

EMSD embraces smart construction

The Electrical and Mechanical Services Department is utilising innovative construction methods and technology in its quest to enhance efficiency as it builds an additional cooling system in the Kai Tak Development.

News.gov.hk spoke with representatives of the department who share their insights on the application and benefits of using the new method for electrical and mechanical equipment installation. They also explain the effectiveness and progress of the Additional District Cooling System.

The story is available at www.news.gov.hk/eng/feature today (March 10) in text and video format.
