

welters October Company News

welters[®] are the Originators of Economic Development for Burial Authorities across the country and have supported and advised members, and developed new ideas for the industry, for over 30 years.

The company are nearing completion of an important cemetery development project which involves the use of previously unusable land within an extremely valuable resource once re-presented.

The impetus for this current development follows the successful delivery of similar schemes by **welters**[®], thus creating potentially major, if not *the* major revenue earning income generation.

In similar mode, a development has been completed utilising hand crafted 'standing stones' installed within a Neolithic styled mounded area. The company's proprietary stone memorial orbs have been produced in complimentary material, evoking ancient history.

Over its many years in the industry, **welters**[®] has tirelessly promoted and educated Cemetery and Crematorium Management in the benefits of their products and services. As a result, burial chambers and mausolea are now established as a standard service across the UK which **welters**[®] back with all support services to selected customers.

The **welters**[®] brand remains at the vanguard of design and innovation despite hazardous attempts by others to replicate their products and services. As a result, orders are increasing year on year, enabling further investment in manufacturing facilities and future expansion.

The company is also seeking to increase both production and site staff and would welcome enquiries from interested parties.

Please contact admin@welters-worldwide.com for further information.

Creative and Original

INNOVATION BY DESIGN

Creative and original

Over the past three decades, **welters**® have introduced new and innovative above and below ground interment and memorial facilities to the industry.

