

CHP investigates four additional confirmed cases of COVID-19

The Centre for Health Protection (CHP) of the Department of Health (DH) announced that as of 0.00am, November 18, the CHP was investigating four additional confirmed cases of coronavirus disease 2019 (COVID-19), taking the number of cases to 12 396 in Hong Kong so far (comprising 12 395 confirmed cases and one probable case).

The newly reported cases are imported cases which involved mutant strains. The patients comprise four males, aged between 28 to 54 years. Two of them arrived in Hong Kong from Group A specified places (high-risk) and the remaining two from Group B specified places (medium-risk). Two patients tested positive during the "test-and-hold" arrangement upon arrival at the Temporary Specimen Collection Centre (TSCC) at Hong Kong International Airport and the other two tested positive during quarantine.

A total of 39 cases have been reported in the past 14 days (November 4 to 17) and all of them are imported cases.

According to the testing and quarantine arrangements for local COVID-19 cases with mutant strains, the CHP reminded that persons who resided or worked within the same building as the residence of relevant cases will be subject to compulsory testing on specified dates in accordance with the announcement by the DH. They will also be required to undergo self-monitoring until the 21st day (see the details of the buildings and dates of testing at www.coronavirus.gov.hk/pdf/CTN_Specified_premises_and_Dates_of_Testing.pdf).

Specified persons in relation to the following specified premises are also reminded to undergo compulsory testing in accordance with the compulsory testing notice tomorrow (November 19):

- Tower 3, Ocean Court, 3 Aberdeen Praya Road, Aberdeen

The CHP's epidemiological investigations and relevant contact tracing on the confirmed cases are ongoing. For case details and contact tracing information, please see the Annex or the "COVID-19 Thematic Website" (www.coronavirus.gov.hk).

â€‹The spokesman for the CHP stressed, "The global situation of COVID-19 infection remains severe and there is a continuous increase in the number of cases involving mutant strains that carry higher transmissibility, and there are also reports of breakthrough infections in some vaccinated individuals. The CHP strongly urges members of the public to avoid all non-essential travel outside Hong Kong, in particular to specified places with high risk under the Prevention and Control of Disease (Regulation of Cross-boundary Conveyances and Travellers) Regulation (Cap. 599H)."
