

# **Press release: Planned roadworks in Devon and Cornwall: weekly summary for Monday 27 March to Sunday 2 April 2017**

The following summary of planned new and ongoing road improvements over the coming week is correct as of the above date but could be subject to change due to weather conditions or unforeseen circumstances. All our improvement work is carried out with the aim of causing as little disruption as possible.

## **Devon**

### **A30 Fingle Glen, west of Exeter: electrical work**

Eastbound exit slip road will be closed overnight from 8pm on 30 March until 6am on 31 March. Diversion will be in place via the C50. Left turn only for traffic joining the A30.

### **M5 junction 29: resurfacing**

Southbound entry slip road will be closed nightly, 8pm to 6am, from 27 March until 30 March. Diversion will be clearly signposted.

Southbound entry slip road will be closed overnight from 8pm on 31 March until 6am on 1 April. Diversion will be clearly signposted.

Southbound exit slip road will be closed overnight from 8pm on 30 March until 6am on 31 March. Diversion will be clearly signposted.

## **Cornwall**

### **A38 between Dobwalls and Turfdown, east of Bodmin: stabilisation work**

24-hour one-way system will be in operation between the Halfway House and Trago Mills until 12 April. A 30mph speed limit will be in place between Two Waters Foot and St Neot junction with a 24-hour westbound diversion via the A390 and North Lane to rejoin the A38 west of Two Waters Foot. Trago Mills can be accessed via the A38 as per normal.

Eastbound and westbound carriageways will be closed nightly, excluding Sundays, 8.30pm to 6am, until 12 April. Diversion will be in place via Lostwithiel.

### **General enquiries**

Members of the public should contact the Highways England customer contact centre on 0300 123 5000.

## **Media enquiries**

Journalists should contact the Highways England press office on 0844 693 1448 and use the menu to speak to the most appropriate press officer.

# **Press release: Secretary of State for NI statement**

Speaking after this afternoon's deadline for the formation of a new Northern Ireland Executive, Mr Brokenshire said:

It is extremely disappointing that an Executive has not been formed in Northern Ireland today.

There will be widespread dismay across the community.

Over the past three weeks we have been engaged in intensive talks and progress has been made on a number of issues.

These include work to set a budget, a Programme for Government and ways of improving governance, transparency and accountability for politics here in Northern Ireland.

We have made further moves forward on agreeing a way to implement the Stormont House legacy bodies to help provide better outcomes for victims and survivors of the troubles.

In addition there was progress made around how Northern Ireland's interests would be represented in our negotiations to leave the EU as Article 50 is triggered on Wednesday.

Yet it is also clear that there remain significant gaps between the parties, particularly over issues surrounding culture and identity.

Throughout this process the UK Government has been active in making positive proposals to try and bridge these gaps and help the parties to move things forward.

Despite these efforts, agreement at this stage has not proved possible.

This will have impacts.

We are rapidly approaching the point at which Northern Ireland will not have an agreed budget.

This is not sustainable and will have consequences for public services.

From Wednesday financial resources to allow Northern Ireland's Departments to deliver key public services will fall under the control of the Northern Ireland Civil Service.

I believe that there remains an overwhelming desire among the political parties and the public here for strong and stable devolved government.

I have spoken to the leaders of each of the main Parties this afternoon and there is no appetite for any alternative.

I will be making a Statement in Parliament tomorrow on next steps.

We now have a short window of opportunity to resolve outstanding issues and for an Executive to be formed.

Everyone owes it to the people of Northern Ireland to grasp that and provide the political leadership and the stability they want.

## News story: New app to report Asian hornet sightings

The nation's smartphones are the latest weapon in the fight to prevent the spread of the Asian hornet, thanks to a new app which has been launched today.

People will be able to use the free app – called Asian Hornet Watch – to quickly and easily report possible sightings of the invasive species and send pictures of suspect insects to experts at the National Bee Unit.

While Asian hornets pose no greater risk to human health than a bee, they are a threat to our native honey bees, which is why it is important to quickly contain them.

