

Notice: W3 0JN, S Walsh & Son Limited: environmental permit refused

The decision taken by the Environment Agency to refuse a permit application for a SR2009 No 5 inert and excavation waste transfer station below 250kte facility Acton, London.

This decision includes the refusal notice and decision document for:

- Operator name: S Walsh & Son Limited
 - Facility name: S Walsh & Son Limited
 - Permit number: EPR/EB3700KU/A001
-

Notice: LA14 4QR, Shanks Waste Management Limited: environmental permit issued

The Environment Agency publish permits that they issue under the Industrial Emissions Directive (IED).

This decision includes the permit and decision document for:

- Operator name: Shanks Waste Management Limited
 - Installation name: Sowerby Woods Resource Park
 - Permit number: EPR/XP3839FJ/V003
-

Notice: Y025 9UG, T Soanes & Son (Poultry) Limited: environmental permit issued

The Environment Agency publish permits that they issue under the Industrial Emissions Directive (IED).

This decision includes the permit letter, decision document and for:

- Operator name: T Soanes & Son (Poultry) Limited
 - Installation name: Church Hill Farm
 - Permit number: EPR/WP3831VY/A001
-

[News story: UK government committed to maximising economic opportunity in North Sea](#)

New Energy Minister Richard Harrington has told oil and gas leaders they have the 'full support' of the UK government in maximising the economic opportunity in the North Sea during his first visit to the region in his new ministerial post.

The UK Energy Minister met and addressed oil and gas industry leaders at the Maximising Economic Recovery (MER) Forum and the Oil and Gas Joint Council as well as attending meetings on the Industrial Strategy's role for supporting the sector and the prospect of Remote Islands Wind.

The Minister also listened to proposals from industry for an ambitious and deliverable oil and gas sector deal under the Industrial Strategy.

UK Energy Minister Richard Harrington said:

These are challenging but exciting times with new opportunities in North Sea oil and gas.

We are working with the sector to build on the £2.3 billion worth of UK government support through our modern Industrial Strategy.

I want to make it clear that the industry has full support of the UK government, and that we are continuing to create the right environment through a stable and supportive package to allow business, enterprise and jobs to flourish.

Over the past 50 years the oil and gas industry has extracted more than 43 billion barrels and current production accounts for over 50% of UK gas demand and around 65% of UK oil demand.

With 10 to 20 billion barrels of oil yet to be recovered by 2035, an estimated £140 billion additional gross revenue from production, and an additional £150 billion turnover from exports could be achieved if the industry is able to make the most of maximising recovery and accessing the global market for oil and gas goods and services.

In June, the first delivery of oil was delivered from one of the largest new drilling operations in the North Sea, following a £2 billion investment in the Kraken oilfield by oil and gas development and production company EnQuest. This was made possible by the UK government's support for the sector.

Last month the [Oil and Gas Authority \(OGA\)](#) opened its 30th Offshore Licensing Round, making awards to companies that promise to maximise economic recovery of the UK's oil and gas resources. The number of applications shows continued support and belief in the UK oil industry.

This morning Total announced that it has started-up production from the Edradour and Glenlivet fields off Shetland. Delivered ahead of schedule and under budget these projects will bring additional production capacity of up to 56,000 barrels of oil and is further evidence of confidence in the industry.

UK Government Minister, Lord Duncan said:

In my role as UK Government Minister for Scotland I will continue to fight to protect Scotland's world class oil and gas industry. We've supported Aberdeen through £125m investment in the City and Region Deal, which was key to setting up the innovative Oil & Gas Technology centre I saw today.

The oil and gas industry can rest assured that the UK government will continue to do everything we can to support this critical sector of the Scottish and British economy.

Andy Samuel, chief executive of the Oil and Gas Authority, said:

Today we held the MER UK Forum in Aberdeen and I very much value the continued close working with the oil and gas industry and strong support from the government. Together, this work is actively helping to maximise economic recovery and position the UK as an attractive basin to invest in, with significant remaining potential.

Deirdre Michie, Chief Executive of Oil & Gas UK, said:

I welcome the Minister's assurances that the industry has the full support of the UK government. The oil and gas industry has a critical role to play, helping meet the UK's energy needs, generating revenue for the economy and supporting hundreds of thousands of UK jobs and other significant UK industries.

We look forward to working with the new energy minister to ensure that government policy like the Industrial Strategy and the UK

Budget supports our own industry efforts to make the basin a competitive investment proposition.

While in Aberdeen the energy minister also met oil and gas apprentices and ex industry training instructors at the ASET International Oil & Gas Training Academy, a wholly-owned subsidiary company of North East Scotland College, and the Dynamic Advanced Response Training (DART) Simulator at Robert Gordon University.

Atholl Menzies, Chief Executive at ASET, said:

The ASET International Oil & Gas Training Academy plays a critical role in supporting the UK oil and gas sector through the skills development of personnel. We provide highly specialised oil and gas technical based vocational training, from new entrant to senior professional level and we train with market-leading technology and equipment including a live and integrated, replicated offshore production platform.

All of this will be brought together under the modern Industrial Strategy, and to ensure energy is as affordable as possible for consumers and businesses later this year the government will be publishing a road map to help businesses reduce their energy costs.

Press release: Lone parent employment rate highest on record

The number of households where no one works continues to fall – down 954,000 since 2010 – and is at the lowest level on record, according to new independent figures released today (30 August 2017).

Over 17.6 million households now have at least one working adult, meaning that around 9 in every 10 children live with a working adult. Less than 15% of households are classed as workless, with the number having fallen by 89,000 since last year.

Also rising is the proportion of lone parents finding work – 68% of lone parents are in work this year, an increase of nearly 11 points since 2010.

Work and Pensions Secretary, David Gauke said:

With record levels of employment, more people across the country now have the ability to support themselves and their families. That

means more children growing up with a working adult and more children who can see first-hand the benefits of being in employment.

What's particularly great news is that lone parents are more likely to be in work than ever before, and we're going further by making sure parents have access to the right support, including more free childcare from September.

The government is committed to helping reduce the number of workless households, and is taking action through steps such as raising the rate of free childcare to 30 hours from next month. Also, working parents can receive help towards their childcare costs under Universal Credit and, since April this year can get up to 85% of eligible childcare costs back, regardless of the number of hours worked or how old their youngest child is.

Children who grow up in workless families are almost twice as likely as children in working families to not reach the expected attainment level at all stages of their education – research has shown that three-quarters of children in workless families fail to reach 5 full GCSEs at grade C or above. Compared to children from working families, those from workless families are also more likely to be workless in adult life.

Recent employment figures show that there are [a record 32.07 million people in work](#), and the unemployment rate (4.4%) is the lowest level since 1975.
