

CFS investigates suspected cases of breaching Food Safety Order on aquatic and seaweed products imported from Japan

The Centre for Food Safety (CFS) of the Food and Environmental Hygiene Department announced today (November 3) that an aquatic product and seaweed products from regulated Japanese metropolis/prefecture were suspected to be in breach of the relevant Food Safety Order when the CFS inspected food imported from Japan. The products concerned have been marked and sealed by the CFS and have not entered the market. The CFS is following up on the cases.

A spokesman for the CFS said, "During inspections of the food labels of the concerned consignments of food imported from Japan, the CFS respectively found a pack of chilled oyster meat and two seaweed products which were processed in Ibaraki Prefecture, as well as a seaweed product suspected to have been processed in Tokyo, after the Order was issued. The importers concerned are thus suspected of breaching the relevant Order."

According to the Order, all aquatic products originating from the 10 metropolis/prefectures, namely Tokyo, Fukushima, Chiba, Tochigi, Ibaraki, Gunma, Miyagi, Niigata, Nagano and Saitama, are prohibited from being imported into and supplied in Hong Kong if they are harvested, manufactured, processed or packed on or after August 24, 2023, including all live, chilled, frozen, dried or otherwise preserved aquatic products, sea salt, and unprocessed or processed seaweed.

The CFS will continue to follow up on the incidents and take appropriate action, including informing the Japanese authorities concerned of the incidents. Prosecution will be instituted against the importers concerned should there be sufficient evidence. The investigation is ongoing.
