[Press release: Government protects essential public services as Carillion declares insolvency](#)

Today (15 January 2017) the Rt Hon David Lidington CBE MP Minister for the Cabinet Office and Chancellor for the Duchy of Lancaster announced the government will continue to deliver all public sector services following the insolvency of Carillion PLC.

After meeting with their bankers and lenders, Carillion has announced its decision to initiate insolvency proceedings. The Official Receiver has been appointed by the court as liquidator along with partners at PwC that have been appointed Special Managers.

Government will provide the necessary funding required by the Official Receiver to maintain public services.

Those already receiving their pensions will continue to receive payment. A dedicated web page and helpline have also been set up for workers who may be concerned or have questions about their personal situation.

The Rt Hon David Lidington CBE MP said:

It is regrettable that Carillion has not been able to find suitable financing options with its lenders but taxpayers cannot be expected to bail out a private sector company.

Since profit warnings were first issued in July, the Government has

been closely monitoring the situation and has been in constructive discussion with Carillion while it sought to refinance its business. We remained hopeful that a solution could be found while putting robust contingency plans in place to prepare for every eventuality. It is of course disappointing that Carillion has become insolvent, but our primary responsibility has always been to keep our essential public services running safely.

We understand that some members of the public will be concerned by recent news reports. For clarity – All employees should keep coming to work, you will continue to get paid. Staff that are engaged on public sector contracts still have important work to do.

Since its inception in the 1990s private finance has helped to deliver around £60 billion of much-needed capital investment in infrastructure in the UK across a range of projects and we will continue to maintain partnerships with responsible firms in future.

Further information

1. For media enquiries on government's response to Carillion insolvency contact Cabinet Office Communications: 020 7276 2210/07074 667 000 (out of hours).
2. Carillion held approximately 450 contracts with government, representing 38% of Carillion's 2016 reported revenue. Key central government contracts are held with DfE, DHSC, MoJ, MoD, and DfT. For media enquiries about departmental services contact: DfE: 0207 783 8300/ 020 7783 8300 (out of hours) ; DHSC: 0207 210 3872/ 07050 073 581 (out of hours); MoJ: 020 3334 3536/07659 173 270 (out of hours); DfT: 0207 944 3021/ 020 7944 4292 (out of hours); MoD: 02072187907 (out of hours)
3. Anyone worried about their pension situation can ring The Pension Advisory Service (TPAS) on 0300 123 1047 for free and impartial guidance. TPAS has also set up a special helpline number for members of these pension schemes: 020 7630 2715. [JobCentre Plus](#), through its Rapid Response Service, stands ready to support any employee affected by this announcement.
4. The Official Receiver works for the Insolvency Service, which is an agency of the Department of Business, Energy and Industrial Strategy. He is liquidator of the companies and his job is to realise the assets of the company, deal with creditors' claims, and investigate the cause of failure. The Official Receiver also has a duty to investigate generally the business, dealings, and affairs of the company. In his role as liquidator, the Official Receiver is an officer of the court and is independent from government. The legal and practical consequence of liquidation is that the liquidator takes over the day-to-day control of

the company. In liquidation, the directors will have no continuing role in controlling and managing the company. The liquidator's primary duties are to the creditors and the cost of the liquidation are paid from the company's assets. For media queries about the Insolvency Service call: 020 7596 6187

[News story: Engineering in the spotlight for 2018 as government launches campaign to inspire the next generation](#)

Schoolchildren meeting engineers at an Inspiring the Future event organised by Year of Engineering partner Education and Employers.

A pioneering campaign to transform the way young people see engineering and boost numbers entering the profession has been launched today (15 January 2018).

Ministers from across government are joining forces with engineers, industry experts and hundreds of businesses to change perceptions around engineering – and highlight the scale of opportunity that careers in the industry hold for young people in the UK.

2018 is officially the [Year of Engineering](#) and will see a national drive in all corners of the country to inspire the young people who will shape our future.

