

Press release: Pollution of brook costs Evesham food processing company over £59,000

Walsh Mushrooms, a mushroom packaging and distribution company operating at the Vale Park industrial estate in Evesham, appeared in Cheltenham Magistrates' Court yesterday (31 January 2017) and pleaded guilty to an offence of polluting the nearby Battleton Brook with the effluent of rotting mushrooms.

The company was fined £50,000, ordered to pay costs of £8,888.16, along with a £170 victim surcharge.

The prosecution was brought by the Environment Agency, following reports of pollution of the brook in April and May in 2015. The company was charged with one offence contrary to Regulations 12 (1) (b) and 38 (1) (a) of the Environmental Permitting (England and Wales) Regulations 2010.

On 24 April 2015, an Environment Agency officer visited the Battleton Brook in Evesham following a report it had turned black with a foul odour. The officer found the brook heavily polluted with organic matter, causing low levels of oxygen. Some frogs and a significant number of invertebrates downstream of Vale Park had been killed as a result of the pollution incident.

Officers, along with staff from Severn Trent Water Limited, identified the source of the pollution as a skip full of decomposing mushrooms on the Walsh Mushroom site, which was leaking into a surface water drain. Investigations of the drainage system suggested this had been ongoing for a number of days. Walsh Mushrooms were advised to remove the skip, undertake a cleaning operation, and conduct a full inspection of the site drainage system.

The Environment Agency stated that the company had failed to carry out the site drainage survey within a reasonable time after 24 April 2015. As a result, on 14 May 2015, officers attended the premises of Walsh Mushrooms again to examine the site drainage system and discovered that similar effluent was continuing to flow into it.

A representative of the company was interviewed and accepted that no training had been given to staff regarding the function or maintenance of the site drainage. No training had been given to staff regarding pollution risks associated with storing waste on the site. The company had failed to carry out any environmental risk assessments since it began operating at Vale Park in 2000.

The company, which had no previous convictions, expressed remorse for the incident. It acknowledged its failure to carry out environmental risk assessments or give appropriate training to company staff. The company stated

that it had co-operated with the Environment Agency's investigation and taken steps to remedy the issues at the site. These included the monthly sampling of fluids from the on-site inceptor, the training of staff and the storage of waste mushrooms in leak-proof containers.

Following the outcome of court proceedings, an Environment Agency spokesperson said:

Walsh Mushrooms failed to conduct any assessments of the risks their operations posed to the environment. They did not understand or maintain their drainage system and they failed to provide any training for staff on how to recognise or deal with pollution incidents. As a result of these failings, they caused significant damage to the brook. We will always seek to take action against those whose actions results in pollution of our rivers.

Many companies in the food processing industry fail to appreciate that food wastes can be highly polluting and cause serious damage to the environment. By following sensible environmental management procedures businesses will be better placed to comply with relevant legislation and reduce the risks damaging our stream and rivers.

If members of the public notice any signs of pollution in a river, stream or lake please report it to our Incident Hotline 0870 80 70 60.

[5-magnitude quake hits Tibet; no casualties reported](#)

A 5.0-magnitude earthquake jolted Zhongba County in southwest China's Tibet Autonomous Region at 6:07 p.m. Wednesday (Beijing Time). No casualties were reported.

The epicenter was monitored at 30.67 degrees north latitude and 83.34 degrees east longitude. The quake struck at a depth of 8 km, according to the China Earthquake Networks Center.

The epicenter, 124 kilometers from the county seat and 757 kilometers from Lhasa, is in an uninhabited zone and therefore the moderate quake caused no injuries and death of people and livestock, Wei Xince, deputy county governor, told Xinhua by phone.

Local authorities were checking damages to roads and makeshift livestock pens in the summer pasture.

Zhongba, which is in the western-most of Xigaze prefecture and borders Nepal, covers an area of 45,900 square kilometers and has a population of 24,800. It has an average altitude of over 5,000 meters.

[News story: Defence Minister meets poppy producing veterans going for gold](#)

The Poppy Factory employs 27 disabled veterans in Richmond to produce poppies and wreaths for the Royal Family and the Royal British Legion, but not content with making 12.5 million poppies last year, they are now looking to gold-plate their award-winning employment scheme.

They are also the country's leading employability organisation for disabled military veterans, providing a free service to veterans with a medical condition or impairment across England and Wales to get back into work.

Having helped almost 700 people into employment since 2010, the charity won the Ministry of Defence's Employer Recognition Silver Award last year for demonstrating great support to the Armed Forces community, and one of Deirdre Mills' key goals in her new role is to go for gold this year.

As part of the Armed Forces Covenant, which the government enshrined in law as a promise from the nation to ensure that the Armed Forces community are not at a disadvantage, the annual Defence Employer Recognition Scheme encourages employers to support defence and inspire others to do the same – and the Poppy Factory is certainly doing that.

Defence Minister Earl Howe said:

From helping veterans across the country overcome adversity and get back into work, to empowering those who have inspired me here in Richmond today to contribute to such an honourable cause, the magnificent work of the Poppy Factory is a credit to the Armed Forces Covenant and I'm thrilled to see Deirdre is driving for even more success.

Earl Howe with Poppy Factory CEO Deirdre Mills.

Their new CEO Deirdre Mills enjoyed a successful career in the British Army herself before getting involved in charity work.

