

Consumer Price Indices for November 2019

The Census and Statistics Department (C&SD) released today (December 20) the Consumer Price Index (CPI) figures for November 2019. According to the Composite CPI, overall consumer prices rose by 3.0% in November 2019 over the same month a year earlier, slightly smaller than the corresponding increase (3.1%) in October 2019. Netting out the effects of all Government's one-off relief measures, the year-on-year rate of increase in the Composite CPI (i.e. the underlying inflation rate) in November 2019 was 2.9%, smaller than that in October 2019 (3.1%). The smaller increase in November was mainly due to the decreases in the charges for package tours as well as inbound and outbound transport fares.

On a seasonally adjusted basis, the average monthly rate of increase in the Composite CPI for the three-month period ending November 2019 was 0.1%, and that for the three-month period ending October 2019 was 0.2%. Netting out the effects of all Government's one-off relief measures, the corresponding rates of increase were 0.1% and 0.2% respectively.

Analysed by sub-index, the year-on-year rates of increase in the CPI(A), CPI(B) and CPI(C) were 3.5%, 2.9% and 2.5% respectively in November 2019, as compared to 3.5%, 3.1% and 2.9% respectively in October 2019. Netting out the effects of all Government's one-off relief measures, the year-on-year rates of increase in the CPI(A), CPI(B) and CPI(C) were 3.6%, 2.8% and 2.4% respectively in November 2019, as compared to 3.6%, 3.0% and 2.8% respectively in October 2019.

On a seasonally adjusted basis, for the three-month period ending November 2019, the average monthly rates of increase in the seasonally adjusted CPI(A), CPI(B) and CPI(C) were 0.1%, 0.1% and 0.2% respectively. The corresponding rates of increase for the three-month period ending October 2019 were all 0.2%. Netting out the effects of all Government's one-off relief measures, the corresponding average monthly rates of increase in the seasonally adjusted CPI(A), CPI(B) and CPI(C) for the three-month period ending November 2019 were 0.1%, 0.1% and 0.2% respectively, and the corresponding rates of increase for the three-month period ending October 2019 were all 0.2%.

Amongst the various components of the Composite CPI, year-on-year increases in prices were recorded in November 2019 for food (excluding meals bought away from home) (13.9%), miscellaneous goods (3.3%), housing (3.0%), meals bought away from home (2.2%), transport (2.1%) and miscellaneous services (1.5%).

On the other hand, year-on-year decreases in the components of the Composite CPI were recorded in November 2019 for electricity, gas and water (-6.4%); clothing and footwear (-3.5%); durable goods (-2.3%) as well as alcoholic drinks and tobacco (-0.1%).

Taking the first 11 months of 2019 together, the Composite CPI rose by 2.9% over a year earlier. The respective increases in the CPI(A), CPI(B) and CPI(C) were 3.3%, 2.7% and 2.6% respectively. The corresponding increases after netting out the effects of all Government's one-off relief measures were 3.0%, 3.5%, 2.8% and 2.6% respectively.

For the three months ending November 2019, the Composite CPI rose by 3.1% over a year earlier, while the CPI(A), CPI(B) and CPI(C) rose by 3.5%, 3.0% and 2.8% respectively. The corresponding increases after netting out the effects of all Government's one-off relief measures were 3.1%, 3.6%, 3.0% and 2.7% respectively.

For the 12 months ending November 2019, the Composite CPI was on average 2.8% higher than that in the preceding 12-month period. The respective increases in the CPI(A), CPI(B) and CPI(C) were 3.3%, 2.7% and 2.6% respectively. The corresponding increases after netting out the effects of all Government's one-off relief measures were 3.0%, 3.5%, 2.8% and 2.6% respectively.

Commentary

A Government spokesman said that the underlying consumer price inflation rate eased further to 2.9% in November. Price pressures on many major CPI components abated somewhat, though food inflation remained visible due to elevated pork prices.

Looking ahead, overall inflation pressures will likely be contained in the near term by mild imported inflation and easing local cost pressures amid sub-par economic conditions. The Government will continue to monitor the inflation situation closely, particularly the impact on the lower-income people.

Further information

The CPIs and year-on-year rates of change at section level for November 2019 are shown in Table 1. The time series on the year-on-year rates of change in the CPIs before and after netting out the effects of all Government's one-off relief measures are shown in Table 2. For discerning the latest trend in consumer prices, it is also useful to look at the changes in the seasonally adjusted CPIs. The corresponding time series on the average monthly rates of change during the latest three months for the seasonally adjusted CPIs are shown in Table 3. The rates of change in the original and the seasonally adjusted Composite CPI and the underlying inflation rate are presented graphically in Chart 1.

More detailed CPI data (including year-on-year comparison, month-to-month comparison, seasonally adjusted data series and the CPIs by the Classification of Individual Consumption According to Purpose (COICOP)) are available in the monthly reports.
