

CHP investigates three additional confirmed cases of COVID-19

The Centre for Health Protection (CHP) of the Department of Health (DH) announced that as of 0.00am, November 22, the CHP was investigating three additional confirmed cases of coronavirus disease 2019 (COVID-19), taking the number of cases to 12 405 in Hong Kong so far (comprising 12 404 confirmed cases and one probable case).

The newly reported cases are imported cases which involved mutant strains. The patients comprise one male and two females, aged 23 to 43. All of them arrived in Hong Kong from Group A specified places (high-risk). Two patients tested positive during the "test-and-hold" arrangement upon arrival at the Temporary Specimen Collection Centre at Hong Kong International Airport and one tested positive during quarantine at the designated quarantine facility (Penny's Bay Quarantine Centre). The CHP has announced the details of one of the cases (12409) yesterday night (November 21) (www.info.gov.hk/gia/general/202111/21/P2021112100613.htm).

A total of 33 cases have been reported in the past 14 days (November 8 to 21) and all of them are imported cases.

The CHP's epidemiological investigations and relevant contact tracing on the confirmed cases are ongoing. For case details and contact tracing information, please see the Annex or the "COVID-19 Thematic Website" (www.coronavirus.gov.hk).

â€‹The spokesman for the CHP stressed, "The global situation of COVID-19 infection remains severe and there is a continuous increase in the number of cases involving mutant strains that carry higher transmissibility, and there are also reports of breakthrough infections in some vaccinated individuals. The CHP strongly urges members of the public to avoid all non-essential travel outside Hong Kong, in particular to specified places with high risk under the Prevention and Control of Disease (Regulation of Cross-boundary Conveyances and Travellers) Regulation (Cap. 599H)."
