

Construction company and employee sentenced after worker killed

A construction company and one of its employees have been sentenced for health and safety breaches after another worker was struck by an excavator and was killed.

Southwark Crown Court heard how, on 2 March 2014, during night work at a construction site in Stratford a site operative, Kevin Campbell, was struck by an excavator mounted vibrator (EMV) attached to a 35-tonne excavator that he was working in close proximity to. Mr Campbell had been disconnecting lifting accessories from a metal pile that had just been extracted from the ground when he was crushed against a concrete wall a short distance away. Mr Campbell died from his injuries. Another site operative who was directly next to him also faced a risk of being struck.

An investigation by the Health and Safety Executive found the construction company which was the principal contractor; Clancy Docwra Limited, failed to ensure the safety so far as is reasonably practicable of its employees and of others who were not their employees working on the site. The investigation also found that Daniel Walsh, who was the site supervisor for the site and the person operating the excavator at the time, failed to take reasonable care for other persons on site at the time.

Clancy Docwra Limited of Coppermill Lane, Harefield, Middlesex pleaded not guilty to breaching Section 2(1) and 3(1) of the Health & Safety at Work etc. Act 1974. The company was fined £1,000,000 and ordered to pay costs of £108,502.30.

Daniel Walsh of Eastcote, Orpington, Kent pleaded not guilty to breaching Section 7(a) of the Health & Safety at Work etc. Act 1974 and was given a 6 month custodial sentence, suspended for 12 months and ordered to pay costs of £15,000.

Speaking after the hearing, HSE inspector Darren Alldis said:

“This death was wholly preventable and serves as a reminder as to why it is so important for companies and individuals to take their responsibilities to protect others seriously and to take the simple actions necessary to eliminate and minimise risks.

“If the risks had been properly considered by the company, and simple and appropriate control measures were put in place, then the likelihood of such an incident occurring would have been significantly reduced. Informing all site operatives of the specific risks they face when carrying out such tasks and the control measures required of exclusion zones, the importance of

communication and the mandatory use of excavator safety levers were simple actions that should have been put in place and their effectiveness monitored.

“All those with legal responsibilities must be clear that HSE will not hesitate to take appropriate enforcement action including where appropriate prosecution against those that fall below the required standards”.

Notes to Editors:

1. The Health and Safety Executive (HSE) is Britain’s national regulator for workplace health and safety. We prevent work-related death, injury and ill health through regulatory actions that range from influencing behaviours across whole industry sectors through to targeted interventions on individual businesses. These activities are supported by globally recognised scientific expertise. hse.gov.uk
