

Press release: A64 safety improvements due to start

From:

First published:

3 February 2017

Part of:

A series of improvements are being carried out on the A64 this month, which will improve safety for drivers.

Contractors for Highways England will begin a number of projects which include renewing the safety barrier, improving signage and drainage and resurfacing a footpath.

Work will start next week, Monday 6 February, to stabilise a drainage ditch which runs alongside the eastbound exit slip road at Brambling Fields in Malton increasing flood resilience in the future. Work will take place between 7.30am and 6pm, and is expected to last for three weeks.

To carry out the work as quickly and safely as possible, the eastbound exit slip road will be fully closed 24 hours a day for the duration of the works and at times there will be a lane 1 closure on the eastbound A64 just past the slip road.

Highways England project manager Adeeb Saeed said:

This is essential maintenance which will strengthen the drainage ditch to protect it from eroding and ensure that it provides effective drainage in the future.

Work will also start next week to replace sections of the safety barrier between Grimston and Hopgrove.

This work will be carried out overnight between 8pm and 6am under lane closures to keep disruption to a minimum for drivers.

There will also be a temporary speed limit of 60mph for the safety reasons due to us working on the safety barrier.

The following week work is due to start to renew the safety barrier and improving the signage around Scampston Bridge.

And later this month work will start on resurfacing the footpath on the A64 Pickering westbound entry slip road. This will involve lane closures between 9.30am and 3.30pm.

General enquiries

Members of the public should contact the Highways England customer contact centre on 0300 123 5000.

Media enquiries

Journalists should contact the Highways England press office on 0844 693 1448 and use the menu to speak to the most appropriate press officer.

[News story: Defence Minister visits a hub for Queen Elizabeth Class Carrier Programme](#)

The Minister visited some of the aircraft and met with personnel stationed at the base. RNAS Culdrose is the heart of the naval air fleet, where naval aviators train. The base is an important part of the programme, which will deliver the two Queen Elizabeth Class (QEC) aircraft carriers, the largest warships ever built in the UK and from which the UK's new F-35B Lightning II jets will fly.

After visiting the Merlin training facility, the Defence Minister saw the Dummy Flight Deck, designed to train QEC aircraft handlers among others, where she witnessed live training exercises. The skilled aircrew and engineers at the base specialise in anti-submarine warfare and Airborne Surveillance and Control.

Minister for Defence Procurement Harriett Baldwin, said:

It was an honour to visit one of Europe's largest helicopter bases and meet the men and women behind its success. The state-of-the art facilities are helping to test and safeguard our maritime aircraft capacity.

The base provides 3,000 civilian and military jobs and is one of the biggest single-site employers in Cornwall, pumping £100m into the local economy every year, bringing welcome regional investment.

Many of the Merlins based at Culdrose will be fitted with the Crowsnest system, as [announced recently](#) in a £269 million deal. The system will act as the eyes and ears for the Royal Navy's ships, providing long range air, maritime and land detection and tracking capability. Crowsnest is an important step in the ambitious carrier programme, which will be vital to protect the new vessels.

The Commanding Officer of RNAS Culdrose, Captain Danny Stembridge ADC said:

It was a privilege to welcome the Defence Minister to Culdrose this week, and to discuss the vital role its people continue to play in the defence of our nation. She visits at a very important time for us; whilst we continue to deliver our primary roles of protecting

the Nuclear Deterrent and supporting Counter Terrorism, we are also getting ready to defend the Royal Navy's Carrier Task Groups.

HMS Queen Elizabeth, the Nation's new flagship, will sail into Portsmouth Harbour this year and Naval Air Power will be at the forefront of this nation's deployed capabilities. It is essential that we at RNAS Culdrose are ready to play our important role in this exciting new venture. Indeed, aircraft from 820 Naval Air Squadron, will be the very first to land on the flight deck of the new carrier.

The Minister also visited A&P Group and World Fuels at Falmouth docks. A&P support and maintain the Royal Fleet Auxiliary's four Bay Class ships, one of which is currently stationed in The Gulf. Last year the ships conducted operations in the Caribbean and Mediterranean.

Minister for Defence Procurement Harriett Baldwin said:

I am delighted to be in Falmouth, which has a vital ship repair capability, sustaining jobs and part of a UK-wide carrier effort.

[Press release: Milestone reached for Ipswich Flood Barrier scheme](#)

The cofferdam, which is a structure that can be pumped dry to enable construction of the barrier to take place below the river bed level, is now in place.

Over the last few months, VBA the contractors working for the EA, have installed the cofferdam, pumped it dry and they have now excavated the river silts and gravel.

The next stage is to pour the base slab, which is more than 700 cubic metres of reinforced concrete. At the moment the steel reinforcement is being placed by a team of 20 people and the first pour of the base slab will be completed in the next couple of weeks.

The actual tidal gate is being fabricated in Holland and will be delivered later in the year when the concrete structure and control building have been completed.

Progress has been made elsewhere on the site, with the foundations for the flood walls and the control building now installed.

The project, which will reduce the risk of flooding to 1,608 homes and 422 businesses and support key infrastructure, has been partnership funded by: the Environment Agency, Ipswich Borough Council, Department for Communities and Local Government, the Haven Gateway Partnership, and the New Anglia Local Enterprise Partnership.

EA project manager Andrew Osborne said:

The integrated team at the barrier are making good progress and are on programme to complete the works in spring 2018.

I am really looking forward to the next key milestone, which is the delivery of the tidal gate from Holland later in the summer.

Nick Culshaw, VBA operations director, said:

It has been a real honour to be working with and supporting the EA on this vital project in Ipswich. In order to protect around 2,000 properties, both commercial and residential, within the town from flooding in the future, a 20m wide tidal barrier gate, along with the relevant controls, will be installed.

The barrier, along with additional flood defences undertaken by VBA, will prevent any surge tides and allow the control of fluvial flow as required in the future.

The scheme is due to be completed in 2018.

If you're worried about the risk of flooding to you or a vulnerable person check your flood risk and other information here: <http://ow.ly/SWdMz>.
