

EU supports South Africa to boost job creation, small business development and improved governance with €62 million

Commissioner for International Cooperation and Development, Neven **Mimica** is visiting South Africa, where he is meeting the Minister of Finance, Mr Nhlanhla Nene, and the Minister for Small Business Development, Ms Lindiwe Zulu.

On the occasion, Commissioner **Mimica** said: *“Ten years after the establishment of a strategic partnership with South Africa, the European Union remains very much engaged with the country as a crucial regional and global player. We are looking forward to enhancing our relations with President Ramaphosa and his administration. The fight against unemployment, poverty and inequality are at the heart of our common agenda and I am happy to launch two programmes, worth a total €62 million, in line with those priorities, during my visit. We look forward to continuing our joint work beyond 2020 with new and innovative approaches.”*

The new EU programme ‘Employment Promotion through small, micro and medium enterprises Support Programme for South Africa’, worth €52 million, will help to boost job creation in South Africa by supporting the country’s National Development Plan 2030, which foresees that 90% of new jobs in the country should come from small and emerging business by 2030. Implemented by the South African Department for Small Business Development, the new programme will help reduce the cost of doing business for small enterprises, improve business, production and marketing skills, increase access to funding by de-risking enterprise development lending and keeping the interest rate at reasonable levels.

The new Enhancing Legislature Oversight Programme of €10 million will strengthen democracy and good governance through effective execution of the core mandate of the National Parliament and the Provincial Legislatures to legislate, exercise oversight and ensure public participation.

Commissioner **Mimica**’s visit takes place a month after President Ramaphosa’s new Government was nominated. As well as meeting Ministers Nene and Zulu, Commissioner **Mimica** will also meet with EU Member States representatives and development stakeholders. He will visit an EU-funded project that develops unemployed mothers’ skills in retailing, as well as the historical site of Liliesleaf that played an important role in the life of Nelson Mandela whose centenary is celebrated this year.

Background

The EU is a longstanding partner of South Africa, and has long supported the

anti-apartheid cause. Governmental cooperation then started with the advent of democracy in 1994 and it rapidly intensified, leading to the establishment of a Strategic Partnership in 2007.

Currently, bilateral cooperation with South Africa (2014-2020) focuses on 3 focal sectors: employment creation, education, training and innovation, as well as building a capable and developmental State. The total EU allocation for this period is €268 million.

The Council has added one person and 21 entities to the list of those subject to restrictive measures against the Democratic People's Republic of Korea (DPRK), transposing into EU law sanctions imposed on 30 March 2018 by the UN Security Council (UNSC) Committee established by UNSC resolution 1718 (2006). These restrictive measures consists of a travel ban and an asset freeze for individuals and an asset freeze for entities. It has also transposed the asset freeze targeting 15 vessels, the port entry ban on 25 vessels and the de-flagging of 12 vessels.

The sanctions were imposed on the DPRK in response to its nuclear weapon and ballistic missile development activities, which are in breach of numerous UNSC resolutions.

The decision brings the total number of persons and entities subject to restrictive measures against the DPRK to 80 persons and 75 entities as listed by the UN. In addition, 55 persons and 9 entities have been sanctioned by the EU autonomously.

EU foreign ministers discussed the situation in the Korean peninsula with the South Korean Foreign Minister, Kang Kyung-wha, on 19 March 2018, in light of

the recent announcements made by the DPRK's leadership and looking ahead to the summit between Kim Jong-un and South Korean President Moon Jae-in scheduled for April and the announced meeting between Kim Jong-un and US President Donald Trump. They welcomed South Korea's efforts to de-escalate tensions in the peninsula and improve intra-Korean relations, and to create the conditions needed to work towards a diplomatic solution aimed at the complete, verifiable and irreversible denuclearisation of the Korean Peninsula.

The EU implements all UN Security Council resolutions adopted in response to the DPRK's nuclear programmes and nuclear weapons, other weapons of mass destruction and ballistic missile programmes. In addition, the EU has imposed autonomous restrictive measures against the DPRK, complementing and reinforcing the UN sanctions regime.

The legal acts were adopted by written procedure. They will be published in the Official Journal of 9 April.

