

Catch recording service: Routine website maintenance 13 October

News story

The catch recording website for under 10m vessels will be unavailable on Thursday 13 October, 08:00-13:00 due to routine maintenance.

This also means that advisors will not be able to log records by phone. However, catches can still be recorded 24/7 using the 'Record Your Catch' app or by calling the automated helpline.

We recommend you download the app in advance to familiarise yourself with the system. All records completed using the app will be saved to your device and uploaded to the system as soon as the website maintenance has been completed.

The app, which you can download for [Android](#) or [Apple](#), allows you to record your catch in an area without a mobile signal – watch our useful video 'how to' guide below.

[YouTube](#).

Alternatively, register your catch through our automated phone service: 0300 0203 788.
