

Better facilities at Wokingham station?

I have received a follow up letter today from First Rail, who start the new South West train franchise in August. I held a meeting with them last month to discuss improvements for travellers using Wokingham Station.

They say they do wish to introduce a click and collect facility at the Station for people to pick up goods they have bought on line on their way home. This is subject to reaching commercial agreement on how to do it.

They also say they want to introduce automatic number plate recognition for car parking at the Station. This would enable travellers to register their Debit card for automatic payment. They will also allow on line purchasing of car park season tickets. The aim is to make it quicker and easier to park with these additional choices.