European Research Council invests €653 million in ground-breaking research

€653 million of EU funding will go to 269 senior researchers across Europe, giving them a chance to realise innovative ideas and produce results that will have a major impact on science, society and the economy. Carlos **Moedas** European Commissioner for Research, Science and Innovation, said: *“This grant scheme has supported outstanding and established research leaders since 2007. It is a great example of how EU funding can help expand the frontiers of scientific knowledge, providing the resources necessary to continue ground-breaking, high-risk projects, and ensure Europe’s global competitiveness.”* Advanced researchers will explore among many other topics innovative heart regeneration treatments, the aggressiveness of different bacteria and the effects of air pollution on the development of babies. The grants of up to €2.5 million per project are selected by the [European Research Council](#) (ERC) and financed through [Horizon 2020](#), the EU Research and Innovation programme. More information including project examples and statistics is available in a [news item](#). (For more information: Ricardo Cardoso – Tel.: +32 229 80100; Victoria von Hammerstein – Tel.: +32 229 55040; Maud Noyon – Tel. +32 229-80379)

The EU aims to generate €1.5 billion investments in Lebanon over 3 years

Today the European Union has announced a package of up to €150 million to support the revitalisation of the Lebanese economy as part of its longstanding commitment to the economic development of [Lebanon](#). This support could generate up to €1.5 billion loans for Lebanon until 2020, on condition that the country’s financial institutions identify and propose projects that are bankable and adopt relevant reforms. This package includes up to €50 million in grants funding that could be mobilised in each of the coming three years (2018-2020) to provide technical assistance and ensure a sufficient level of concessionality of loans. High Representative/Vice-President Federica **Mogherini** said: *“The European Union has always been on the side of Lebanon and the Lebanese people. A strong and resilient Lebanon is in our collective interest, in the interest of the entire region. [...] With this new package, the European Union reconfirms its support to the Lebanese economy, [...] and encourages the Government to pursue the path of structural reforms it has started to undertake.”* Commissioner for Enlargement Negotiations and Neighbourhood policy Johannes **Hahn** added: *“The EU contribution is a signal of our support for the Government of Lebanon, whose tasks include now taking forward a road map of structural reforms to boost economic development in the country for the benefit of all. We will support and accompany this effort through the [External Investment Plan](#)”*. The full press release is available [here](#). State aid: Commission approves €44 million Italian scheme to support economic recovery in regions affected by earthquakes in 2016 and 2017

The European Commission has found a €43.9 million Italian aid scheme to support investments in regions affected by earthquakes in 2016 and 2017 to be in line with EU State aid rules. The aid will contribute to the economic recovery of central Italy without unduly distorting competition in the Single Market. In 2016 and 2017, four major earthquakes hit central Italy, affecting around 600,000 people in an 8,000 km² area. Today, the region is still being affected by abnormal seismic activity, leading to a progressive desertification of the affected areas. This is unlikely to be addressed by compensation measures alone. The Italian aid scheme approved today aims at complementing such measures, to mitigate the economic and social damages in the areas which have been affected by i) a significant drop of GDP, ii) a substantial loss of employment, iii) a reduction of economic activity by more than 50%, and iv) a significant decline in companies' turnover compared to pre-earthquakes levels. This concerns 140 municipalities in the Italian regions of Lazio, Umbria, Marche and Abruzzo. Commissioner Margrethe **Vestager**, in charge of competition policy, said: *"The people and economy of Central Italy are still recovering from the dramatic effects of several earthquakes over the past years. The Italian authorities want to support this recovery with a measure contributing to the economic recovery of these areas. We found this measure to be well targeted to support affected businesses and the people living in these regions."* A full press release is available in [IT](#), [EN](#), [FR](#), [DE](#). (For more information: Ricardo Cardoso – Tel.: +32 229 80100; Yizhou Ren – Tel.: +32 229 94889)

State aid: Commission approves Portuguese tonnage tax and seafarer scheme

The European Commission has approved under EU State aid rules a Portuguese tonnage tax scheme which, together with a scheme to support seafarers, will encourage ship registration in Europe and contribute to the competitiveness

of maritime transport while preserving employment in the sector and promoting high environmental standards. Under the newly introduced Portuguese tonnage tax scheme, maritime transport companies will pay taxes on the basis of the net tonnage (i.e. the size of the shipping fleet) operated in maritime transport activities rather than on the basis of their taxable profits. The tonnage tax scheme requires that if a shipping company wants to benefit from the scheme, a significant part of its fleet must fly the flag of a European Economic Area state. Moreover, the newly introduced Portuguese seafarer scheme exempts seafarers employed on vessels that are eligible under the tonnage tax scheme from paying personal income tax. It also allows them to pay reduced rates of contribution for social insurance. The Commission assessed the measures under EU State aid rules, in particular its [Guidelines on State aid to maritime transport](#). Commissioner Margrethe Vestager, in charge of competition policy, said: *“The Portuguese measures that we approved today will help the EU shipping industry to remain competitive on the global market, while protecting know-how and jobs in the maritime transport sector.”* A full press release is available in [PT](#), [EN](#), [FR](#), [DE](#). (For more information: Ricardo Cardoso – Tel.: +32 229 80100; Yizhou Ren – Tel.: +32 229 94889)

