

# Dundee City Transmission Cable Replacement Project – an update

From Scottish and Southern Electricity Networks – regarding the high voltage cable replacement project – area from Lochee Road to Logie Avenue :

**“As you’ll be aware the Dundee City Transmission Cable Replacement project commenced on 6 March 2017 and is progressing according to programme.**

**Below is an update in relation to the works and roads affected by these as at w/c 20 March :**

- **Lochee Road, Joint Bay 1/2 – Road remains open to traffic who are able to pass with care**
- **Lochee Road, Joint Bay 2/3 – Traffic management system sees the sequencing of traffic lights staggered to accommodate single direction traffic as at 13/03**
- **Fleucher Street, Joint Bay 3/4 – Fleuchar Street will close w/c 20 March. A diversion is in place and will take approximately 1 minute by car. Local access for residents, pedestrians, cyclists etc will be maintained during this closure.**

**I’d also like to give you a bit of notice regarding abnormal load deliveries to our lay down site at Brown Street. There will be cable drum deliveries to this site between 29 – 31 March where parking at Brown Street between Douglas Street and Miln Street will be temporarily suspended during short periods of time.**

**Traffic will be managed by Contraflow who will remain on the ground during these periods. I am currently awaiting confirmation of the vehicles’ route from the Dock and also timings, when I am in receipt of this information I will be certain to pass it on to you.”**

**I will keep residents updated as I hear further from Scottish and Southern Electricity Networks.**
