

Collection: Renewable Heat Incentive statistics

Updated: September 2018 RHI deployment stats published.

This statistical series provides deployment data for:

- the non-domestic Renewable Heat Incentive (RHI) introduced in Great Britain in November 2011 to support the uptake of renewable heat in the non-domestic sector
- the domestic RHI introduced in Great Britain in April 2014 to encourage a switch to renewable heating systems in the domestic sector.

Datasets are published on a monthly basis with supplementary statistical information published quarterly.

For further information or questions about these statistics, email Chris.Fairbanks@beis.gov.uk.

Historical releases are available on the [National Archives](#).