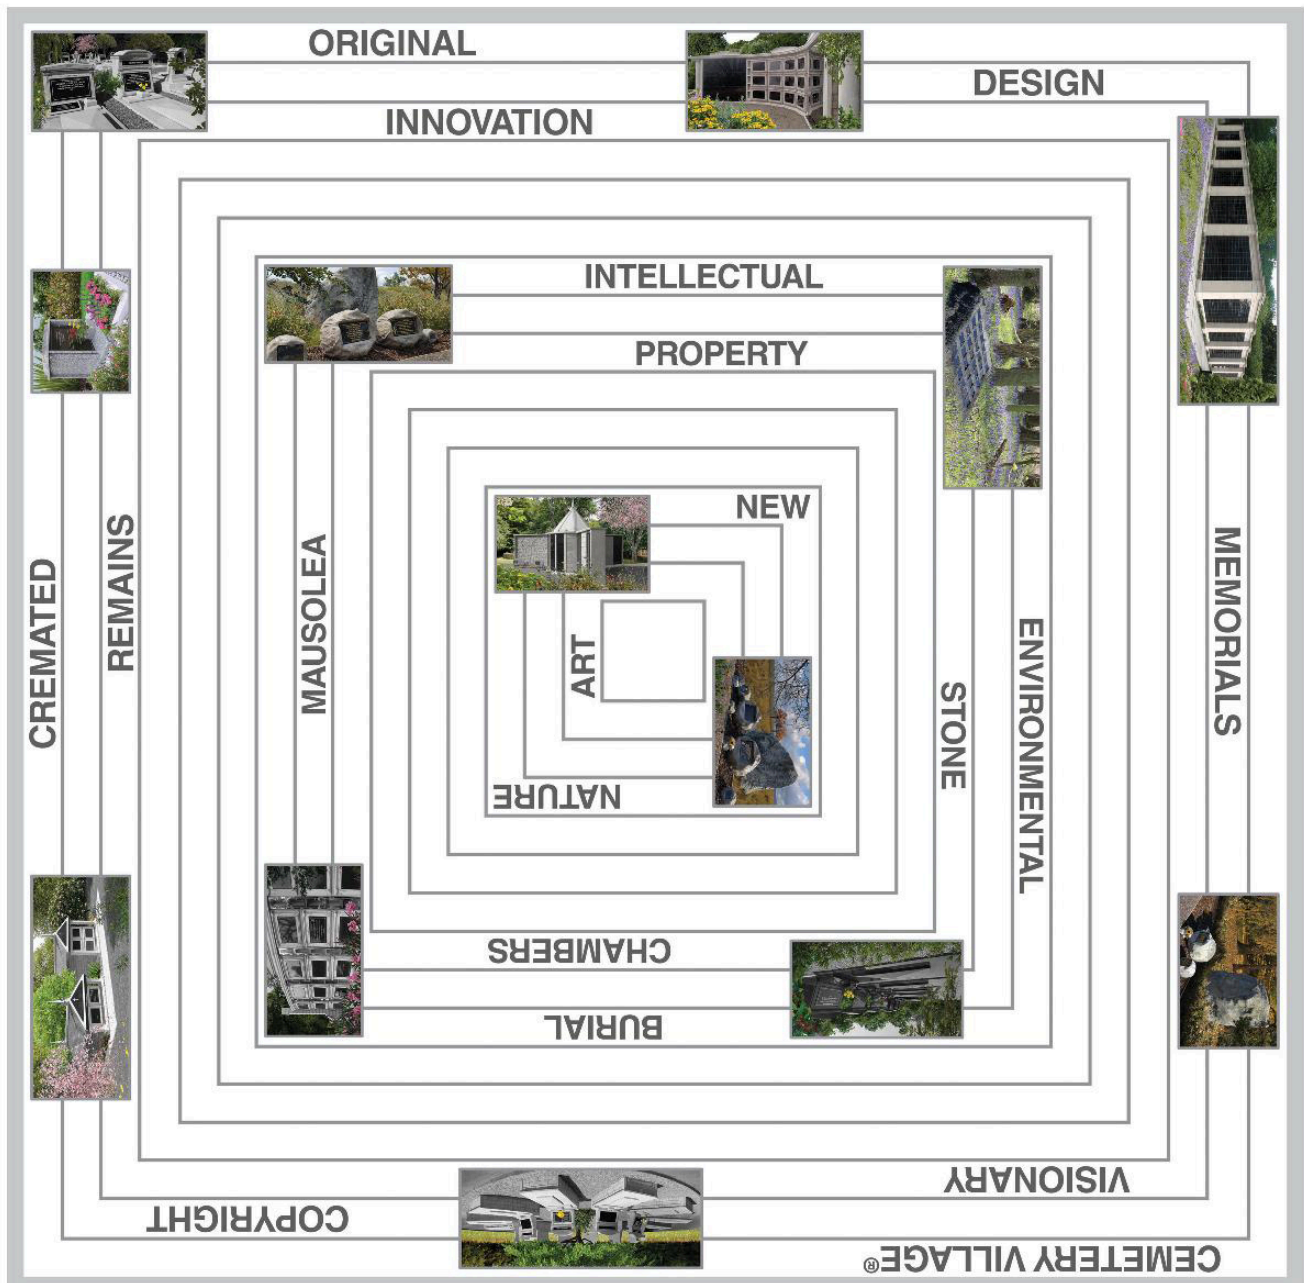

Today, many of these systems are accepted as standard nationwide and the company continues to produce new and original concepts, leading the way into the next decade.

[welters July Company News](#)

The popularity of **welters**[®] proprietary Stone Memorial Orbs continues with additional interests from multiple Burial Authorities. The unique aspect of the orbs enables them to be offered in situ as a facility for cremated remains interment, with the option to renew or be removed by the family at the end of the leased term. This creates a sustainable perpetuation of new orb placements and a continuation of income generation over time. The Stone Orbs are equally suited to both formal and naturalised settings.

The company has recently completed the provision of 57 single interment burial chambers for the Muslim community in an East Midlands cemetery. This is but one of several similarly large installations the company has provided elsewhere so far this year. The demand for burial chamber interment is increasing as is the requirement to provide above-ground facilities such as sarcophagi and mausolea.

Planning is underway to provide additional phases across a number of **welters**[®] **Cemetery Village** installations where below ground burial chambers, above ground mausolea, sarcophagi and cremated remains facilities are combined to create a harmonious integration of interment choices. These types of schemes are now well established and a proven model to achieve not only a respectful and meaningful place of interment and commemoration, but also the economic advancement of the Burial Authority going forward.

Pacific of Peace™ Entrance Arch
The Pacific of Peace™ Entrance Arch is
an artistic and symbolic structure
located at the entrance of the
University of the Pacific in
Stockton, California. The archway
represents the Pacific Ocean and
the university's commitment to
international peace and harmony.

By using the Tree of Life sculpture
to create the Pacific of Peace™ Entrance
Arch, the University of the Pacific
has created a unique and inspiring
landmark that symbolizes the
university's commitment to
international peace and harmony.
