not only reduce flood risk to homes across Oxford but it will also protect vital infrastructure, enabling the city to keep moving during flooding. It will also benefit communities and wildlife in a number of ways, including improving existing public footpaths and creating new habitat for wildlife and improving biodiversity.

Today's fantastic news shows that working in partnership can help us get the best scheme for Oxford. We are very pleased that our partners have recognised the multiple benefits it will bring and helped us secure the funding required to progress the scheme to the next stage.

The scheme will benefit everyone who lives, works in or visits Oxford. As well as reduced property flooding, the railway and Botley and Abingdon roads will be protected keeping the city open for business during future flooding. There will also be fewer flood related electricity, telephone and internet disruptions. The scheme will allow

Oxford's successful economy to continue to thrive and also provide environmental benefits and a longterm green legacy.

County Councillor Yvonne Constance said:

The flood relief channel has been a hope for many people for a long

time. Now we are at the stage where it has the funding it needs to be made into a reality there will be thousands of homes and businesses protected from the devastating effects of flooding.

Clearly there is still much work to do, but this funding announcement means we can continue to work in partnership to move forward to the next stage.

Councillor Susan Brown, Leader of Oxford City Council, said:

The Oxford Flood Alleviation Scheme will bring huge benefits to householders in West and South Oxford, and to all parts of the business community. I am delighted that we have been successful in our application for this final tranche of funding.

HM Treasury approved the outline business case for the scheme in November 2017. This detailed that full funding for the scheme had to be committed before it could move to the next stage. This has now been confirmed, thanks to increases in contributions from the scheme partners.

The total amount covers the design and construction costs to deliver the scheme. The project team will now work on the Full Business Case, which will be submitted to HM Treasury later this year. Partners will continue to work together on ongoing negotiations with external companies for future investment in the scheme.

The Environment Agency will submit the planning application for the Oxford flood alleviation scheme in March. It will take approximately 3 years to build the scheme, which is designed to work with the natural floodplain west of Oxford.

Press release: Knighthood and Damehoods conferred: February 2018

The Queen has been pleased to approve that the honour of Knighthood be conferred upon Timothy Miles Fancourt, QC and that the honour of Damehood be conferred upon Christina Caroline Lambert, QC, on their appointment as Justices of the High Court.

Notes for editors

Timothy Miles Fancourt was called to the Bar in 1987 and took Silk in 2003. He was appointed as a Recorder in 2009.

Christina Caroline Lambert was called to the Bar in 1988 and took Silk in 2009.

Press release: Clean Growth top of the agenda for ministerial visit to Teesside

Energy Minister Claire Perry with Tees Valley Mayor Ben Houchen.

The region has the potential to exploit opportunities from future growth industries such as carbon, capture usage and storage (CCUS), district heating and the hydrogen economy.

The UK government has made a firm commitment to regeneration and clean energy production in the Teesside area, with an ambition for 25,000 new jobs and over £1 billion of investment across a 10-year period, and today, the minister spoke about making that a reality.

Energy Minister Claire Perry said:

Today I have seen the exciting opportunities here to regenerate this iconic site, and, crucially, bring skilled jobs and clean growth to the area. I look forward to seeing the development of these proposals to develop and breathe new life into this site.

The government has already invested substantial amounts in the area and the Autumn Budget set out a further £123 million of funding to continue work to secure the site. Today, the minister met Tees Valley Mayor Ben Houchen, the Local Enterprise Partnership, Clean Growth investors, the South Tees Development Company and members of the South Tees Site Company as well as taking a tour of the former steel site at Redcar and Cleveland.

Tees Valley Mayor Ben Houchen said:

Our concentration of industry along the coastline perfectly places the region as the go-to location for green energy proposals such as Carbon Capture and Storage. It is fantastic that government recognises our industrial strengths and has reaffirmed their commitment to developing this transformational proposal. I was delighted to share our ambitious plans with the minister today, and made clear to her that Teesside is ready and waiting to take this forward.

A move to low-carbon, clean energy offers a remarkable economic opportunity for our area and the UK as a whole. Our projects would attract inward investment, create jobs and put Tees Valley at the forefront of the clean energy revolution. Now we need to work constructively with government to push ahead and make these schemes

a reality.

The site is of particular interest in the development of carbon capture usage and storage – which aims to capture carbon dioxide emitted from industry and power plants for permanent storage under the North Sea. This game-changing technology and many more exciting projects were discussed as part of today's visit.

Business Minister Richard Harrington was also in Teesside today setting out his vision through a keynote speech to workers, industry and local MPs at Community Union's Steel Sector Conference. The minister talked about his commitment to steelmaking regions across the UK and the importance of putting the sector at the heart of the UK's Industrial Strategy.

Last year, the government set out its plan for growth and regeneration across the UK with its [Industrial Strategy](#) aiming for an economy that boosts productivity and earning power throughout the UK. A key part of that is growing new jobs, and Teesside has a crucial role to play.

Photos and videos of the visit are available by contacting gillian.capewell@beis.gov.uk.

[Notice: SY7 9LF, G and M Povall and Son: environmental permit application advertisement](#)

The Environment Agency consults the public on certain applications for waste operations, mining waste operations, installations, water discharge and groundwater activities. The arrangements are explained in its [Public Participation Statement](#)

These notices explain:

- what the application is about
- how you can view the application documents
- when you need to comment by

The Environment Agency will decide:

- whether to grant or refuse the application
- what conditions to include in the permit (if granted)
