

Press release: Yorkshire court worker awarded OBE

David Greensmith, Justices' Clerk for North and West Yorkshire, has been given the honour after 30 years working for Her Majesty's Courts and Tribunal Service.

As a Justice's Clerk, he is primarily responsible for ensuring that 700 magistrates across the region receive timely legal advice, managing a team of advisers who work across the two counties' eight courthouses.

David spoke of his delight on receiving the award:

I'm honoured to receive this OBE. My 30 years serving as a Justice Clerk has brought with it a number of unexpected opportunities both at home in Yorkshire, the North West and further afield.

The variety of legal work has meant that no day is ever the same and I've particularly enjoyed seeing so many individuals develop and flourish in their professional and magisterial careers.

Mr Greensmith's varied career has taken him to a number of exotic destinations, leading successful programmes developing the court systems of Serbia, Croatia and the Falkland Islands, as well as helping to launch a judicial efficiency project in Serbia.

Closer to home, he previously sat as President of the Justices' Clerks Society and has contributed to a number of national programmes, working to increase efficiency and modernise the court system.

Courts and Justice Minister Dominic Raab said:

Throughout his time working for HMCTS, David has made a tremendous contribution to the administration of justice, using his knowledge and experience to implement real change in the court system of the UK and internationally.

I congratulate him for the honour he has earned through his hard work and commitment.

Mr Greensmith has also been honoured for his services to the UK Scouting movement.

Press release: Environment Agency uncovers landscape with laser mapping

The Environment Agency has announced plans to map England's entire landscape by 2020, using the data to assess flood risk and inform conservation work.

Using aircraft equipped with laser scanners, the Environment Agency will map all 130,000km² of the country, including rivers, fields and national parks – equivalent to 32 million football pitches.

As well as being used to understand flood risk, the data will also be made available for free to the public and industry to be used by archaeologists, environmental and urban planners, and even gamers to make accurate 3D models of the landscape.

Currently about 75 per cent of the country is mapped but with only sporadic coverage of upland areas. The new project, beginning over winter, will cover all of England's national parks, areas of outstanding natural beauty (AONBs) and sites of special scientific interest (SSSIs) such as the Peak District and the Yorkshire Dales.

Sir James Bevan, Chief Executive of the Environment Agency, said:

This ambitious project will enhance our understanding of England's unique natural features and landscape, helping us to better understand flood risk, plan effective defences and fight waste crime.

I'm pleased we are able to gather, use and share such valuable data to contribute to environmental improvements and conservation. It's just one of the many ways the Environment Agency is using technology to help people and wildlife.

The Environment Agency has been using lidar – light detection and ranging – technology for 20 years to better understand flood risk. Maps are created by aircraft equipped with laser scanners, which measure the distance between the aeroplane and the ground. The data collected can then be used to plan flood defences across whole river catchments. It also helps environment officers spot sudden changes in the landscape that could indicate illegal waste dumping – in 2014 eight people in Cornwall were fined for [dumping 4,500m³ of waste](#), which was discovered using lidar data.

Other organisations across the Defra group also use the data to help improve the environment – Natural England uses it to assess wildlife habitat and Forestry Commission use it to understand more about the country's tree cover.

In 2015, the Environment Agency made 11 terabytes of lidar data – equivalent to 3 million MP3 songs – available for free to the public as open data. Since

then, the data has been downloaded more than 500,000 times. The data has even [helped archaeologists uncover lost Roman roads](#) in the north of the country.

The new data will also be better quality than ever before, as the Environment Agency will map the whole country at 1m resolution by 2020. This means using the most up-to-date laser technology to reveal the features and details of the terrain more clearly.

[Press release: £60 million boost to UK children's television](#)

The Government's response to the consultation on the Contestable Fund, sets out proposals for up to £60 million to be made available for content creators to receive up to 50 per cent of the production and distribution costs of original TV shows.

The fund is still in development, but would be available for content broadcast on commercial Public Service Broadcasters (PSBs), as well as for other free and widely available channels and on-demand platforms, and potentially also online.

Over the past decade the output of children's television from PSBs in the UK has been in decline, with spending falling by £55m. This investment will aim to help reverse that trend and is the first of its kind to specifically focus on children's television.

The pilot is also aimed at stimulating greater variety in a market where the BBC is often the dominant buyer and broadcaster of children's content. In 2016, the BBC accounted for 87% of all first run UK originated children's programming by PSBs.

The pilot is intended to complement other measures taken by government in this area, including the introduction of a children's TV tax break and new powers given to Ofcom.

Culture Secretary Karen Bradley said:

High quality children's television is not only entertaining but plays a vital role in stimulating learning and giving young people a greater understanding of the world around them.

This significant investment will give our world-renowned television production sector the boost it needs to create innovative content for a wider audience that would otherwise not be made.

Anna Home OBE, Chair of the Children's Media Foundation said:

The Children's Media Foundation welcomes the confirmation that the new Contestable Content Fund will focus on the children's audience. It's a much-needed stimulus for the UK's children's media makers and we hope it will bring new and exciting content for children of all ages that could not otherwise have been commissioned.

John McVay, Chief Executive of PACT said:

Pact has long campaigned for increased investment in original children's content to incentivise new entrants to the market. This along with the introduction of the PSB criteria through the Digital Economy Act, will encourage the commercial PSBs back to the table and foster new talent.

