

Barriers to research beyond cannabinoids: call for evidence

Further to the [call for evidence issued in February 2020 regarding barriers to legitimate research on 3rd generation synthetic cannabinoids](#), the ACMD Barriers to Research working group would like to issue a second call to researchers to help in their formulation of advice to government. This time the ACMD would like researchers to look beyond synthetic cannabinoids, and provide evidence on barriers to legitimate research on all controlled drugs.

The deadline, which has been extended, to provide written feedback using the attached questionnaire is now 31 May 2021. Please return your submission to acmd@homeoffice.gov.uk.

We are extending the deadline for the call for evidence.

This questionnaire is not in an accessible format. If you need help completing it or are unable to use Microsoft Word please email acmd@homeoffice.gov.uk.
