

CHP investigates case of severe paediatric influenza B infection

The Centre for Health Protection (CHP) of the Department of Health is today (February 18) investigating a case of severe paediatric influenza B infection.

The case involves a two-year-old boy with underlying illness, who has presented with cough and shortness of breath since February 15. He was admitted to United Christian Hospital on February 16 and transferred to the paediatric intensive care unit for further management today.

His nasopharyngeal aspirate tested positive for influenza B virus upon laboratory testing. The clinical diagnosis was influenza B infection complicated with severe pneumonia. He is now in a serious condition.

Initial enquiries revealed that the patient had yet to receive seasonal influenza vaccination for the current season and had no recent travel history. His home contacts are asymptomatic so far. Investigations are ongoing.

The public should maintain good personal and environmental hygiene for protection against influenza and other respiratory illnesses:

- Receive seasonal influenza vaccination for personal protection;
- Wash hands with liquid soap and water properly whenever possibly contaminated;
- When hands are not visibly soiled, clean them with 70 to 80 per cent alcohol-based handrub as an effective alternative;
- Wash or clean hands frequently, especially before touching the mouth, nose or eyes, or after touching public installations such as handrails or door knobs;
- Cover the nose and mouth when sneezing or coughing, and wash hands thoroughly afterwards;
- Dispose of soiled tissue paper properly in a lidded rubbish bin;
- Put on a surgical mask when respiratory symptoms develop;
- Maintain good indoor ventilation;
- Avoid going to crowded or poorly ventilated public places; high-risk individuals may consider putting on surgical masks when staying in such places; and
- Maintain a balanced diet, exercise regularly, take adequate rest, do not smoke and avoid overstress.

For more information, please visit the CHP's [influenza page](#) and weekly [Flu Express](#).

[Survey shows growing public anger at Conservatives' mishandling of Brexit](#)

A survey by Kantar Public, published today (Sunday, 18 February), has found that 56% of the public judge the Conservatives' handling of Brexit as poor or very poor.

[Bus diversions during Glamis Road closure – an update #dundeewestend](#)

Further to my [update last Wednesday](#) about bus diversions during the temporary closure of Glamis Road between the roundabouts with Blackness Road and Dickson Avenue, the City Council has now advised of an amendment to this to accommodate access to Royal Victoria Hospital.

Here's the council's update :

"The Roads Maintenance Partnership has taken the decision to allow bus services X7/8 and 204 to access Royal Victoria Hospital.

Diversions for services X7/8 and 204 are now complicated and therefore not described in detail but in simple terms passengers normally boarding at Glamis Road can use Royal Victoria Hospital as a boarding point.

Due to the works bus services cannot stop on Glamis Road.

I think the vast majority of passengers will use the option of catching buses on Blackness Road or Ninewells Avenue."

New public notice :

PUBLIC NOTICE

**GLAMIS ROAD WILL CLOSE FROM
NINEWELLS AVENUE – BLACKNESS ROAD
ON MONDAY 19 FEBRUARY FOR 2 WEEKS.
BUS SERVICE DIVERIONS WILL BE IN PLACE
FROM 0830 ON 19 FEBRUARY.**

Service 22/73 towards Ninewells: Normal route to Blackness Road then left turn into Glamis Road – Perth Road – Ninewells Avenue – Dickson Avenue and then follow normal route.

Service 22/73 towards City Centre: Normal route to Dickson Avenue then via Ninewells Avenue – Perth Road – Glamis Road – Blackness Road and then follow normal route.

Service 235 towards Harris Academy: Normal route to Dickson Avenue then via Ninewells Avenue – Perth Road –and then follow normal route.

Service 235 towards Dryburgh: Normal route to Perth Road then via Ninewells Avenue Dickson Avenue and then follow normal route.

Service 204 towards Ninewells: Bus stops on Glamis Road near and opposite Elliot Road will NOT be served. Please board/alight on Glamis Drive or at RVH. Due to diversions please expect late running of service.

Service 204 towards City Centre: Bus stops on Glamis Road near and opposite Elliot Road will NOT be served. Please board/alight on Glamis Drive or at RVH. Due to diversions please expect late running of service.

Service X7/8 towards Perth: Glamis Road bus stops will NOT be served. Please board/alight at Royal Victoria Hospital.

Service X7/8 towards Aberdeen: Glamis Road bus stops will NOT be served. Please board/alight at Royal Victoria Hospital.

[Press release: Church spires to boost digital connectivity in rural areas](#)

The
[accord](#)
(PDF, 74.9KB, 3 pages)

, signed by the the National Church Institutions (NCIs) of the Church of England, the Department for Digital, Culture, Media and Sport (DCMS) and the Department for the Environment, Food and Rural Affairs (Defra) encourages the Church of England to use its buildings and other property to improve broadband, mobile and WiFi connectivity for local communities.

65% of Anglican churches and 66% of parishes in England are in rural areas and their locations at the heart of their communities mean they are often well placed to address connectivity and coverage problems.

The use of these churches, as well as other church properties and farm buildings, to host digital infrastructure will help to deliver the Government's commitment for everyone to get good quality mobile connectivity where they live, work and travel.

DCMS Secretary of State, Matt Hancock said:

Churches are central features and valued assets for local communities up and down the country. This agreement with the Church of England will mean that even a 15th century building can help make Britain fit for the future improving people's lives by boosting connectivity in some of our hardest-to-reach areas.

