

News story: Advocate General appears in first sitting of UK Supreme Court in Scotland

The Advocate General for Scotland, Lord Keen of Elie QC represented the UK Government in two UKSC hearings in Edinburgh this week. This was the first time the UK Supreme Court (UKSC) has sat outside London. The move was an historic occasion for the Court and well received by the legal profession in Scotland. On Monday 12 June 2017, Lord Keen represented the interests of the Secretary of State for the Home Department in the UKSC case of Sadovska and another v Secretary of State for the Home Department in relation to a sham marriage. On 21-22 June 2017, Lord Keen represented the interests of the Secretary of State for Justice in the UKSC case of Brown v The Scottish Ministers relating to the rehabilitation of extended sentence prisoners. Judgments for both hearings will be issued in due course.

- ceremonials
- DCMS business in the Lords
- First World War commemorations

News story: Infrastructure systems for a better world: apply for funding

Updated: 13 September is the deadline for application – not for registration as stated previously.

Innovate UK will invest in projects that stimulate innovation in infrastructure systems that provide critical services for the economy, environment and society, and create growth for UK businesses.

There is up to £5 million for projects that last between 3 and 12 months. Up to £10 million is available for projects that last up to 3 years, with costs between £100,000 and £5 million inclusive.

You can also apply into a [Knowledge Transfer Partnership](#) in infrastructure systems if you'd like to work with a recent graduate.

The opportunity

Infrastructure systems are the backbone of:

- economic stability
- growth
- competitiveness
- productivity

They are vital for social wellbeing and environmental sustainability; especially so when you consider the growing number of people, particularly in urban areas, who rely on these systems.

There is £425 billion of planned public and private infrastructure investment in the UK to meet the challenges and make the most of our world-leading capabilities in this area.

This includes infrastructure solutions in:

- planning
- engineering
- architecture
- energy
- the intelligent mobility of people and freight
- communications

We also have a strong base of creative start-ups in the digital economy and excellent academic research to support this aim.

[Read about the opportunities in government's National Infrastructure Delivery Plan 2016–2021.](#)

Our priority areas

We're particularly interested in projects in our priority areas for infrastructure systems. These are:

- smart infrastructure that improves whole-life performance and/or cost and resilience
- energy, including:
 - energy systems that flexibly match changing energy supply and demand profiles at local, regional or national scale
 - nuclear fission innovations that lead to major cost reductions, improved asset integrity and develop the supply chain
 - offshore wind innovations that result in significant reductions in the cost of energy
- connected transport that encourages more efficient transportation of goods and people across more than one mode
- urban living, addressing the challenges people face in urban areas

[Read more about our work in the infrastructure systems sector.](#)

Competition information

- the competition opens on 10 July 2017, and the deadline for applications is 13 September 2017
- projects must be led by a UK business or research and technology organisation

- you may work alone if you are an SME and your project is under one year with costs of less than £100,000. Otherwise, you must work with partners, including at least one SME
- total project costs can range between £25,000 and £5 million, and last up to 3 years
- businesses can attract up to 70% of their eligible costs, depending on their size and the project type

[Apply for the infrastructure systems competition.](#)
