

Construction company in court over inadequate health and safety standards

A national construction company has been fined after an unannounced inspection by Health and Safety Executive inspectors found poor welfare standards, dangerous electrical systems and inadequate health and safety provision on site.

Liverpool Magistrates' Court heard how concerns had been raised regarding the health and safety standards at the construction site of the former Tobacco Warehouse, Stanley Dock, Liverpool, being renovated by Abercorn Construction Limited. A site inspection found the welfare cabin used by employees to be in poor condition, containing exposed live wires and damaged electrical sockets, a mouldy dishwasher and an accumulation of rubbish both inside and outside the cabin with the potential to attract vermin.

A general site inspection found numerous uncontrolled high risks such as a damaged cable on a 400v transformer, insufficient fire alarms, a lack of fire extinguishers and signage indicating emergency routes and multiple examples of unprotected edges and openings exposing workers to risk of a fall from height. There was also inadequate pedestrian and vehicle segregation, poor order, poor lighting and the risk of exposure to live electrical conductors.

The investigation by the Health and Safety Executive (HSE) found the company had failed to effectively plan, manage and monitor the works which had resulted in these health and safety issues arising on site. These risks had already been highlighted to the company in previous written enforcement. Despite compliance being achieved, poor standards had been allowed to develop again.

Abercorn Construction Limited of 50 Bedford Street, Belfast pleaded guilty to breaching Regulation 13(1) of the Construction (Design and Management) Regulations 2015 and Regulation 6(3) of the Work at Height Regulations 2005 and was fined £77,000 and ordered to pay costs of £2,025.52.

After the hearing, HSE inspector John Padfield commented: "This type of proactive prosecution will highlight to the industry that HSE will not hesitate to prosecute companies for repeated breaches of the law.

"Good management of health and safety on site is crucial to the successful delivery of a construction project and principal contractors have an important role in managing the risks of construction work and providing strong leadership to ensure standards are understood and followed"

Notes to Editors:

1. The Health and Safety Executive (HSE) is Britain's national regulator for workplace health and safety. We prevent work-related death, injury and ill health through regulatory actions that range from influencing

behaviours across whole industry sectors through to targeted interventions on individual businesses. These activities are supported by globally recognised scientific expertise. www.hse.gov.uk
