

## **Guidance: Use rotational grazing on permanent grassland**

Find out how land managers can increase the number of plant species and improve soil health on permanent grassland by using rotational grazing.

---

## **Guidance: Maintain permanent grassland with very low inputs**

Find out how land managers can benefit wildlife, and improve soil and water quality, by managing grassland without artificial fertiliser and pesticides.

---

## **Guidance: Harvest seeds or take green hay to restore other grassland sites**

Find out how land managers can take green hay and harvest seeds to help create or restore species-rich grassland.

---

## **Guidance: Maintain species-rich grassland**

Find out how land managers can provide habitat for plants and invertebrates by maintaining species-rich grassland.

---

## Guidance: Make field-dried hay or haylage

Find out how land managers can use haymaking and aftermath grazing to maintain species-rich grassland.
