

EMSD organises "E&M I&T Day 2022" via video conferencing (with photo)

Organised by the Electrical and Mechanical Services Department (EMSD), the "E&M I&T Day 2022" is being held via video conferencing today (July 19) and tomorrow (July 20) to provide a platform for the trades to share experience and have exchanges.

The EMSD also signed memorandums of co-operation with the Hong Kong Baptist University, the Hong Kong Metropolitan University and the Vocational Training Council to establish strategic partnerships at the event today.

The Director of Electrical and Mechanical Services, Mr Eric Pang, welcomed the three institutions to become the EMSD's innovation and technology (I&T) strategic partners to jointly support government departments in applying I&T.

Mr Pang said that the EMSD, in line with the Government policy direction, is committed to developing I&T, such as maintaining the "E&M InnoPortal" for government departments, public organisations and the electrical and mechanical (E&M) trades to set out their I&T needs, and for the I&T sector, including startups and universities, to propose matching solutions.

Representatives of government departments, public organisations, I&T and E&M sectors, and tertiary institutions are invited to share their experience at the "E&M I&T Day 2022" with the themes of "Multi-trade Integrated Mechanical, Electrical and Plumbing" and "Smart Engineering Solutions". Staff of the EMSD will also share their winning projects at this year's International Exhibition of Inventions of Geneva.
