

[Notice: EX17 5DH, David Pennington, Valarie Pennington and Elsa Dunn: environmental permit application advertisement](#)

The Environment Agency consults the public on certain applications for waste operations, mining waste operations, installations, water discharge and groundwater activities. The arrangements are explained in its [Public Participation Statement](#)

These notices explain:

- what the application is about
- how you can view the application documents
- when you need to comment by

The Environment Agency will decide:

- whether to grant or refuse the application
- what conditions to include in the permit (if granted)

[News story: Civil/crime news: rollout of contract performance reports](#)

What do the reports show?

A wealth of important information about contractual performance is contained in each 'Provider Activity Report' (PAR). Some examples include:

- Defence Solicitor Call Centre acceptance rates
- rejects for claims submitted
- reconciliation statistics for standard and variable monthly payments

Why are you doing this now?

Your PAR is important to how we manage your contract and we want to be transparent about the information we hold.

The idea is to give providers the opportunity to review and monitor changes in performance using the same information that we hold.

You should already be familiar with the content of these reports through

discussions with your contract manager.

We have been piloting the reports with providers in Bristol and London for the last few months and have listened to feedback. This has allowed us to refine the reports and our approach to sharing them.

Outcome of pilot

PARs were sent successfully to around 800 providers during August and September.

Feedback focused on making the reports as easy to use as possible e.g. increasing font size, removing excess pages, and using blanks rather than 0s for example.

We have also worked to:

- improve the guidance that sits alongside PAR
- make sure contract managers are equipped to answer more detailed questions or address concerns at annual visits

Timescales and next steps

All providers will be start receiving quarterly PARs by from January 2018.

Who will you contact?

We plan to email the designated primary contact email address we hold for your office in Contracted Work and Administration (CWA).

How can I check you have the right email address?

You can check the designated primary contact email address we hold for you by going into the CWA system.

There is a user guide on GOV.UK which sets out how to check and amend this information – see below.

Further information

[Press release: Government's vision for](#)

a greener future launched

A pledge to eliminate avoidable waste, introduce new safeguards for wildlife and connect more children with nature are among the ambitious plans for a greener future outlined by Prime Minister Theresa May and Environment Secretary Michael Gove today.

In a major speech today, the Prime Minister has launched the government's landmark 25 Year Environment Plan, setting out how we will improve the environment over a generation by creating richer habitats for wildlife, improving air and water quality and curbing the scourge of plastic in the world's oceans.

["A Green Future: Our 25 Year Plan to Improve the Environment"](#) sets out how over the next quarter of a century the government will:

- Crackdown on plastics by eliminating all avoidable plastic waste through extending the 5p plastic bag charge to small retailers, removing consumer single use plastics from the government estate, supporting the water industry to significantly increase water fountains and working with retailers on introducing plastic-free supermarket aisles.
- Help wildlife thrive by creating 500,000 hectares of new habitat for endangered species, supporting farmers to turn fields into meadows and other habitats, replenishing depleted soils and providing £5.7 million to kick-start a [new Northern Forest](#).
- Be a world leader in environmental protection by investigating the feasibility of an anti-poaching taskforce to tackle the illegal wildlife trade, committing overseas aid to help developing nations combat plastic waste, and extending the UK's network of marine protected areas
- Deliver a Green Brexit by consulting on a [new environmental watchdog](#) to hold government to account for environmental standards, and setting out a new approach to agriculture and fisheries management
- Seek to embed a 'net environmental gain' principle so development delivers environmental improvements locally and nationally, enabling housing development without increasing overall burdens on developers
- Connect people with nature by creating 'nature friendly schools' and reviewing National Parks to see how they can improve and whether the network should be extended.

Environment Secretary Michael Gove said:

Respecting nature's intrinsic value and making sure we are wise stewards of our natural world is critical if we are to leave the environment in a better state than we inherited it.

Our Environment Plan sets out how over the next 25 years we will radically reduce the waste that is choking oceans and rivers, cleanse our air of toxic pollutants and create new habitats for our most precious wildlife to thrive.

Through this plan we will build on our reputation as a global leader in environmental protection, creating an environment everyone can enjoy and helping the next generation flourish.

In a world-first, the 25 Year Environment Plan also sets out how we will use a natural capital approach to help us see the additional benefits – whether that is improved health and wellbeing, or national prosperity – in every part our environment, helping improve and direct decision making, and guiding new development.

The Plan sits alongside existing work. A [Call for Evidence](#) on reward and return schemes for drinks containers, including plastic bottles, has closed. Its findings are now being assessed by the Working Group, who will make recommendations to ministers this Spring.

As announced in the Budget, the Government will also launch a further Call for Evidence shortly on how changes to the tax system or charges on single-use plastics can play a role in reducing waste.

The plan sits alongside the Government's [Clean Growth Strategy](#), which sets out how the UK is leading the world in cutting carbon emissions to combat climate change and driving economic growth.

[Policy paper: 25 Year Environment Plan](#)

Updated: Annex 3 updated to correct an error in the introduction (missing word).

Our environment plan sets out our goals for improving the environment, within a generation, and leaving it in a better state than we found it. It details how we in government will work with communities and businesses to do this. It sets out what we will be doing over the next 25 years.

The Plan sits alongside two other important government strategies: our [Industrial Strategy](#) and our [Clean Growth strategy](#).

Alongside the plan, we've also published 3 detailed, technical annexes.

If you want to receive updates on our 25 Year Plan to Improve the Environment, please [register as a stakeholder](#).