Aides d’État: la Commission approuve la compensation accordée par la France à La Poste pour sa mission de présence territoriale

La Commission européenne a conclu qu’un abattement fiscal accordé à La Poste pour la période 2018-2022 pour assurer le maintien d’une forte densité de présence postale en France est conforme aux règles de l’UE en matière d’aides d’Etat. Mme Margrethe Vestager, commissaire pour la politique de concurrence, a déclaré: *«Un accès aisé aux services postaux est très important pour tous les citoyens européens. La décision prise aujourd’hui autorise à La Poste à bénéficier de compensations lui permettant de continuer à remplir son rôle économique et social essentiel et à exercer son importante mission de service public, sans fausser de manière indue la concurrence.»* La mission de présence territoriale de La Poste vise à garantir une forte densité de la présence postale, au-delà des contraintes imposées par l’obligation de service universel, notamment dans les régions rurales. Pour le financement de cette mission de présence territoriale, le contrat d’entreprise entre l’Etat français et La Poste pour la période 2018-2022 prévoit que La Poste bénéficiera d’un abattement de fiscalité locale d’environ 900 millions d’euros au maximum sur l’ensemble de la période. L’analyse de la Commission a montré, que la compensation prévue n’excédait pas ce qui est nécessaire pour couvrir le coût net de cette mission de service public. Sur cette base, la Commission a conclu que la mesure est conforme aux règles de l’UE relatives aux aides d’État. Vous pouvez trouver le communiqué de presse en [FR](#), [EN](#), [DE](#). (Pour plus d’informations: Ricardo Cardoso – Tel.: +32 229 80100; Yizhou Ren – Tel.: +32 229 94889)

Mergers: Commission clears acquisition of a joint venture by General Electric and Rosneft

The European Commission has approved, under the EU Merger Regulation, the acquisition of joint control over a joint venture based in Russia by General

Electric Company (“GE”) of the US and Rosneft Oil Company, through its subsidiary Sibintek LLC, both of Russia. The joint venture will focus on the development, implementation, marketing, licensing and/or operation of industrial Internet of Things (IoT) applications based on the Predix Platform offered by GE. GE is a global, diversified manufacturing, technology and services company active in a variety of sectors including, among others, oil & gas manufacturing, technology, services and digital solutions. Rosneft is active in the exploration, development, production and sale of crude oil and natural gas and the refining and marketing of petroleum products and petrochemicals. Sibintek provides information technology (IT) solutions to Rosneft and other customers in Russia. The Commission concluded that the proposed acquisition would raise no competition concerns because the joint venture has negligible actual and foreseen activities within the European Economic Area. The transaction was examined under the simplified merger review procedure. More information is available on the Commission’s [competition](#) website, in the public [case register](#) under the case number [M.8820](#). STATEMENTS

International Roma Day: Joint Statement

Ahead of International Roma Day, taking place every year on 8 April, First Vice-President Frans **Timmermans** and Commissioners Marianne **Thyssen**, Věra

Jourová, Corina **Crețu** and Johannes **Hahn** stated: “Respect for fundamental rights, including equal treatment, is one of the cornerstones of the European Union. Yet, one of the largest minorities in the EU and in its neighbourhood – the Roma community – still does not fully benefit from these rights. Not only do Roma communities suffer prejudice, discrimination and marginalisation, very often they do not even have access to basic provisions such as clean water, sanitation and food. 80% of Roma are at risk of poverty. Such a situation hits Roma first, but it is also a stain on our democratic communities. [...] Roma have been living in Europe for more than 700 years. Roma history and culture form an indispensable part of our diverse European heritage. Roma communities deserve to be treated equally and to enjoy their full rights as Europeans. At the end of the day, the way we include our most vulnerable minorities is an essential test of our European democracy.” The full statement is available [here](#). ‘Universal Healthcare for all’: Statement by Commissioner for Health and Food Safety, Vytenis Andriukaitis ahead of World Health Day 2018

