

[Kitchen fitter sentenced after illegally carrying out gas work](#)

An unregistered self-employed kitchen fitter has been sentenced after carrying out illegal gas work.

Exeter Crown Court heard how Brian Squibb, trading as BKS Kitchens and Bathrooms, was contracted to fit kitchens and signed an installer agreement giving the name of a Gas Safe member as the engineer he would use for gas work. However, in the summer of 2019, Brian Squibb carried out gas work at two properties in Exeter himself, falsely using another person's name and registration number.

An investigation by the Health and Safety Executive (HSE) found that Mr Squibb has never had any competencies in gas work or been a member of the Gas Safe Register. However, he had removed an existing natural gas hob and capped off a live gas supply failing to check for gas tightness.

On completion of this work Mr Squibb produced documentation for the homeowners falsely using a registered gas engineer's name and Gas Safe Register details in an attempt to hide his unregistered gas work

Brian Squibb of Elizabeth Avenue, Exeter, Devon pleaded guilty to breaching Regulation 3(1), 3(3) and 3(7) of the Health and Safety at Work Act 1974. He was sentenced to eight months in prison, suspended for 24 months and ordered to undertake 120 hours unpaid work. He was also ordered to pay costs of £4,250.

Speaking after the hearing, HSE inspector Simon Jones said: "Brian Squibb undertook gas work, which he knew he was not registered to do. He then tried to cover up his unregistered and incompetent gas work by producing fraudulent documentation.

"All gas work must be done by registered Gas Safe engineers to ensure the highest standards are met to prevent injury and loss of life"

[Sawmill company fined after worker fatally injured by machinery](#)

A sawmill company has been fined after a worker was fatally injured when a lift conveyor collapsed on top of him.

Hereford Crown Court heard how on 20 December 2017, two employees were working below a lift conveyor at Pontrilas sawmill in Hereford to remove wood debris. The machine had been experiencing a fault, which had prevented the conveyor from descending. While the employees were working the conveyor suddenly dropped downwards causing fatal crush injuries to one employee and bruising and abrasion injuries to the head of the other employee.

An investigation by the Health and Safety Executive (HSE), found that the company had failed to assess the risks to the employees during the cleaning operation or provide a suitable system of work for removing debris from beneath the raised lift conveyor.

Pontrilas Sawmills Limited of Hereford Road, Pontrilas, Hereford pleaded guilty to breaching Section 2(1) of the Health and Safety at Work etc Act 1974. The company was fined £200,000 and ordered to pay costs of £22,016.

Speaking after the hearing, HSE inspector Lee Schilling said: "Unplanned maintenance activities give rise to the risk of fatal incidents.

"Simply securing the lift conveyor in a raised position to prevent the inadvertent downward movement or collapse would have prevented this incident."

[Company fined after worker's hand caught in metalworking lathe](#)

An engineering company has been fined after a worker's hand was caught in a metalworking lathe resulting in serious injuries to his hand and arm.

Manchester Magistrates' Court heard how on 24 January 2019, an employee of Martland Rollers Limited, had been using emery cloth by hand to smooth down a part which was turning in a lathe at the company's site in Cricket Street, Wigan. A glove he was wearing became drawn into the moving parts and his arm followed, causing breaks, lacerations and nerve damage.

An investigation by the Health and Safety executive (HSE) found that the employee had been undertaking a trial period at the company with a view to permanent employment. Martland Rollers Limited failed to carry out a suitable risk assessment and did not provide adequate training or supervision to prevent the new employee engaging in such a dangerous work activity.

Martland Rollers Limited of Botanic Road, Southport, Merseyside pleaded guilty to breaching section 2(1) of the Health and Safety at Work etc. Act 1974. The company was fined £13,300 and ordered to pay costs of £3,284.

Speaking after the hearing, HSE inspector Roger Clarke said: "This injury was entirely preventable if the risk had been identified and suitable control measures put in place.

"Adequate training and supervision should also have been in place to ensure the machine was being used safely by newer operatives."

HSE spot checks and inspections are taking place in the Telford area

HSE is working with Telford & Wrekin Council to carry out spot checks and inspections on businesses in Telford to check they have COVID-secure measures in place.

To protect workers, visitors and customers, employers must make sure that business have put measures in place, and everyone is following them to manage the risks from coronavirus.

HSE will be calling and visiting businesses from all different sectors in the area to check they are following the government guidelines for a period of three weeks starting on February 1st.

Councillor Richard Overton, Telford & Wrekin Council's cabinet member for enforcement, said: "We will be talking to local businesses and visiting and inspecting sites in Stafford Park, Hortonwood and Halesfield to understand how they are managing risks in line with their specific business activity.

"Becoming COVID-secure needs to be the priority for all businesses. It is a legal duty for businesses to protect their workers and others from harm and this includes taking reasonable steps to control the risk and protect people from coronavirus.

"This means making business adjustments to become COVID-secure. We advise employers to work with their employees when implementing changes, to help increase confidence with workers, customers and the local community."

Being COVID-secure means businesses need to keep up to date with the latest guidance and put measures in place to manage the risk and protect workers, visitors and customers.

During the calls and visits, HSE provides advice and guidance to manage risk and protect workers and visitors, but where businesses are not managing this, immediate action will be taken.

Angela Storey, Director of Transformation and Operational Services at HSE said: "Across the country we are working with local authorities, like Telford and Wrekin Council, to check businesses are COVID-secure and providing support and advice where needed.

"Our spot checks and inspections support the cross-government work in helping employers and employees at work during the pandemic.

"All workplaces are in scope for spot checks which means businesses of any size, in any sector can receive an unannounced check from HSE or an

inspection from the local authority, to check they are COVID-secure.

“If you are contacted by the HSE or your local authority, please engage with us.

“By making sure that businesses have measures in place to manage the risks, we can benefit the health of local communities as well as support the local and national UK economy.”

Please ensure your workplace is safe by following the guidance on [being COVID-secure](#). Further information on [spot checks and inspections](#) is available on our website.

[Employer sentenced after worker struck by excavator](#)

A sole trader who operated a construction and demolition waste recycling business has been fined after a worker sustained serious crush injuries when he was struck from behind by a 13.5 tonne excavator.

Manchester Magistrates’ Court heard how on 11 February 2019, the 50-year-old employee was manually sorting demolition waste in the yard of the waste

recycling premises of William Leeson t/a W Leeson and Son, in Walkden, Greater Manchester. He was struck by the a 360 tracked excavator, which reversed over the lower part of his left leg as he bent down to pick up some waste from the ground, resulting in life changing injuries.

These injuries have prevented his return to work and left him struggling to cope independently with daily activities; he is currently awaiting a below the knee amputation of his left leg.

An investigation by the Health and Safety Executive (HSE) found that William Leeson t/a W Leeson and Son had no safe system of work in place to effectively segregate pedestrians and vehicles, thereby ensuring the pedestrian pickers were always a safe distance from the moving vehicles.

William Leeson t/a W Leeson and Son of Sale, Greater Manchester, pleaded guilty to breaching Section 2(1) of the Health and Safety at Work etc. Act 1974. Mr Leeson was sentenced to 17 weeks in prison suspended for 12 months and ordered to pay costs of £9,000.

Speaking after the hearing, HSE inspector Jackie Worrall said: "This injury could have easily been prevented had Mr Leeson ensured that effective segregation of pedestrians and vehicles was in place. This case is a reminder to all employers to properly assess the risks arising from workplace transport and to put in place effective control measures to minimise these risks. Most importantly, where vehicles and pedestrians operate within the same workspace it is essential that there is effective segregation at all times."