Engineering is one of the most productive sectors in the UK, but a shortfall of 20,000 engineering graduates every year is damaging growth. There is also widespread misunderstanding of engineering among young people and their parents and a lack of diversity in the sector – the workforce is 91% male and 94% white.

[Year of Engineering](#)

The new campaign is aimed at filling those gaps and changing misconceptions, and will see government and around 1,000 partners deliver a million inspiring experiences of engineering for young people, parents and teachers.

Activities will include:

- a Siemens See Women roadshow aimed at inspiring women, including more black, Asian and minority ethnic girls, into pursuing STEM careers

- a brand new children's book on engineering from Usborne
- the Science Museum and London Transport Museum will be capturing children's imaginations with interactive exhibitions
- schools will get the chance to go behind the scenes at Airbus to meet engineers working on the Mars Rover
- Thales in the UK will be inspiring inventors of the future with robot clubs in primary schools
- Sir James Dyson, through the Dyson Institute, the James Dyson Foundation and the James Dyson Award, will continue to invest in inspiring young engineers by providing opportunities to apply engineering principles to projects that solve real world problems

Secretary of State for Transport Chris Grayling said:

Engineers – whether they are working on cutting-edge technology in aerospace, energy or artificial intelligence – are vital to the lifeblood of our economy.

We want to show young people and their parents the immense creativity, opportunity and value of the profession. By bringing them face to face with engineering role models and achievements we can send a clear message that engineering careers are a chance for all young people, regardless of gender, ethnicity or social background, to shape the future of this country and have a real impact on the lives of those around them.

Skills Minister, Anne Milton said:

I want to see everyone whatever their background, wherever they live to have a chance to get a rewarding career or job in engineering whether they come via a technical or academic route.

The Year of Engineering gives us a great opportunity to work together with business to inspire a new generation of world class engineers. We want to build the science, technology, engineering and mathematics skills that we need for a growing economy, as highlighted in the government's Industrial Strategy.

Crossrail Chair Sir Terry Morgan said:

The Year of Engineering will be a fantastic opportunity to inspire others to take a fresh look at engineering and show the range of opportunities there are for training and jobs in this sector. We look forward to showcasing the role engineers have played in creating such an amazing project before the Elizabeth line opens to passengers at the end of 2018.

Mark Richardson, Ocado Chief Operating Officer, said:

Encouraging more young people to enter the engineering profession is essential to ensure the growth and development of new technologies and businesses in the UK. At Ocado we build the world's most advanced automated warehouses for online grocery, and we hope our involvement in this campaign will offer young people from diverse backgrounds a real insight into the exciting and rewarding life of an engineer.

All week, engineers, businesses, schools and universities will be marking the launch of the campaign by celebrating the positive impact of engineering. Events include:

- students in Bolton using engineering to tackle real life challenges for people with disabilities with charity Remap
- pupils at a London school taking on a cybersecurity competition
- engineers, STEM ambassadors and schoolchildren will gather for the unveiling of Tim Peake's spacecraft at the National Railway Museum in York
- Ocado in Birmingham will give schoolchildren the chance to see robots in action

[Press release: Prime Minister Theresa May's Thai Pongal message](#)

[Watch the PM's message.](#)

As Thai Pongal begins, Tamil families here in the UK and around the world are coming together to celebrate. It's a time to cast out the old and embrace opportunities to come. A time to give thanks not just for the harvest, but also for friends, family and neighbours.

And it's also a great opportunity for all of us to reflect on the contribution made by Britain's Tamils. Your community punches well above its weight, making a real difference to countless lives right across the country.

I want this to be a country where everyone, regardless of their background, can play their part and achieve their ambitions. Our Tamil community is a fantastic example of what that looks like, helping make Britain the diverse, successful country we are all so proud of.

So to everyone celebrating today and in the days to come, let me wish you all

a happy Thai Pongal, and an auspicious year ahead.