The cash will be distributed over three years as part of a pilot starting in 2019. Programmes from new and diverse backgrounds, and those made in the nations and regions, will be a particular focus.

The funding for the pilot has been made available as a result of unspent funds from the previous licence fee settlement.

The BFI has been provisionally appointed as administrator for the fund, and will work with government on its final design, including whether the fund should include other genres in its scope.

Notes to Editors

- A detailed policy paper will be published in 2018 setting out how the fund will work, with the first awards distributed from the beginning of 2019/20.
- In the BBC Charter White Paper (May 2016), the government committed to establish a pilot contestable fund for public service broadcasting content. The consultation on the pilot contestable fund closed in February 2017. The government has today publishing its initial response to the consultation: [Public Service Broadcasting Contestable Fund: Pilot Phase](#).
- The UK's public service broadcasters are the BBC, ITV 1, Channel 4, Channel 5 and S4C.
- [PACT](#) is the trade association representing the commercial interests of UK independent television, film, digital, children's and animation media companies.
- The government gave Ofcom powers, through the Digital Economy Act 2017,

to introduce children's content quotas on commercial public service broadcasters should it see fit. Ofcom launched a review of children's content in November 2017: [Children's Content Review](#). Ofcom intends to publish its findings, alongside any proposed regulatory measures, in summer 2018.

- The government extended the tax relief for animation and high-end TV programmes to UK children's programmes in 2014.

[News story: Permanent Secretaries knighted in New Year's Honours](#)

They join a number of current and former Home Office staff who have received honours this year.

Sir Philip joined the Home Office in April 2017 after five years as Permanent Secretary at the Department for Transport. He previously worked at the then Department for Business, Innovation and Skills, Ofcom, HM Treasury and in the private sector for Morgan Stanley. In April 2015, Sir Philip became the Civil Service Disability Champion.

Sir Mark led the Home Office for over four years until he was appointed by the Prime Minister to be the National Security Adviser in April 2017. Prior to joining the Home Office he held a number of high-profile roles at the Foreign and Commonwealth Office, serving as British Ambassador to Afghanistan and the Prime Minister's Special Representative for Afghanistan and Pakistan.

Also receiving a knighthood is the department's former Chief Scientific Adviser, Professor Sir Bernard Silverman FRS. He took up his post in April

2010 providing scientific advice and support to three Home Secretaries and their ministers across the full range of Home Office policy areas. Prior to joining the Home Office he undertook work for a number of other government departments and public bodies, and has had a distinguished career in academia as a statistician.

A further 19 current and former Home Office employees have received honours.

Responding to the news, Sir Philip Rutnam said:

Congratulations to all those at the Home Office who have been recognised. It is a testament to their significant contribution to the department and their ongoing commitment to keeping our citizens safe and our borders secure.

I am deeply honoured and humbled to be included among those honoured. The award reflects the outstanding support and collaboration of colleagues throughout my career in the Civil Service.

Knight Commander of the Order of the Bath

- Philip Rutnam, Permanent Secretary. For public service.

Knight Commander of the Order of St Michael and St George

- Mark Sedwill, National Security Adviser, Lately Permanent Secretary. For services to UK national security.

Knight Bachelor

- Professor Bernard Silverman, Lately Chief Scientific Adviser. For public service and services to science.

Officers of the Order of the British Empire (OBE)

- Nick Drinkal, Deputy Director, Border Force. For services to border security in Calais and Dunkirk.
- Stephen Lamb, Lately Director of Returns Preparation, Immigration Enforcement. For services to improving immigration systems.
- Bernard Lane, Tackling Crime Unit, Crime, Policing and Fire Group. For services to community safety and reducing crime.

Members of the Order of the British Empire (MBE)

- Claire Chippington, Deputy Director, Border Force. For services to border security.
- Gail Crouchman, Border Force. For services to border security and prevention of modern slavery.
- Karyn Dunning, Head of Detained Casework, Immigration Enforcement. For services to asylum and humanitarian operations.
- Julia Farman, Head of the European Intake Unit, UK Visas and

Immigration. For public service.

- Mark Jefferson, Lately National Deep Rummage Team Immingham, Border Force North Region. For public service.
- Adrian Treharne, Capabilities and Resources. For services to people with disabilities in the public and charitable sectors.

British Empire Medal (BEM)

- Annwen Johnson, Crime Policing and Fire Group. Correspondence Manager, HM Treasury. For service to diversity and inclusion.
- Dean Milton, Assistant Director, Immigration Enforcement. For voluntary service to young people and charitable fundraising.
- Jo-Ann Moran, Office for Security and Counter-Terrorism. For services to people with disabilities in the public sector.
- Alex Oliver, HM Passport Office North East. For services to charity and the community in Durham.
- Manju Rajawat, Border Force. For services to border security.
- Asish Soni, Capabilities and Resources. For voluntary and charitable services to homeless people in London.
- Deviesh Tankaria, Assistant Director, Border Force. International Youth Chairman, Sathya Sai International Organisation. For voluntary services.
- John Thompson, Detection Technology Management Unit, Border Force South and Europe. For services to border security.
- Martin Thompson, Border Force. For services to border security.
- Kerstin Wheeler, Border Force Intelligence. For services to preventing modern slavery and protecting vulnerable people.
