

CHP investigates outbreak of acute gastroenteritis at kindergarten-cum-child care centre in Tuen Mun

The Centre for Health Protection (CHP) of the Department of Health is today (October 26) investigating an outbreak of acute gastroenteritis (AGE) at a kindergarten-cum-child care centre in Tuen Mun, and hence reminded the public and management of institutions to maintain personal and environmental hygiene against AGE.

The outbreak involves seven boys and 13 girls aged 2 to 5, as well as one female staff member, who developed fever, diarrhoea and vomiting since October 24. Eighteen sought medical attention and two of them required hospitalisation for further management. All patients have been in a stable condition.

Upon laboratory testing, the stool specimen of one affected child tested positive for norovirus and sapovirus.

Officers of the CHP conducted a site visit and provided health advice to the staff of the school concerning proper and thorough disinfection, proper disposal of vomitus, and personal and environmental hygiene. The school has been put under medical surveillance.

The CHP's investigations are ongoing.

A spokesman for the CHP advised members of the public to take heed of the following preventive measures against gastroenteritis:

- Ensure proper personal hygiene;
- Wash hands thoroughly before handling food and eating, after using the toilet or after changing diapers;
- Wear gloves when disposing of vomitus or faecal matter, and wash hands afterwards;
- Clean and disinfect contaminated areas or items promptly and thoroughly with diluted household bleach (by adding one part of bleach containing 5.25 per cent sodium hypochlorite to 49 parts of water). Wash hands thoroughly afterwards;
- Maintain good indoor ventilation;
- Pay attention to food hygiene;
- Use separate utensils to handle raw and cooked food;
- Avoid food that is not thoroughly cooked;
- Drink boiled water; and
- Do not patronise unlicensed food premises or food stalls.

The public may visit the CHP's website (www.chp.gov.hk) or call the

Health Education Hotline (2833 0111) for more information.
