

[EIOPA publishes first quarterly set of Occupational Pensions Statistics](#)

The European Insurance and Occupational Pensions Authority (EIOPA) published its first set of quarterly comprehensive statistical information on the European occupational pensions sector. The data is based on pensions data regulatory reporting.

The statistics contains up-to-date and high-quality data and provides a comprehensive picture of the European occupational pensions sector, including country breakdowns that allow for comparability.

The statistics will be published on both a quarterly and annual basis, starting with the fourth-quarter of 2020. Each quarterly publication includes aggregated country-level information about the balance sheet, asset exposures and basic information on the features of the occupational pensions sector in each country in the European Economic Area (EEA). The annual data publication will include additional statistics on expenses, member data, and contributions, benefits paid and transfers. Data based on annual reporting will be published later this year.
