

Employers and employees should take precautions against heat stroke

As the Hong Kong Observatory has issued the Very Hot Weather Warning, the Labour Department (LD) reminds employers and employees to take appropriate precautions to prevent heat stroke when working in a hot or humid environment.

Heat stroke could occur if an employee works in a hot or humid environment for prolonged periods of time, as the body may fail to regulate its temperature by effective heat dissipation through sweating. The symptoms of heat-related illnesses include feeling thirsty, fatigue, nausea, vomiting, headache, dizziness, muscle spasm or even mental confusion, and loss of consciousness or convulsion in severe cases.

Construction workers, cleaning workers, kitchen workers and porters, for example, are more prone to heat stroke as they may be working for long hours in such an environment, especially if appropriate preventive measures have not been taken.

The LD reminds employers to arrange for a suitable assessment of the risk of heat stress in the work environment and take appropriate preventive measures. The LD has produced a booklet entitled "Risk Assessment for the Prevention of Heat Stroke at Work" as well as two leaflets entitled "Checklist for Heat Stress Assessment at Construction Sites" and "Checklist for Heat Stress Assessment at Outdoor Cleansing Workplaces" respectively. Employers are advised to refer to these publications when assessing the employees' risk of heat stress at their workplaces.

In addition to the publications on risk assessment, the LD has produced a leaflet entitled "Prevention of Heat Stroke at Work in a Hot Environment" for the public. The publications can be obtained free of charge from the offices of the Occupational Health Service of the LD, or downloaded from the department's webpage at www.labour.gov.hk/eng/public/content2_9.htm.

The LD also reminds employers and employees to take the following precautions to prevent heat stroke:

Employers

- (1) Take heed of the weather report and adopt shift work arrangements for employees to reduce their exposure to the hot environment, or arrange appropriate rest breaks for them during very hot periods;
- (2) Avoid working under direct sunlight and set up temporary sunshade wherever possible;
- (3) Provide cool potable water for employees at all times during work. If necessary, provide drinks containing electrolytes for employees to replenish loss of salt during profuse sweating;

- (4) Minimise physical demands by using tools or mechanical aids at work;
- (5) Increase air flow by enhancing ventilation or air-conditioning as appropriate;
- (6) Isolate heat-generating facilities at the workplace and use insulating materials to minimise heat dissipation to the other work areas; and
- (7) Provide relevant information and training for employees on heat stroke such as preventive measures and first aid treatment.

Employees

- (1) Wear clothing made of suitable materials (for example, cotton) that is loose-fitting and light-coloured to help heat dissipation, minimise heat absorption and allow sweat evaporation;
- (2) Wear a wide-brimmed hat when working outdoors;
- (3) Drink plenty of water or appropriate beverages with electrolytes to replenish the fluids and salt lost through sweating; and
- (4) Whenever there are any symptoms of heat-related illnesses, rest in a cool or shady place and drink water, and inform supervisors to take appropriate action immediately.

The LD also urges employers to provide for employees as far as practicable covered space with good ventilation for rest and meals. Furthermore, some employees may have difficulty in adapting to a hot working environment owing to their own health conditions. Employers should take this into account and consider the recommendations of their doctors when assigning work to these employees.

The LD organises occupational health talks in public places and at its own training venues regularly to raise employers' and employees' awareness of occupational health. Details of the health talk on the prevention of heat stroke at work in a hot environment in May and June are as follows:

(A)

Dates and Time: May 12 and 24; June 2 and 23 (Half-day (am));
May 3, 4, 16 and 23; June 7, 16 and 29 (Half-day (pm))
Venue: Occupational Safety and Health Training Centre of the Labour Department,
13/F, KOLOUR·Tsuen Wan I, 68 Chung On Street, Tsuen Wan, New Territories

(B)

Dates and Time: May 24; June 8 and 22 (Half-day (am))
Venue: Occupational Safety and Health Centre of the Labour Department,
G/F, Kwun Tong Community Health Centre Building, 60 Hip Wo Street, Kwun Tong,
Kowloon
(MTR Kwun Tong Station Exit A1)

(C)

Date and Time: May 11 (3.30pm to 5pm)
Venue: Lecture Theatre, Hong Kong Central Library, 66 Causeway Road,
Causeway Bay
(Opposite Victoria Park, MTR Tin Hau Station Exit B)

(D)

Date and Time: June 16 (3.30pm to 5pm)

Venue: Lecture Hall, Hong Kong Space Museum, 10 Salisbury Road,

Tsim Sha Tsui, Kowloon

(MTR Tsim Sha Tsui Station Exit E)

For enrolment or enquiries about the occupational health talk, please call 2852 4040 or 2361 8240 (for a talk organised at the Occupational Safety and Health Centre). Moreover, the LD also provides an outreach health education service and occupational health nurses will, on invitation, disseminate occupational health information at workplaces at a convenient time. Please contact the nursing officer at 2852 4062 for details. All these health talks are free of charge.

Infection control measures taking into account the latest COVID-19 epidemic developments will be adopted at the venues. All of the occupational health public talks require preregistration.