“Access to healthcare for all is one of the major achievements of post-Second World War Europe bringing to reality the idea that all human beings, rich or poor, should benefit from quality medical care without worry that their illness would bankrupt their family. As we celebrate World Health Day, we should feel a great deal of satisfaction for the progress made on our continent in protecting EU citizens’ health and in raising the overall life expectancy. As a cardiac surgeon, and having treated many patients, I have seen how important [Universal Healthcare](#) is, especially for the most vulnerable. I have also met many inspiring healthcare professionals, scientists, researchers and social workers who make Universal Healthcare a reality on everyday basis – it strikes pride in my heart to be part of this wonderful union. [...] Making sure that every single person in the EU has access to healthcare should be the priority for all national authorities. Although the success of making healthcare available to all ultimately rests with the Member States who are responsible for defining and organising their health policy, services and budget, the Commission will continue to offer guidance in order to decrease the health gaps among EU countries. Together we will be able to make sure that we are doing our utmost so that universal healthcare is delivered to all, here in the EU and around the world.” Read the full statement [here](#). [The EU aims to generate €1.5 billion investments in Lebanon over 3 years](#)

This support could generate up to €1.5 billion loans for Lebanon until 2020, on condition that the country's financial institutions identify and propose projects that are bankable and adopt relevant reforms. This package includes up to €50 million in grants funding that could be mobilised in each of the coming three years (2018-2020) to provide technical assistance and ensure a sufficient level of concessionality of loans.

High Representative for Foreign Affairs and Security Policy/Vice-President of the European Commission Federica **Mogherini** said: *"The European Union has always been on the side of Lebanon and the Lebanese people. A strong and resilient Lebanon is in our collective interest, in the interest of the entire region. Lebanon is a mirror of the whole Middle East, of its diversity, complexity and beauty. With this new package, the European Union reconfirms its support to the Lebanese economy, for the benefit of the Lebanese people, and encourages the Government of Lebanon to pursue the path of structural reforms it has started to undertake."*

Commissioner for Enlargement Negotiations and Neighbourhood policy Johannes **Hahn** added: "The EU contribution is a signal of our support for the Government of Lebanon, whose tasks include now taking forward a road map of structural reforms to boost economic development in the country for the benefit of all. We will support and accompany this effort. Through the External Investment Plan, the EU is ready to extend up to €150 million in grants that could be used to generate up to €1.5 billion of concessional lending for investment in Lebanon over the next three years provided relevant projects are put forward and the necessary reforms are adopted".

The package was announced today at the CEDRE conference in Paris, an international donor meeting in support of Lebanon's economy. This will be made available in the framework of the [European External Investment Plan](#)

(EIP), a comprehensive and ambitious EU plan which encourages investment in our partner countries for the promotion of inclusive growth, job creation and sustainable development.

Background

Bilateral Support

To date, the EU has allocated more than €1.3 billion in assistance to Lebanon since 2011, both for bilateral assistance (€268 million) and in response to the Syria crisis (€1.069 billion). Additional funds will be available in the bilateral assistance envelope for promoting growth and job creation as well as improving local governance and socio-economic development.

In November 2016, the European Union and Lebanon adopted [Partnership Priorities](#) for the period 2016-2020, which set up a renewed framework for political engagement and enhanced cooperation. The Partnership Priorities include security and countering terrorism, governance and the rule of law, fostering growth and job opportunities, and migration and mobility. They were agreed in the context of the [revised European Neighbourhood Policy](#) and the [EU's Global Strategy for Foreign and Security Policy](#).

External Investment Plan

The External Investment Plan for Lebanon was [launched in Beirut](#) last 6 February.

The EU's [External Investment Plan](#) is an innovative and ambitious EU plan that encourages investment in the EU's partner countries in Africa and the EU Neighbourhood region. It promotes inclusive growth, job creation and sustainable development and so tackle some of the root causes of irregular migration. The External Investment Plan is adapted to the specific needs of partner countries and builds on the very successful model used within the EU, where the 'Juncker Plan' has already triggered more than €240 billion of investment.

The EIP encourages private investors to contribute to sustainable development in countries outside of Europe, it integrates into more traditional forms of assistance such as grants, a new generation of financial instruments— namely guarantees, risk sharing instruments, as well as the blending of grants and loans. It also includes a guarantee mechanism in order to crowd in private investments, where viable business proposals meet social needs, and where limited public funds can attract private money.

Overall, about €44 billion are expected to be mobilised under the EIP from 2017 until 2020 for Africa and EU's neighbourhood.