By using the eyes and ears of smartphone users, we can more quickly identify any Asian hornet nests in the UK and eradicate them before they have the opportunity to spread.

Biosecurity Minister Lord Gardiner said:

This innovative new app is designed to be easy to use and allows people to report quickly any possible sightings of Asian hornets, which will help us to halt their spread.

This invasive species poses a threat to our native honey bees and we must do all we can to encourage vigilance – this new technology will advance this.

The interactive app, developed by the Great Britain Non-native Species Secretariat and the Centre for Ecology and Hydrology, will also make it easier for people to judge whether an insect may actually be an Asian hornet; with pictures available of other insects that it could be confused with and helpful information about their size, appearance and the times of year they are most likely to be spotted.

If there is a sighting of the Asian hornet, the government's well established protocol for eradicating the species will kick quickly into action: This was the case in Gloucestershire last Autumn, when bee inspectors rapidly tracked down and [destroyed an Asian hornet nest](#), containing any further outbreak.

There are fears the pest could reappear this spring, so members of the public are being urged to report any sightings quickly to again allow inspectors to intervene. Asian hornets can be distinguished from their native counterparts by their abdomens, which are entirely dark except for a single band of yellow – native hornets' abdomens are predominantly yellow.

Martin Smith, Public Affairs Manager at the British Beekeepers' Association, said:

This new app launched today by Defra is a welcome addition to current reporting methods that have enabled beekeepers and members of the public to report possible sightings. The key to containment is catching outbreaks as early as possible and allowing fast tracking of the insects back to their nest. We will certainly be encouraging all our 25,000 beekeepers to install the app and use it if they see what might be an Asian hornet near their hives.

Asian hornets arrived in France in 2004 and have since spread across large areas of Western Europe. It was discovered for the first time in the British Isles in Jersey and Alderney last summer.

The native European hornet is a valued and important part of our wildlife, and queens and nests of this species should not be destroyed.

### **Notes to editors**

1. The 'Asian Hornet Watch' app is available to download from the [Apple](#) and [Android](#) app stores.
2. The Great Britain Non-native Species Secretariat is a joint venture between Defra, the Scottish Government and the Welsh Government to tackle the threat of invasive species. More information can be found on their website <http://www.nonnativespecies.org/home/index.cfm>
3. Members of the public can also report sightings by email to [alertnonnative@ceh.ac.uk](mailto:alertnonnative@ceh.ac.uk) with a photo or on the Non-native Species Secretariat [website](#).
4. For details on the appearance of an Asian hornet please can be found on [Bee Base guide](#) or the [non-native species identification guide](#).

## **Speech: “A step-by-step approach to global nuclear disarmament is what we need to build trust and confidence.”**

Thank you very much Nikki for convening this initiative.

And I want to thank all member states standing here who have expressed concern that the proposal for a nuclear weapons ban treaty would fail to address the key issues that must first be overcome to achieve lasting global nuclear disarmament.

My country, the United Kingdom, is completely committed to the long-term goal of a world without nuclear weapons and we recognise that we have obligations,

as every country does, under the Nuclear Non-Proliferation Treaty (NPT). In our case, under all three pillars of that treaty.

And we have a strong record that we are proud of, on nuclear disarmament. We have reduced the size of our nuclear forces by over 50% since the height of the Cold War.

The UK is not attending the negotiations on a treaty to prohibit nuclear weapons because we do not believe that those negotiations will lead to effective progress on global nuclear disarmament. They cannot and will not work.

The British government firmly believes that the best way to achieve the goal of global nuclear disarmament is through gradual multilateral disarmament, negotiated using a step-by-step approach and within existing international frameworks.

A step-by-step approach to global nuclear disarmament is what we need to build trust and confidence. It will provide for tangible steps towards a safer and a more stable world where countries with nuclear weapons feel able to relinquish them.

Finally, I just want to say that a ban on nuclear weapons will not in itself improve the international security environment, or increase trust and transparency between nuclear weapon possessor states and it will also not address the technical and procedural challenges of nuclear disarmament verification. And that is why I am standing with Ambassador Haley today.
