

[Press release: New panel member appointed to Undercover Policing Inquiry](#)

The Home Secretary has appointed Mr Justice Mitting as a panel member on the Undercover Policing Inquiry with a view to him taking over as chairman.

Sir Christopher Pitchford announced in February that he would not be able to complete the work of the Inquiry himself due to ill health.

After seeking the advice of the Lord Chief Justice and consulting Sir Christopher on suitable replacements, Sir John Mitting has been chosen by the Home Secretary to join the Inquiry as a panel member. He will provide support to Sir Christopher with a view to succeeding him as chairman.

Sir John Mitting has been a High Court judge in England and Wales since 2001. He served as the chairman of the Special Immigration Appeals Commission from 2007 to 2012.

[News story: CNC officers visit college to spread the word about Project Servator](#)

PC James Brown, an Authorised Firearms Officer at Sellafield, set up the visit and spoke to 250 students and teachers at the Lakes College in Workington, alongside colleagues from the CNC Firearms Training Unit and officers from Cumbria Constabulary, who James invited to take part.

The aim of the visit was to discuss community engagement and Jamie and his CNC colleagues talked about Project Servator and its national rollout, as well as the Stay Safe campaign and the importance of reporting suspicious activity.

Project Servator sees highly visible yet unpredictable deployments of specially trained CNC officers around the Sellafield site and the surrounding local community. The operational deployments involve officers working together with communities to report suspicious activity. These officers are deployed to deter, help detect, and provide reassurance and confidence to members of the public.

The tactics used as part of Project Servator are not new and are also used regularly by the City of London Police, British Transport Police and Police Scotland. They have been developed to enhance the effectiveness of our resources and not as a response to any change in threat.

PC Brown said: "We had very positive feedback from the students who listened to our talk and were able to ask questions about our role. As a national armed police force, a major part of our role is counter terrorism policing. We need the local communities around our sites to be vigilant to any suspicious activity and it was great to be able to get this message across to the young people at the schools and colleges we visited.

"As well as setting up other visits to schools and colleges in the area, Project Servator officers have also visited offices and local business to spread awareness of the initiative.

"We have been invited back to the Lakes College in September to speak to their new intake of students and look forward to meeting them and spreading awareness of the CNC, Project Servator and the part they can play in community policing."

[News story: Government Chemist represented at 2017 Codex meeting in Budapest](#)

The Codex Committee on Methods of Analysis and Sampling held its 38th Session in Budapest, Hungary, from 8 to 12 May 2017. The Session was attended by 47 Member countries, 1 Member Organisation and Observers from 11 international organisations.

Under UK law, local authorities and food business operators can call upon the Government Chemist to arbitrate technical disputes on analytical or interpretation issues in food analysis. Incorrect sampling, analysis or interpretation can lead to disputes, and it is therefore important that the Government Chemist contributes to and keeps informed of international Codex developments.

[Selvarani Elahi](#), representing the UK Government Chemist, attended as part of the UK delegation together with colleagues from the Food Standards Agency and the Association of Public Analysts.

The meeting considered methods of analysis for Codex standards and testing in relation to international food trade. Participants discussed analytical methods for safety issues, including allergens, mycotoxins and metals, and food quality. Sampling plans, measurement uncertainty, equivalency of

methods, method performance criteria for multi-component methods, criteria for biological methods to detect chemicals of concern and Codex general guidelines for sampling were also discussed in order to reach a global consensus on the best approaches to use.

The [draft report](#) of the meeting is available from the Codex Alimentarius website.

National Statistics: Local authority municipal waste management: October to December 2016

Data on waste management are collected in order to monitor progress towards national and local targets; in particular against the requirements of the EU Landfill Directive.

Research and analysis: Environment Agency: business impact target (BIT)

Updated: New html published: Non-qualifying regulatory provisions under the Business Impact Target (BIT). It lists the excluded categories in the BIT reporting period 9 June 2017 to 20 June 2018.

These publications show how the Environment Agency assesses the financial impacts on business of changes to its regulatory practices.

It includes the Environment Agency's:

- list of qualifying regulatory provisions (QRPs)
- verified BIT scores for QRPs
- summary of non-qualifying regulatory provisions