Through its Industrial Strategy, the Government is continually driving the UK's connectivity, telecommunications and digital sectors, and investing in the skills, industries and infrastructure of the future.

Improved digital connectivity will bring a range of benefits to rural communities, including:

- better access to online public services
- improved social interaction with family and friends
- effective online presence meaning that local businesses can extend their reach and better compete with other
- businesses, or in the case of tourism businesses, better attract visitors to the local area
- better access to skills and training which can lead to further local employment opportunities that deliver
- improved productivity and can boost the wider local economy.

The Dioceses of Chelmsford and Norwich are already supporting programmes which use Church buildings to improve connectivity in rural areas. It is hoped the accord will be instrumental in encouraging more local dioceses and parishes to positively consider how they can use their property in this way.

The Bishop of Chelmsford, Rt Revd Stephen Cottrell, said:

We know that rural churches in particular have always served as a hub for their communities. Encouraging churches to improve connectivity will help tackle two of the biggest issues rural areas face – isolation and sustainability.

The Diocese of Chelmsford has been pioneering this approach with County Broadband since 2013. Our work has significantly improved rural access to high-speed broadband.

Many new forms of technology are available to improve internet access in rural areas and I hope that this partnership between the Church of England and the Government will help rural churches consider how they can be part of the solution. I know that many churches already help people access the internet and provide digital skills training, and this Accord is a natural extension of great work already occurring.

The Bishop of Norwich, Rt Revd Graham James, said:

I welcome this agreement. It builds on what we have been seeking to do in the Diocese of Norwich since 2011 with the creation of WiSpire, a company seeking to use church towers and spires to enable Wifi connectivity in communities, especially in rural locations.

Our parish churches are a truly national network, and to use them creatively to create new forms of connectivity enhances their value for the communities they serve.

Hamish Macleod, Director Mobile UK, said:

Mobile UK welcomes this announcement from Government and the Church of England, which emphasises the benefits of mobile connectivity to local communities.

Where there is a need, a suitable building is available and appropriate terms can be agreed, the mobile operators will continue to extend their use of churches to increase mobile coverage and capacity, while respecting the church environment.

Rural Affairs Minister Lord Gardiner said:

It is vitally important people living in the countryside have the same opportunities as those in urban areas, and that means having strong mobile and broadband infrastructures in place.

This initiative marks an important step in our continued drive to connect better our rural communities and bridge the digital divide.

Clear guidance set out by both the Church and Historic England ensures that any telecoms infrastructure deployed does not impact on the character and architectural or historic significance of churches.

Under the accord the Government has also pledged to provide advice for parishes and dioceses to enable them to consider supporting digital connectivity and to develop the necessary skills for digital infrastructure projects.

There is the possibility that similar accords could be made with other faith communities that have similar estates.

ENDS

Notes to Editors

Owing to varying terrain and different community needs the Accord covers all types of mobile and broadband technologies – churches are free to explore different options to meet the needs of their communities.

There are more than 120 cases of broadband and mobile services being delivered from parish churches across the country. These take a number of forms – from wireless transmitters in church spires and church towers, to aerials, satellite dishes, and more traditional fibre cables. The Church of England has just over 16,000 church buildings in 12,500 parishes.

[Church of England](#) and [Historic England](#) guidance on the installation of telecoms equipment in churches

At a round table meeting with rural Church of England Bishops, convened by the Bishop of St Albans, Rt Rev Alan Smith, and representatives of the fixed and mobile operators on 13 December 2017, chaired by the then Minister for Digital, Matt Hancock, and the Minister for Rural Affairs and Biosecurity, Lord Gardiner, it was agreed that an accord between the Church and Government would help make clear the importance of connectivity and support in principle for using Church assets to host fibre and mobile infrastructure.

on Use of Church Land and Buildings to Support Digital Connectivity

[Press release: The visit of Lord Astor](#)

to Oman

Updated: Added translation

Lord Astor of Hever, the UK Prime Minister's Trade Envoy visited Oman on 11 – 15 February 2018. His role is to work with the UK Department for International Trade to support and encourage the growth of business links and partnerships between the UK and Oman, and to promote the UK as a trade partner of choice for Oman. His visit reinforced the importance the UK places on its bilateral trade relationship with Oman.

During his visit, Lord Astor had meetings with a range of senior government and business officials. He had a series of key meetings with senior officials to discuss Oman – UK business trade relations and focused on education & training, touring the new Takatuf-Petrofac Oman Centre of Excellence and meeting with the National Training Fund to discuss vocational training. He also hosted an Oil & Gas networking reception and spoke about the strength of the bilateral relationship in oil and gas, both historically and looking forward.

At the end of his visit, Lord Astor said:

“I was pleased to visit Oman again in my role as the Prime Minister's Trade Envoy. Oman is a country I have a long affinity with and it is important to the UK. As a Trade Envoy, I work closely with the Trade Team at the British Embassy in Muscat and organisations in the UK to help boost links and create opportunities for UK and Omani businesses to work together.

The UK is the largest source of Foreign Direct Investment (FDI) in Oman by far, accounting for over 45% of total FDI. The majority of this investment is in the oil and gas sector in Oman, both in upstream exploration and production and, increasingly, in the development of downstream oil and gas industry. Bilateral cooperation on education and training, both within oil and gas and across the board, underpins economic development, and I am delighted to see British industry working with Omani institutions to deliver high quality training in Oman. There is a strong appetite in Oman to see more trade with the UK and we are keen to continue to build, strengthen and support that relationship.”
