

## CHP investigates nine additional confirmed cases of COVID-19

The Centre for Health Protection (CHP) of the Department of Health (DH) announced that as of 0.00am, October 15, the CHP was investigating nine additional confirmed cases of coronavirus disease 2019 (COVID-19), taking the number of cases to 12 286 in Hong Kong so far (comprising 12 285 confirmed cases and one probable case).

The newly reported cases are imported cases. Eight cases involved mutant strains while the mutation test result of the remaining case is pending. The patients comprise seven females and two males, aged 3 to 68. Six of them arrived in Hong Kong from Group A specified places (high-risk) and the remaining three arrived from Group B specified places (medium-risk). Among them, case 12290 is a close contact of an imported case confirmed previously (case 12229) and he tested positive yesterday (October 14) at the Penny's Bay Quarantine Centre. Four of the other cases tested positive during the "test-and-hold" arrangement upon arrival at the Temporary Specimen Collection Centre at Hong Kong International Airport and the remaining four patients tested positive during quarantine.

A total of 59 cases have been reported in the past 14 days (October 1 to 14) including a local case with unknown sources, while the rest are imported cases.

As a passenger flight (AC007) operated by Air Canada arriving from Vancouver, Canada, to Hong Kong on October 13 had one passenger confirmed to have COVID-19 by arrival testing, and one passenger failed to comply with the requirements specified under the Prevention and Control of Disease (Regulation of Cross-boundary Conveyances and Travellers) Regulation (Cap. 599H), the DH thus invoked Cap. 599H to prohibit the landing of passenger flights from Vancouver operated by Air Canada in Hong Kong from October 16 to 29.

According to the testing and quarantine arrangements for local COVID-19 cases with mutant strains, the CHP reminded people that persons who resided or worked within the same building as the residence of relevant cases will be subject to compulsory testing on days 3, 7, 12 and 19 following the announcement of the relevant confirmed cases by the DH. They will also be required to undergo self-monitoring until the 21st day. Relevant deadlines of compulsory testing for respective specified premises are listed on the Government's website at [www.coronavirus.gov.hk/pdf/CTN\\_Specified\\_premises\\_and\\_Dates\\_of\\_Testing.pdf](http://www.coronavirus.gov.hk/pdf/CTN_Specified_premises_and_Dates_of_Testing.pdf).

Specified persons in relation to the following specified premises are also reminded to undergo compulsory testing in accordance with the compulsory testing notice tomorrow (October 16):

- Jones Hive, 8 Jones Street, Causeway Bay
- Block C, Hankow Centre, Tsim Sha Tsui
- Tower 10, Phase 3 – The Graces, Providence Bay, Tai Po

â€‹The CHP's epidemiological investigations and relevant contact tracing on the confirmed cases are ongoing. For case details and contact tracing information, please see the Annex or the list of buildings with confirmed cases of COVID-19 in the past 14 days and the latest local situation of COVID-19 available on the website "COVID-19 Thematic Website" ([www.coronavirus.gov.hk](http://www.coronavirus.gov.hk)). The DH has also been closely monitoring the mutant strains of SARS CoV-2 and has uploaded the relevant information on Variants of Concern (VOCs) and Variants of Interest (VOIs), based on whole genome sequencing results, to the CHP's website ([www.chp.gov.hk/en/statistics/data/10/641/100135/6973.html](http://www.chp.gov.hk/en/statistics/data/10/641/100135/6973.html)). The data will be updated regularly.

The spokesman for the CHP stressed, "The global situation of COVID-19 infection remains severe and there is a continuous increase in the number of cases involving mutant strains that carry higher transmissibility, and there are also reports of breakthrough infections in some vaccinated individuals. The CHP strongly urges members of the public to avoid all non-essential travel outside Hong Kong, in particular to specified places with high risk under the Prevention and Control of Disease (Regulation of Cross-boundary Conveyances and Travellers) Regulation (Cap. 599H)."

The spokesman reminded, "If travel is unavoidable, the CHP highly recommends the public to be fully vaccinated with COVID-19 vaccines before their departure. They should avoid participating in non-essential mass gatherings or events held outside Hong Kong. They should continue to wear a surgical mask and maintain strict personal and environmental hygiene at all times. Parents are also urged to avoid taking unvaccinated children travelling."

The Government has launched the COVID-19 Vaccination Programme. Members of the public are encouraged to get vaccinated. Details of the programme can be found at the designated website ([www.covidvaccine.gov.hk](http://www.covidvaccine.gov.hk)). Generally speaking, COVID-19 vaccination can prevent COVID-19 infection, and if infected, reduce the risk of severe disease and death from COVID-19.

The CHP called on members of the public to pay attention to their health condition, seek medical advice early and undergo COVID-19 nucleic acid testing as soon as possible if respiratory symptoms develop. They should also maintain strict personal and environmental hygiene at all times to protect themselves against infection and prevent the spread of the disease in the community. For more related health advice, please refer to the website [www.coronavirus.gov.hk/eng/health-advice.html](http://www.coronavirus.gov.hk/eng/health-advice.html).
