

Partners of roofing company bowled over for unsafe work

Both partners of a roofing company have been sentenced following out unsafe work on a Bowls Club in Salisbury.

Swindon Magistrates' Court heard how between 23 April and 7 May 2018 workers of CB Roofing were seen working on the roof with unsafe access, no edge protection and nothing to prevent falls through the fragile roof material.

An investigation by the Health and Safety Executive (HSE) found that the partners failed to ensure that the work at height was properly planned, appropriately supervised and carried out safely.

Philip Robert Stanley Spring of Blyth Way, Salisbury pleaded guilty to breaching Regulation 4 (1) of the Work at Height Regulations 2005 and has

received a six-month custodial sentence, suspended for 12 months, in which time he must undertake 250 hours unpaid work. He was also ordered to pay costs of £1836.31.

Christopher James Barham of Hughendon Manor, Salisbury pleaded guilty to breaching Regulation 4 (1) of the Work at Height Regulations 2005 and has received a six-month custodial sentence, suspended for 12 months, in which time he must undertake 250 hours unpaid work. He was also ordered to pay costs of £1836.31.

Speaking after the hearing HSE inspector Sue Adsett said: "Falls from height remain one of the most common causes of work-related injuries in this country and the risks associated with working at height are well known.

"Companies should be aware that HSE will not hesitate to take appropriate enforcement action against those that fall below the required standards."

[Company and sub-contractor fined after worker falls from height](#)

Two companies, P.D.R. Construction Limited and Metcalfe Roofing & Building Services Limited, have been fined after a worker fell through a fragile mesh roof whilst carrying out work at height.

Teesside Crown Court heard how, on 21 July 2016, the injured person had been in the process of installing a roof on a new KFC Drive Thru in Coulby Newham.

Whilst moving materials on the roof, he stepped backwards onto an adjacent fragile mesh roof that was not loadbearing, falling approximately three metres and suffering multiple fractures of his lower left back.

The Health and Safety Executive (HSE) investigation found that in failing to prevent access to the fragile roof area, the roofing contractor, Metcalfe Roofing & Building Services Limited, had failed to plan and carry out the work at height in a safe manner. The investigation also found the principal contractor, P.D.R. Construction Limited, had failed to plan, manage or monitor an aspect of the construction phase without risk to safety.

P.D.R. Construction Limited of Salisbury House, Priory Park West, Hessle pleaded guilty to breaching Regulation 13(1) of the Construction (Design and Management) Regulations 2015 and was fined £225,000 with £8,000 costs.

Metcalfe Roofing & Building Services Limited of Sandgate Industrial Estate, Hartlepool, pleaded guilty to breaching Regulation 4(1) of the Work at Height Regulations 2005 and was fined £2,000.

After the hearing, HSE inspector John Heslop said: "This incident highlights the importance of thorough risk assessment, appropriate planning and adhering to a safe system of work that is regularly monitored and managed by those in control of that work."

[Man sentenced following gas concerns at Caravan site](#)

One of the individuals with management responsibility of a static caravan site has been sentenced for failing to have gas appliances properly maintained and inspected and failing to safely store Liquefied Petroleum Gas (LPG) cylinders.

Nottingham Crown Court heard that concerns were raised in April 2016 by North

East Derbyshire District Council relating to Felix Rooney who rented out caravans at Blackbridge Caravan site.

An investigation by the Health and Safety Executive (HSE) found that Mr Rooney had no Landlord's Gas Safety Certificates for the gas appliances in the caravans rented out, some of which were found to be immediately dangerous and had to be disconnected. The LPG cylinders not being used were stored unsafely presenting a risk of fire and explosion.

HSE ensured that all the caravans on the site were inspected by a competent person (a Gas Safe registered engineer) to ensure the gas appliances and fittings were safe.

Felix Rooney of Brandon Lane, Coventry pleaded guilty to breaching Section 3(1) of the Health and Safety at Work etc Act 1974 and was sentenced to an eight-month prison sentence suspended for two years. He was also instructed to pay full costs of £22,235.00.

Speaking after the hearing HSE inspector Lindsay Bentley said "This case highlights the importance of not only looking after your employees but members of the public too. Gas safety is so important and regular inspections of the gas fittings and equipment in the caravans, by a Gas Safe registered engineer, would have ensured that they did not deteriorate to a condition where they endangered lives."

Company fined after employee seriously injured in fall from lorry

A manufacturer of steel water storage tanks and supporting towers has been fined after a worker suffered multiple fractures following a fall from height.

Cwmbran Magistrates Court heard how, on 25 October 2017, a Braithwaite Engineers Limited employee was injured when he fell from a lorry bed whilst unloading the lorry at their site in Risca, resulting in multiple fractures of his head, ribs, shoulder blade and fingers, causing him to miss over five months of work.

An investigation by the Health and Safety Executive (HSE) found the company had failed to provide employees with suitable and clear instructions and training so that employees did not access lorry beds in an unsafe manner.

Braithwaite Engineers Limited, of Units A&B Leeway House, Leeway Industrial Estate, Newport pleaded guilty of breaching Section 2(1) of the Health and Safety at Work etc Act 1974. The company has been fined £9,400 and ordered to pay costs of £1,680.75.

Speaking after the case HSE inspector Will Powell said: "Falls from vehicles can be overlooked by employers when considering risks from work at height. Simple measures would have prevented this accident."

Council fined for Hand Arm Vibration

failings

Dacorum Borough Council has been fined for exposing seven grounds maintenance workers to Hand Arm Vibration (HAVS), caused by excessive use of power tools.

Luton Magistrates' Court heard how Dacorum Borough Council reported seven cases of HAVS between May 2015 and June 2016. The affected employees were all part of its grounds maintenance and street care team, looking after the public spaces in Hertfordshire.

An investigation by the Health and Safety Executive (HSE) found that the council had neither adequately planned its working methods nor trained or informed employees on the risks to their health. Furthermore, Dacorum Borough Council did not limit the duration or magnitude of exposure to vibration and failed to put in place suitable health surveillance to identify problems at any early stage.

Dacorum Borough Council pleaded guilty to breaching Regulation 5 of the Control of Vibration at Work Regulations 2005 and have been fined £100,000 and ordered to pay costs of £28,672.62.

Speaking after the hearing, HSE inspector Rubeena Surnam said "This was a case of the council failing to identify the risk from hand arm vibration which is a recognised health risk with potentially disabling consequences.

"Unless vibration is identified and properly assessed, an employer won't know the level of risk and whether action is needed to protect workers."
