## **Commission proposes to invest EUR 1 billion in world-class European supercomputers**

At a [press conference](#) this morning by Commissioners Carlos **Moedas** and Mariya **Gabriel**, the Commission announced its plan to invest jointly with the Member States in building a world-class European supercomputing infrastructure.

Supercomputers are needed to process ever larger amounts of data and bring benefits to society in many areas from health care and renewable energy to car safety and cybersecurity. Today's step is crucial for the EU's competitiveness and independence in the data economy. Andrus **Ansip**, European Commission Vice-President for the Digital Single Market, said:

*"Supercomputers are the engine to power the digital economy. It is a tough race and today the EU is lagging behind: we do not have any supercomputers in the world's top-ten. With the EuroHPC initiative we want to give European researchers and companies world-leading supercomputer capacity by 2020 – to develop technologies such as artificial intelligence and build the future's everyday applications in areas like health, security or engineering."* Mariya **Gabriel**, Commissioner for Digital Economy and Society added: *"Supercomputers are already at the core of major advancements and innovations in many areas directly affecting the daily lives of European citizens. They can help us to develop personalised medicine, save energy and fight against climate change more efficiently. A better European supercomputing infrastructure holds great potential for job creation and is a key factor for the digitisation of industry and increasing the competitiveness of the European economy."* A [press release](#), [Q&A](#) and [factsheet](#) are available online. ## **First meeting of Sustainable Development Multi-Stakeholder Platform**

The Commission's high level multi-stakeholder platform on the follow up to the United Nations Sustainable Development Goals in the EU met for the first time on Wednesday 10 January. The launch of this platform reflects a new approach which brings together stakeholders to support the Commission's work. Representatives from academia, non-governmental organisations (NGOs), businesses, civil society, the European Economic and Social Committee and the European Committee of the Regions came together to support and advise the Commission in delivering the SDGs at EU level. International organisations such as the World Bank, the United Nations and the European Sustainable Development Network (ESDN) participated as observers. Commission First Vice-President Frans **Timmermans**, who chairs the platform, said: *"Sustainability is a European brand, and sustainable development is at the heart of the European Commission's agenda. We need to work from the grassroots up and use the knowledge and skills of a wide range of stakeholders to reshape our economies and societies. The multi-stakeholder platform is an opportunity for experts to come together and learn from each other. I am looking forward to working closely together to develop the vision and the tools we need to succeed in*

*delivering on the Sustainable Development Goals.” Vice-President Jyrki **Katainen**, added: “The circular economy and sustainable finance are examples of an innovative and European way to ensure that our investments not only create economic growth but at that they do so while bringing new benefits to our planet and our citizens. The experience that the platform members bring will help us deliver real results in this crucial work.” More information is available in this [press release](#). ## **L’Europe finance un réseau de transport urbain moderne à Varsovie**

Aujourd’hui la Commission a adopté un paquet d’investissement de plus de 448 millions d’euros venant du [Fonds de Cohésion](#) pour financer l’extension de la ligne deux du métro de la capitale polonaise sur cinq nouvelles stations, de l’Ouest au Nord-est de la ville, passant par les quartiers de Wola, Bemowo et Targówek. La Commission a également décidé d’investir plus de 127 millions dans le développement du tram dans les quartiers d’Ochota, Mokotow et Wilanów, où vivent 1,8 million d’habitants. La Commissaire à la politique régionale Corina **Crețu** a déclaré: “Grâce à l’UE, Varsovie est en train de se doter d’un réseau de transport moderne, pour le plus grand bénéfice des habitants, des touristes et des entreprises locales. Ils profiteront tous d’un système de transport rapide, confortable et propre, d’une meilleure qualité de l’air dans la ville et de nouvelles opportunités économiques dans les quartiers desservis.” Pour le métro, les travaux financés par l’UE incluent la construction de près de 6 kilomètres de ligne et l’achat de 17 nouveaux wagons. Le projet devrait être achevé à la fin de 2022. Le métro de Varsovie est actuellement constitué de deux lignes. La deuxième a ouvert en 2015, avec un soutien financier de l’Europe à hauteur de 776 millions d’euros. En janvier 2017, l’UE avait également investi 432 millions d’euros pour [la seconde phase des travaux](#) sur la ligne deux. Pour le tram, l’UE finance l’achat de 50 véhicules et la construction de près de 12 km de ligne connectant le Sud-est de la ville à la gare de Warszawa Zachodnia, un important pôle de transport. ## **Commission launches public consultation on actions to halt the decline of bees and other pollinators**

The Commission is today launching a public consultation on a European initiative on pollinators. Wild pollinators such as bees, butterflies and many other insects pollinate crops and wild plants, so that they can bear fruit and seed. An estimated €15 billion of annual EU agricultural output is directly attributed to pollinators. Commissioner for the Environment, Maritime Affairs and Fisheries, Karmenu **Vella** said: “Scientists have warned us of steep pollinator decline across Europe. We have a good understanding of declines for some pollinators while there are knowledge gaps for others. But it is beyond doubt that it is time to act. If we do not, we and our future generations would pay a very heavy price indeed.” Commissioner for

Agriculture and Rural Development, Phil **Hogan**, said: *“Pollinators are too important for our food security and farming communities – as well as for life on the planet. We cannot afford to continue losing them.”* The mid-term [review](#) of the EU 2020 biodiversity strategy showed that pollination might be significantly decreasing. Almost 1 in 10 bee and butterfly species is facing extinction, according to the [European Red List](#). To tackle the decline, the Commission is looking to develop a European initiative on pollinators and calls on scientists, farmers and businesses, environmental organisations, public authorities and citizens to contribute. The consultation will remain open until 5 April 2018 and is available [here](#). (For more information: Enrico Brivio – Tel.: + 32 229 56172; Iris Petsa – Tel.: +32 229 93321)

**Eurostat: La production industrielle en hausse 1,0% dans la zone euro, et aussi en hausse de 0,9% dans l’UE28 en Novembre 2017 comparé à octobre 2017**

En novembre 2017 par rapport à octobre 2017, la production industrielle corrigée des variations saisonnières a augmenté de 1,0% dans la zone euro (ZE19) et de 0,9% dans l’UE28, selon les estimations d’Eurostat, l’office statistique de l’Union européenne. En octobre 2017, la production industrielle avait progressé de 0,4% dans la zone euro et de 0,5% dans l’UE28. En novembre 2017 par rapport à novembre 2016, la production industrielle a augmenté de 3,2% dans la zone euro et de 3,5% dans l’UE28.
