

BGS statement in response to OGA reports on induced seismicity – Saturday 2 November 2019

The OGA has published a series of commissioned reports on induced seismicity. BGS seismologists Brian Baptie and Margarita Segou were co-authors of one of these reports entitled 'Statistical Modelling of the Preston New Road Seismicity: Towards Probabilistic Forecasting Tools' together with Simone Mancini (Bristol University/BGS) and Max Werner from Bristol University.