She said:

Our support is really making a difference, whether it be providing career advice or meeting the more complex needs of some of the hardest-to-help individuals in society. There is also a growing number of disabled veterans who are being referred to us by other organisations; this is both testament to the quality of our work and indicative of the growing number of military charities that are now working together to produce the best results.

We are working hard to accommodate and champion the needs of disabled people and a Gold Award will really help us demonstrate this to our donors and the public – we need to secure over £2m in sustainable funding each year to provide our life-changing service.

Earl Howe met Gary Lock, an ex Serviceman from 4 Battalion Royal Regiment of Wales.

Amongst those who Earl Howe met today was Gary Lock, an ex Serviceman from 4 Battalion Royal Regiment of Wales, who has been working at the factory since September. Suffering from a serious hip injury, Gary got in touch with the Poppy Factory looking for employment.

He said:

I really enjoy coming to work, and it's great to have a laugh and a joke while you're doing something that's making a difference.

[Press release: South West Water prosecuted for crude sewage spill in Truro River](#)

South West Water will pay £54,000 in fines and costs for allowing untreated sewage to escape from a pumping station near Truro in Cornwall.

The case was brought by the Environment Agency.

On 16 March 2015 approximately 400,000 litres (88,000 gallons) of sewage was discharged from the Calenick Pumping Station into the Truro River via Calenick Creek.

Located south of Truro at the head of an estuary, the site receives sewage from surrounding villages and pumps it to Truro (Newham) Sewage Treatment Works for full treatment, including disinfection.

An investigation by the Environment Agency revealed two factors contributed to the illegal discharge.

In 2015 a contractor working on electrical panels at the pumping station forgot to restart the pumps. This meant sewage arriving in the wet well, a storage area within the site, wasn't pumped out.

Shortly before the spill, South West Water received three urgent alarms via telemetry warning that sewage had reached a high level in the sump, yet no pumps were running. The team responsible for sending a crew to the pumping station failed to telephone them with a 'high priority' request to attend the site. Instead, they messaged them electronically, forgetting the crew was at a meeting and wouldn't be able to get to Calenick for some time.

A short while later, further alarms were triggered warning the water company that sewage was now spilling from the pumping station outfall into Calenick Creek. The discharge continued for approximately four-and-a-half hours.

The pumping station lies within a Site of Special Scientific Interest (SSSI) and Special Area of Conservation close to commercial mussel and oyster beds at Grimes Bar and Malpas. Fortunately, the sewage spill occurred during the closed season for shellfish, although there was a risk of possible contamination of shellfish beds.

Mark Pilcher of the Environment Agency said:

It is vitally important water companies have robust procedures in place to ensure their sewage infrastructure assets perform appropriately.

Calenick Sewage Pumping Station is situated at the head of a very sensitive estuary containing important intertidal habitats and commercial shellfish beds. The unpermitted discharge of crude sewage to the estuary because the pump station was not switched on following a site inspection is unacceptable.

South West Water had earlier pleaded guilty to discharging crude sewage from Calenick Sewage Pumping Station contrary to Regulations 12(1)(a) and 38(2) of the Environmental Permitting Regulations 2010.

At a sentencing hearing at Truro Crown Court on 26 January 2017, South West Water was fined £50,000 and ordered to pay £4,000 costs.

[News story: UK and Egypt continue to tackle joint threats](#)

Chief of the Defence Staff Air Chief Marshal Sir Stuart Peach today welcomed his Egyptian counterpart to London to discuss shared challenges and threats, including that posed by Daesh.

Lieutenant General Mahmoud Hegazy was received by a ceremonial guard from the Household Cavalry Mounted Regiment, before holding discussions with Defence Secretary Sir Michael Fallon.

Discussion included shared security interests in Libya, planned Defence Engagement this year, including preparations for a future joint exercise involving counter-improvised explosive device (C-IED) training, and the UK's commitment to security in the region. Dates for the annual military staff talks were also confirmed, which aim to identify mutual training opportunities and areas where both nations can deepen their military relationship.

Defence Secretary Sir Michael Fallon said:

Stability abroad helps keep the streets of Britain safer and more secure.

With a strengthening relationship and as a key partner in defence and military matters, Britain is working with Egypt to combat threats, including from Daesh terrorism in Sinai and Libya.

Deepening our relationship with Egypt helps ensure stability in the Middle East and improves safety and security here in Britain.

The Defence Secretary [visited](#) Cairo in September, where he committed the UK to continue working alongside the Egyptian military, particularly through C-IED training.

As part of joint Defence work last year, Royal Navy warships HMS Ocean and Bulwark visited Egypt and met with ENS Tahya Misr to practice manoeuvres and participate in an air defence exercise.

10 Egyptian officers from their Mistral class helicopter carriers were also hosted on board, and ahead of the exercise HMS Ocean, visited the port of Alexandria, the first Royal Navy ship to do so for eight years.

Chief of the Defence Staff Air Chief Marshal Sir Stuart Peach said:

I was pleased to welcome Lt Gen Hegazy to London, and following a positive exchange I have personally reaffirmed our important Defence ties. We will continue to develop this military bond.

While in the UK, Lt Gen Hegazy is also due to visit Northwood Headquarters, where he will meet Commander of Joint Forces Command General Sir Chris Deverell, among other senior personnel.
